Owner/Operator/Producer Review

I have reviewed the drawings, construction specifications, and additional items listed and I agree to construct, operate, and maintain this project in accordance with them. I understand that modifications during construction will require approval from the NRCS prior to installation. I agree to obtain all necessary permits, easements, and water rights. I will inform the NRCS of all conditions pertaining to project construction as stated in the acquired permits. I agree to comply with all federal, state, tribal, and local laws and regulations pertaining to this construction.

I have received a copy of the operation and maintenance plans. I will conduct the maintenance of the installed work as it is necessary for proper performance during the life of the practice.

I agree to take the necessary precautions to prevent personal injuries and damage to utilities from accidental contact. The NRCS makes no representation of the existence or non-existence of any utility. Any individual(s) performing excavation work is responsible for calling 811 or the ND One Call Center at (1-800-795-0555) at least two working days before work begins to have all publicly owned utilities marked. If excavation has not occurred within 21 days of obtaining a One-Call excavation ticket number, the One-Call system shall be notified and the ticket be updated. A utility locate request can also be made at the NDOC's ITIC website which is available 24-hours a day:

<https://www.ndonecall.com/>

I understand that it is my responsibility to provide the One-Call ticket number(s) to NRCS prior to any excavation or subsurface activities.

Owner/Operator/Producer Signature

Date

I verify that the documents listed above have been discussed with the owner/operator/producer and that they have received a copy of the files.
