

SE Area: Glencoe CST

Top Resource Concerns based on LWG rankings for Fiscal Year 2025

Cropland

Concentrated Erosion: Ephemeral gully erosion
Wind and Water Erosion: Sheet and rill erosion
Field Sediment, Nutrient, and Pathogen Loss: Sediment transported to surface water
Field Pesticide Loss: Pesticides transported to surface water
Soil Quality Limitations: Organic matter depletion

Forestland

Degraded Plant Condition: Plant productivity and health
Pest Pressure: Plant pest pressure
Terrestrial Habitat: Terrestrial habitat for wildlife and invertebrates
Concentrated Erosion: Classic gully erosion
Weather Resilience: Ponding and flooding

Farmstead

Storage and Handling of Pollutants: Nutrients transported to surface water
Air Quality emissions: Emissions of greenhouse gases - GHGs
Field Sediment, Nutrient, and Pathogen Loss: Pathogens and chemicals from manure, biosolids, or compost applications transported to surface water; transported to groundwater
Inefficient Energy Use: Energy efficient equipment and facilities
Livestock Production Limitation: Inadequate livestock shelter

Pastureland

Degraded Plant Condition: Plant productivity and health
Livestock Production Limitation: Inadequate livestock shelter
Pest Pressure: Plant pest pressure
Concentrated Erosion: Classic gully erosion
Inefficient Energy Use: Energy efficient farming/ranching practices and field operations
