Question	Answer Choices	Points
Idaho has identified 8 priority Resource Concern Categories (RCC's) for FY24 CSP. Using the CART CSP Summary Report, identify the one LAND USE GROUP (within Crop, Pasture, or Range) with the smallest number of ID priority RCC's met AT THE TIME OF APPLICATION. Select the response that is the best match. .	All eight ID priority resource concern categories are met.	
	Six or seven ID priority resource concern categories are met.	
	Four or five ID priority resource concern categories are met.	
	Three or less ID priority resource concern categories are met.	
Considering the LAND USE GROUP with the greatest number of acres (within Crop, Range, or Pasture), how many Resource Concern Categories (ID priority and non-ID priority) are met AT THE TIME OF APPLICATION?	Seven or more resource concern categories are met.	
	Six resource concern categories are met.	
	Five resource concern categories are met.	
	Four resource concern categories are met.	
	Three resource concern categories are met	
	Two resource concern categories are met.	

Section: Program		
Question	Answer Choices	
The FY24 top 3 LWG Resource Concern Categories (RCCs) are: Degraded Plant Condition, Soil Quality Limitation, and Field Sediment, Nutrient, and Pathogen Loss. Select the answer that best applies to the applicant's operation AT THE TIME OF APPLICATION.	All 3 LWG priority RCC's are met across at least two land uses (Crop, Range and Pasture)	
	2 of the LWG priority RCC's are met across at least two land uses (Crop, Range and Pasture)	
	1 of the LWG priority RCC's are met across at least two land uses (Crop, Range and Pasture)	
	All 3 LWG priority RCC's are met across 1 land use in the operation (Crop, Range or Pasture)	
	2 of the LWG priority RCC's are met across 1 land use in the operation (Crop, Range or Pasture)	
	1 of the LWG priority RCC's are met across 1 land use in the operation (Crop, Range or Pasture)	
	None of the LWG priority RCC's are met	
	Considering all rangeland in the application, within the last 5 years has the applicant implemented brush management to improve sage grouse habitat or installed one or more new livestock watering systems to improve livestock grazing distribution?	YES
NO		

Survey: Resource Questions

Section: Resource		
Question	Answer Choices	
Considering only irrigated land, by the end of the contract period will one or more activities be implemented to meet OR exceed the Source Water Depletion resource concern category on one or more land use groups? Determine using the CART CSP Summary Report. If no irrigated land, answer 'No'.	Yes	
	No	
Considering cropland in the application, by the end of the contract period will one or more activities be implemented to meet OR exceed the Wind and Water Erosion or Soil Quality Limitation resource concern category on one or more crop land use groups? Determine using CART CSP Summary Report. If no cropland in the operation, answer 'No'.	Yes	
	No	
Considering all cropland in the application, what proportion of the acres are in perennial vegetation 50% or more of the time (i.e. rotation length) or will have an activity implemented to meet this criteria by the end of the contract? (This may include conversion from cropland to pastureland).	75-100% of the eligible acres	
	51-74% of the eligible acres	
	25% - 50% of the eligible acres	
	Less than 25% or no Cropland	
Considering range and pasture land in the application, by the end of the contract period will one or more activities be implemented to meet OR exceed the Degraded Plant Condition resource concern category on one or more land use groups? Determine using CART CSP Summary Report. If no range or pasture in operation, answer 'No'.	Yes	
	No	

Section: Resource

Question	Answer Choices	
Will one or more activities be implemented to meet OR exceed the Terrestrial Habitat resource concern category on one or more land use groups associated with a riparian area OR a species identified in the Idaho State Wildlife Action Plan by the END of the contract period.	Yes	
	No
