SECTION 1 - INTRODUCTION

1.1 Introduction

The United States Department of Agriculture Natural Resources Conservation Service (NRCS), with the Bear River Water Conservancy District as the project Sponsor, and Bear River Canal Company (BRCC), Tremonton City, Bear River City, Highland Ditch Company, Central Canal Company, Bear River Duck Club, Chesapeake Duck Club, and Salt Creek Waterfowl Management Area as the project Co-sponsors, is proposing to partially fund watershed protection measures through the Watershed Protection and Flood Prevention Act (Public Law [PL] 83-566). The work measures are being proposed within the Lower Bear River Watershed to address agricultural water management and protect the watershed in Tremonton, Bear River City, and portions of unincorporated Box Elder County and include the following purpose and need and proposed activities by purpose.

NRCS, as the lead federal agency, has initiated National Environmental Policy Act (NEPA) analysis in the form of a Watershed Plan Environmental Impact Statement (Plan-EIS) to analyze impacts to the natural and human environment that could result from this project. The Plan-EIS will comply with the Council on Environmental Quality's (CEQ) regulations at 40 CFR Parts 1500-1508, which require an evaluation of potential environmental impacts associated with federal projects and actions. The Plan-EIS will be comprised of the following elements:

- Alternative analysis of potential design options that would meet current NRCS engineering performance criteria and project specific screening criteria.
- Detailed analysis of resources with the potential to be impacted by the alternatives that would satisfy the purpose and need for the project.
- Identification of potential mitigation measures that would reduce or eliminate environmental impacts.
- Public participation and government agency coordination through scoping and the development of the Plan-EIS.

Public participation is a key component of this project. In this initial stage of the process, the public participation process solicited scoping comments about different concerns, priorities, and ideas for the Lower Bear River Watershed. This Scoping Report outlines the work performed to date to involve the local communities through public information meetings, and a scoping comment period. The document also discusses the comments received from interested agencies and the general public during the scoping comment period.

1.2 Project Purpose and Need

The two purposes of the Lower Bear River Watershed Project (Proposed Project) are 1) agricultural water management improvement and 2) watershed protection within the Project Area.

The Proposed Project is needed to *improve agricultural water management* by addressing deficiencies in the agricultural water delivery system to secure the agricultural water supply, improve the reliability and efficiency of water delivery, and develop secondary water systems for growing communities with limited water resources needed for sustainability and reliability within the watershed.

The Proposed Project is needed to *protect the watershed*. Improvements such as levee construction, sediment removal, and bank stabilization are needed to reduce flooding, erosion, sediment, and agriculture-related pollution, and maintain and enhance wetlands and wildlife habitat.

Proposed Activities by Purpose:

- Agricultural Water Management Purpose
 - Bear River Canal Company (BRCC) Canyon Improvements
 - Alternative 1: Siphons Installation
 - Alternative 2: Hammond Improvements
 - BRCC Red Siphon Installation
 - Tremonton Pressure Irrigation
 - Bear River City Pressure Irrigation
 - Highland Ditch Piping
 - Central Canal Company Piping
- Watershed Protection Purpose
 - Bear River Duck Club Levee Improvements
 - Chesapeake Hunting Club Levee Improvements
 - Salt Creek Waterfowl Management Area (WMA) Levee Improvements and Sediment Removal

1.3 Scoping Goals and Objectives

The goal of public participation and involvement is to initiate communication between a diverse group of public and government agency participants in order to gather input and provide timely information throughout the NEPA process. The primary tasks that accomplish this are: 1) establishing ongoing communication with stakeholders, agencies, and the general public; 2) providing information to the public about the environmental review process and each participant's role; 3) providing an avenue for the public and stakeholders to share concerns and interests; and 4) documenting all public and government agency input.

SECTION 2 - SCOPING PROCESS SUMMARY

2.1 Scoping Overview

Questions, comments, and concerns about the Proposed Project were requested during the scoping period. The following summarizes the scoping process and efforts made to engage the public, regulatory agencies, and Tribes.

2.2 Scoping Terms

The following terms can be generally used during the scoping process to identify specific actions, when necessary:

- Comment: a distinct statement or question about a topic or issue relating to the project.
- Comment Category: a topic to which a comment is addressed.
- Comment Document: a written version of comment(s) submitted by a commenter. One comment document may contain multiple comments.
- Commenter: an individual, organization, or agency providing one or more comments.

2.3 Scoping Schedule

The following dates outline the milestones for the scoping process:

- April 21, 2023: Preliminary Sponsor Kick-off Meeting
- September 25, 2023: Agency Scoping Meeting Notice Emailed
- October 25 and November 1, 2023: Public Scoping Meeting Notice Published in the Box Elder News Journal
- October 25, 2023: Public Scoping Postcards Mailed
- November 1, 2023: Virtual Agency Scoping Meeting
- November 9, 2023, 2021: Public Scoping Meeting
- June 14, 2024: Notice of Intent (NOI) Comment Period Opened
- June 19, 2024: NOI Published in the Box Elder Journal
- June 17, 2024: NOI Emailed to Public/Agency Stakeholders
- June 17, 2024: NOI Scoping Public Mailer Sent
- July 14, 2024: NOI Scoping Period Closed

2.4 Scoping Notice

Scoping notices were prepared and sent to interested parties, Tribes, and regulatory agencies on September 25, 2023. The list of recipients was prepared by NRCS, Bear River Water Conservancy District, J-U-B Engineers, Inc. (J-U-B) and other members of the project team. The scoping notice gave a description of the Watershed Plan, location and overview, and requested public participation and input. The scoping notice also provided details of the scoping meeting, contact information to submit written comments, and the scoping period dates.

The scoping notice was also posted to the NRCS Project Website: www.bit.ly/LowerBearRiverWatershed. A public scoping meeting notice was published on October 25, 2023 and November 1, 2023 in the Box Elder County Journal announcing the Watershed Plan and scoping meeting. Copies of the newspaper legal notices are included within Appendix A.

2.5 Scoping Meeting

The primary purpose of the agency and public scoping meetings was to gather input on concerns and interests for the Lower Bear River Watershed and ideas to inform the alternatives development and prioritization process. The scoping meetings also sought to provide a description of the Watershed Plan, initial goals, current water resource concerns that led to the impetus for the project, and an overview of the NEPA process. The scoping meeting provided information pertaining to the project's purpose and need statement, potential alternatives for consideration, environmental resources to be addressed in the Plan-EIS, and the overarching public participation process per NEPA regulations. An agency scoping meeting was convened virtually on November 1, 2023. A public scoping meeting was convened on November 9, 2023. Both meetings included a brief presentation describing the background, need, goals, and current water resource concerns for the Watershed Plan, maps of the watershed, the Plan-EIS schedule was outlined, and how to submit comments. Project team representatives then addressed questions and comments. Meeting materials and display boards that were shared during the meeting were posted on the NRCS website: www.bit.ly/LowerBearRiverWatershed and can be found in Appendix B.

2.6 Mailing Lists

Mailing lists were prepared by NRCS, Bear River Water Conservancy District, J-U-B and other members of the project team to inform the government agencies and general public about the scoping process for the project. For the Scoping meetings, a total of 65 emails were sent to government agencies and 1698 mailings to local stakeholders and relevant organizations. In total, 1763 notices were sent to agencies and the public in advance of the public scoping meeting. A copy of the mailing lists is included in Appendix A. Mailers and emails were again sent to notify the public of the Notice of Intent (NOI) comment period. A total of 1698 mailers and 150 emails were sent to government agencies, local stakeholders, relevant organizations and the general public. Additionally, 15 letters were sent to Tribes to initiate the public scoping process under the National Environmental Policy Act (NEPA) for the EIS and the National Historic Preservation Act (NHPA) Section 106 consultation process pursuant to Code of Federal Regulations Title 36, Section 800.3. Copies of the mailing lists are included in Appendix A.

SECTION 3 - COMMENTS

3.1 Agency and Public Scoping Meetings

An agency scoping meeting was conducted virtually on November 1, 2023. Sixteen (16) agency stakeholders, five (5) project team members from J-U-B, four (4) NRCS representatives, and two (2) project sponsor representatives attended the agency scoping meeting. A meeting summary, including list of attendees, is located in Appendix B.

A public scoping meeting was conducted on November 9, 2023. Forty-three (43) public attendees, five (5) project team members from J-U-B, four (4) NRCS representatives, and two (2) project sponsor representatives attended the public scoping meeting. A meeting summary, including a list of attendees, meeting presentation and submitted comments, is located in Appendix B.

3.2 Comments Received

Participants were invited to submit comments in writing by mail or email at the scoping meetings, following the meetings and again during the NOI comment period, which officially opened on June 14, 2024 and ended on July 14, 2023, a total of 30 days. Written comments were accepted via mail, e-mail, or comment card. There were eleven (11) scoping comments received for the Watershed Plan. Full comments can be found in Appendix B.

3.3 Comment Summary

The methodology for categorizing and addressing public and agency comments was to identify the nature of the comment and then to separate each of the comments into comment categories. A comment summary is shown below. Comments reflect a mix of concerns, ranging from water management, flooding, and infrastructure to climate change and public land management. There is a general desire for collaboration and careful consideration of environmental impacts.

- Flooding
 - Several commenters noted ongoing issues with flooding in the West Corinne drainage, which have impacted landowners. Some of the problems are due to undersized culverts in the area, resulting in agricultural and residential flooding. Commenters requested that these issues be included in the plan for resolution.
 - Commenter reported significant flooding that affected agricultural land, with losses of alfalfa crops.
- Central Canal Company
 - Central Canal Company, which is a major water diverter from Bear River, noted the need for water conservation and safety improvements to their canal system, which serves wildlife habitats and the Great Salt Lake ecosystem.

- Environmental Impact
 - Commenter stressed the importance of addressing climate change, habitat protection, and water efficiency in the watershed plan and also advocated for more sustainable and natural solutions, such as acquiring lands for wetland restoration instead of expensive infrastructure projects, and increasing water flows to the Great Salt Lake.
 - Commenter suggested a shift towards more sustainable living through conservation, rewilding, and population control to address environmental challenges, emphasizing the need for responsible management of resources.
- Property Impacts
 - Commenter inquired if the Lower Bear River Watershed Plan would affect their water supply from the Hammond Canal and Black Slough, as they own property along these sources.
- Public Lands Policy Coordination Office (PLPCO)
 - This state agency described its role in coordinating land policies and expressed interest in how the watershed plan might affect public lands and resources.
 - The State supports all project alternatives due to their benefits for agriculture, flood mitigation, wildlife habitat, and recreation but seeks further analysis before making a final commitment.
 - Requested that the project align with the **Box Elder County Resource Management Plan (CRMP)**, which focuses on protecting agriculture, water conveyance systems, watershed management, and wildlife habitat. The project is also requested to be consistent with the **State Resource Management Plan (SRMP)**.
 - Requested that the Utah Division of Water Rights be consulted to ensure the project complies with water rights regulations.
- PacifiCorp
 - The company which operates the Cutler Hydroelectric Project, requested involvement in the Watershed Plan's EIS process, particularly due to the potential impacts on water management infrastructure and agreements related to the Bear River system.
 -
- Garland Secondary Water
 - Garland City suggested exploring the feasibility of pressurized secondary irrigation to alleviate pressure on culinary water in their growing city and addressing flooding in specific areas.

Agency Scoping Meeting Email Invitation

Lower Bear River Watershed Plan-Environmental Impact Statement (EIS), Box Elder County, Utah Agency Scoping Meeting: November 1, 2023; 1:00–2:00 p.m. MST

As part of the Plan-EIS (see attachment), the NRCS and project sponsors will hold an agency scoping meeting to identify water resource concerns and share conceptual, locally-proposed solutions to address them. Agencies are invited to attend the meeting to comment on the EIS's scope of analysis and identify specific issues that they feel should be analyzed in the EIS.

Date: Wednesday, November 1, 2023

Time: 1:00 pm to 2:00 pm MST

Online via Microsoft Teams: [Click here to join the meeting](#)

Meeting ID: 248 615 144 141

Passcode: 2DW5Xm

[Download Teams](#) | [Join on the web](#)

Or call in (audio only)

[+1 929-229-5346,,219645564#](#)

Phone Conference ID: 219 645 564#

A public scoping meeting will be held on November 9, 2023 from 6:00 to 8:00 PM MST at the Box Elder County Fairgrounds Museum Bldg., 400 N. 1000 W., Tremonton, UT.

Lower Bear River Watershed Plan-Environmental Impact Statement - Box Elder County, Utah

Public Scoping Meeting

The U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS), with the Bear River Water Conservancy District and Bear River Canal Company as the project sponsors, is preparing an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan in Box Elder County, Utah. The EIS is being funded through the NRCS Watershed Protection and Flood Prevention Program (Public Law 83-566).

The primary purposes for watershed planning and preparation of the EIS are to: 1) provide a secure water supply to agricultural water users, 2) improve flood prevention to protect areas that have had flooding issues, 3) develop secondary water systems (non-potable irrigation water for lawns and gardens) for growing communities with limited water resources, and 4) support and enhance wildlife habitat and recreational opportunities in the watershed.

The NRCS and project sponsors will hold a public scoping meeting to identify water resource concerns and share conceptual, locally-proposed solutions to address them. The public is invited to attend the scoping meeting to learn more, ask questions and submit written comments. A brief presentation will be provided at 6:00 p.m., followed by an opportunity for attendees to meet individually with the project team.

Proposed Solutions

BEAR RIVER CANAL COMPANY (BRCC)

- 1. Canyon Canal Improvements
- 2. Canal Lateral Piping

BEAR RIVER CLUB COMPANY

- 3. Bear River Dock Replacement
- 4. Bear River Levee Improvement
- 5. Malad River Spillway Improvement

BEAR RIVER WATER CONSERVANCY DISTRICT

- 6. Bothwell Pocket Flood Control Reservoir Construction

CHESAPEAKE HUNTING CLUB (CHC)

- 7. Bear River Bank Stabilization
- 8. Lower Bear Ditch Piping Projects

ELWOOD CITY

- 9. Pressure Irrigation Installation Phase 1
- 10. Pressure Irrigation Installation Phase 2

HIGHLAND DITCH COMPANY

- 11. Highland Ditch Piping

SALT CREEK WATERFOWL MANAGEMENT AREA (WMA)

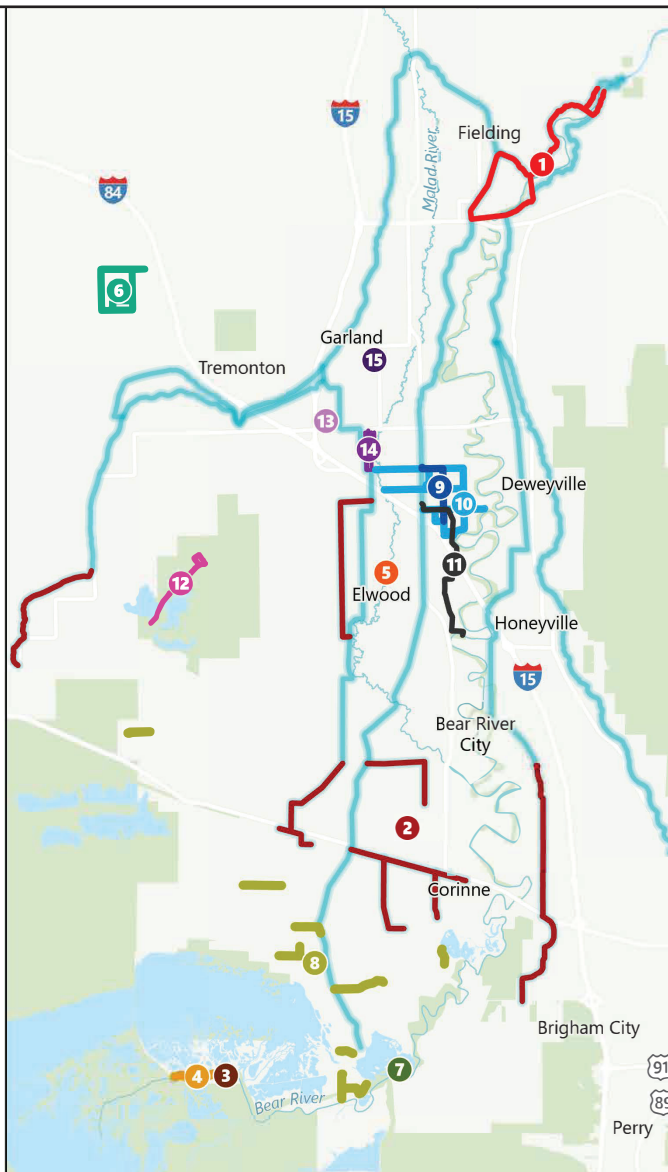

- 12. Salt Creek Settlement Basin, Dike, and Additional Structures Construction

TREMONTON

- 13. Detention Basin Development for Malad River and Salt Creek and Mill Ditch Drainages
- 14. Secondary Water Systems Construction

GARLAND

- 15. Secondary Water Systems Construction

Public Scoping Meeting

Date:

Thursday, November 9, 2023

Time:

6:00 – 8:00 p.m.

Location:

Box Elder County Fairgrounds
Museum Building
(400 N. 1000 W., Tremonton)

Following the meeting,
materials will be available

online: [www.bit.ly/
LowerBearRiverWatershed](http://www.bit.ly/LowerBearRiverWatershed)

Submit a Comment

At this time, NRCs is requesting comments on the project to identify issues and resource sensitivities. The publication date of the Notice of Intent (NOI) in the Federal Register has yet to be determined. Comments may be submitted now through 30 days following its publication. Notice will be provided when this occurs. Please submit comments at your earliest convenience to:

Lower Bear River Watershed Plan-EIS

Interested parties may also submit written comments at the Bear River Water Conservancy District (102 West Forest Street, Brigham City).

BOX ELDER NEWS JOURNAL

PROOF OF PUBLICATION

State of Utah
Box Elder County

**LOWER BEAR RIVER
WATERSHED PLAN-
ENVIRONMENTAL IMPACT
STATEMENT (EIS), BOX
ELDER COUNTY, UTAH
PUBLIC SCOPING
MEETING: THURSDAY,
NOVEMBER 9, 2023;
6:00-8:00 P.M.**

The U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS), with the Bear River Water Conservancy District and Bear River Canal Company as the project sponsors, is preparing an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan in Box Elder County, Utah. The EIS is being funded through the NRCS Watershed

Protection and Flood Prevention Program (Public Law 83-566).

The primary purposes for watershed planning and preparation of the EIS are to: 1) provide a secure water supply to agricultural water users, 2) improve flood prevention to protect areas that have had flooding issues, 3) develop secondary water systems (non-potable irrigation water for lawns and gardens) for growing communities with limited water resources, and 4) support and enhance wildlife habitat and recreational opportunities in the watershed.

The NRCS and project sponsors will hold a public scoping meeting to identify water resource concerns and share conceptual, locally-proposed solutions to address them. The public is invited to attend the meeting to learn more, ask questions and submit written comments.

Date: Thursday, November 9, 2023

Time: 6:00 - 8:00 p.m. (A brief presentation will be provided at 6:00 p.m., followed by an opportunity for attendees to meet individually with the project team.)

Location: Box Elder County Fairgrounds Museum Building (400 N. 1000 W., Tremonton)

Following the meeting, materials will be available online: www.bit.ly/LowerBearRiverWatershed

**Persons with disabilities who require accommodations to participate in this meeting should contact Scott Morton, Disability SEPM, at scott.morton@usda.gov or [801/524-4596], or dial 7-1-1 to access telecommunication relay services.*

At this time, NRCS is requesting comments on the project to identify issues and resource sensitivities. The publication date of the Notice of Intent (NOI) in the Federal Register has yet to be determined. Comments may be submitted now through 30 days following its publication. Notice will be provided when this occurs. Please submit comments at your earliest convenience to:

Lower Bear River Watershed Plan-EIS

Attn: The Langdon Group
466 N. 900 W.
Kaysville, Utah 84037

Email: lowerbear@utwatershed.com

Interested parties may also submit written comments at the Bear River Water Conservancy District: 102 West Forest Street, Brigham City.

Jessica Wade
Field Manager, Salt Lake Field Office
Bureau of Land Management
2370 South Decker Lake Blvd.
West Valley, Utah 84119

RE: Formal request to be a Cooperating Agency in the development of the Lower Bear River Watershed Plan-Environmental Impact Statement (Plan-EIS) for proposed improvements in Box Elder County, Utah.

Dear Jessica Wade:

In accordance with the Council on Environmental Quality regulations implementing the National Environmental Policy Act (NEPA) at 40 CFR Part 1501.8, the Natural Resources Conservation Service (NRCS) is formally requesting that the Bureau of Land Management become a cooperating agency in the planning and development of the Lower Bear River Watershed Plan-EIS. The enclosed agency scoping notice includes project information and details on an **agency scoping meeting scheduled for November 1, 2023 at 1 pm.**

This request is made since your agency is identified as having special expertise or jurisdiction by law related to this project. The Plan-EIS is being prepared to fulfill our NEPA compliance responsibilities pertaining to our federal financial assistance through the Watershed Protection and Flood Prevention Program as authorized through Public Law 83-566. Upon acceptance of this invitation, roles can be defined in an informal agreement or a memorandum of understanding. If your agency is unable to participate as a cooperating agency, please return a written explanation indicating that your agency cannot participate.

Please send notification confirming your decision to: Emily Fife, State Conservationist, NRCS, Wallace F Bennett Federal Building, 125 South State Street, Room 4010, Salt Lake City, Utah 84138-1100.

Thank you for your timely response and assistance with these efforts. If you have any questions, please contact Derek Hamilton, Water Resources Coordinator, at derek.hamilton@usda.gov or 801/524-4560.

Sincerely,

A handwritten signature in black ink that reads "Emily Fife". The signature is written in a cursive, flowing style.

Reference: Initiation of Section 106 and Notice of Intent to Prepare an EIS: Lower Bear River Watershed Plan-EIS, Cache County, Utah

Dear Chairman Alex:

The Natural Resources Conservation Service (NRCS) would like to inform you that the Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan will be published in the *Federal Register* on June 14, 2024. The proposed Lower Bear River Watershed Plan-EIS will examine alternative solutions to address agricultural water management, prevent flooding, protect the watershed, and enhance recreational opportunities in Tremonton, Elwood, Bear River City, Garland, and portions of unincorporated Box Elder County for the Wellsville Canyon Watershed Plan has been published in the *Federal Register* on May 8, 2024.

This letter initiates the public scoping process under the National Environmental Policy Act (NEPA) for the EIS and the National Historic Preservation Act (NHPA) Section 106 consultation process pursuant to Code of Federal Regulations Title 36, Section 800.3. The NRCS is serving as the lead Federal agency for the purposes of Section 106. We write to you at this time regarding the project and we welcome any information you would like to share with us regarding historic properties or places of traditional religious and cultural importance near the proposed project area that we should consider as part of our analysis. We would also appreciate your assistance in identifying any other Tribes with whom we should consult on this project.

A copy of the NOI is enclosed with this letter and may also be read in its entirety by visiting <https://www.federalregister.gov/> and searching for NRCS-2024-0011. We have also included a mailer with the project map for your convenience. You can find additional project information at the NRCS project website:

<https://www.nrcs.usda.gov/conservation-basics/conservation-by-state/utah/lower-bear-river-watershed-sponsor-bear-river-water>

NRCS invites you to comment on the scope of the EIS. Scoping comments will be accepted through **July 14, 2024**. We will consider comments received after close of the comment period to the extent possible.

Comments may be provided in the following ways:

United States Department of Agriculture

Online—Go to <http://www.regulations.gov> and search for docket ID “NRCS-2024-0011”. Follow the online instructions for submitting comments.

Mail—Please address to: Derek Hamilton, Water Resources Coordinator USDA, NRCS, Utah State Office, 125 S. State Street, #4010, Salt Lake City, Utah 84138. In your comments, please specify the docket ID NRCS-2024-0011.

Thank you for your interest and input in the planning process for this project. We look forward to hearing from and continuing to work with you on this important project. We welcome your call if you have questions on the proposed project or if you wish to arrange a government-government meeting. If you have any questions, comments or concerns, please contact State Watershed Cultural Resources Specialist Tara S. Hoffmann at 385-258-1266 or 801-524-4556 or tara.hoffmann@usda.gov, at your earliest convenience.

Sincerely,

A handwritten signature in black ink, appearing to read "Travis Mote", with a stylized flourish at the end.

Dear Ms. Chapoose:

The Natural Resources Conservation Service (NRCS) would like to inform you that the Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan will be published in the *Federal Register* on June 14, 2024. The proposed Lower Bear River Watershed Plan-EIS will examine alternative solutions to address agricultural water management, prevent flooding, protect the watershed, and enhance recreational opportunities in Tremonton, Elwood, Bear River City, Garland, and portions of unincorporated Box Elder County for the Wellsville Canyon Watershed Plan has been published in the *Federal Register* on May 8, 2024.

This letter initiates the public scoping process under the National Environmental Policy Act (NEPA) for the EIS and the National Historic Preservation Act (NHPA) Section 106 consultation process pursuant to Code of Federal Regulations Title 36, Section 800.3. The NRCS is serving as the lead Federal agency for the purposes of Section 106. We write to you at this time regarding the project and we welcome any information you would like to share with us regarding historic properties or places of traditional religious and cultural importance near the proposed project area that we should consider as part of our analysis. We would also appreciate your assistance in identifying any other Tribes with whom we should consult on this project.

A copy of the NOI is enclosed with this letter and may also be read in its entirety by visiting <https://www.federalregister.gov/> and searching for NRCS-2024-0011. We have also included a mailer with the project map for your convenience. You can find additional project information at the NRCS project website:

<https://www.nrcs.usda.gov/conservation-basics/conservation-by-state/utah/lower-bear-river-watershed-sponsor-bear-river-water>

NRCS invites you to comment on the scope of the EIS. Scoping comments will be accepted through **July 14, 2024**. We will consider comments received after close of the comment period to the extent possible.

Comments may be provided in the following ways:

Online—Go to <http://www.regulations.gov> and search for docket ID “NRCS-2024-0011”. Follow the online instructions for submitting comments.

Mail—Please address to: Derek Hamilton, Water Resources Coordinator USDA, NRCS, Utah State Office, 125 S. State Street, #4010, Salt Lake City, Utah 84138. In your comments, please specify the docket ID NRCS-2024-0011.

Thank you for your interest and input in the planning process for this project. We look forward to hearing from and continuing to work with you on this important project. We welcome your call if you have questions on the proposed project or if you wish to arrange a government-government meeting. If you have any questions, comments or concerns, please contact State Watershed Cultural Resources Specialist Tara S. Hoffmann at 385-258-1266 or 801-524-4556 or tara.hoffmann@usda.gov, at your earliest convenience.

Sincerely,

Travis Mote
NRCS Acting State Conservationist

NRCS invites you to comment on the scope of the EIS. Scoping comments will be accepted through **July 14, 2024**. We will consider comments received after close of the comment period to the extent possible.

Comments may be provided in the following ways:

Online—Go to <http://www.regulations.gov> and search for docket ID “NRCS-2024-0011”. Follow the online instructions for submitting comments.

Mail—Please address to: Derek Hamilton, Water Resources Coordinator USDA, NRCS, Utah State Office, 125 S. State Street, #4010, Salt Lake City, Utah 84138. In your comments, please specify the docket ID NRCS-2024-0011.

Thank you for your interest and input in the planning process for this project. We look forward to hearing from and continuing to work with you on this important project. We welcome your call if you have questions on the proposed project or if you wish to arrange a government-government meeting. If you have any questions, comments or concerns, please contact State Watershed Cultural Resources Specialist Tara S. Hoffmann at 385-258-1266 or 801-524-4556 or tara.hoffmann@usda.gov, at your earliest convenience.

Sincerely,

Travis Mote

Reference: Initiation of Section 106 and Notice of Intent to Prepare an EIS: Lower Bear River Watershed Plan-EIS, Cache County, Utah

Dear Coordinator Smith:

The Natural Resources Conservation Service (NRCS) would like to inform you that the Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan will be published in the *Federal Register* on June 14, 2024. The proposed Lower Bear River Watershed Plan-EIS will examine alternative solutions to address agricultural water management, prevent flooding, protect the watershed, and enhance recreational opportunities in Tremonton, Elwood, Bear River City, Garland, and portions of unincorporated Box Elder County for the Wellsville Canyon Watershed Plan has been published in the *Federal Register* on May 8, 2024.

This letter initiates the public scoping process under the National Environmental Policy Act (NEPA) for the EIS and the National Historic Preservation Act (NHPA) Section 106 consultation process pursuant to Code of Federal Regulations Title 36, Section 800.3. The NRCS is serving as the lead Federal agency for the purposes of Section 106. We write to you at this time regarding the project and we welcome any information you would like to share with us regarding historic properties or places of traditional religious and cultural importance near the proposed project area that we should consider as part of our analysis. We would also appreciate your assistance in identifying any other Tribes with whom we should consult on this project.

A copy of the NOI is enclosed with this letter and may also be read in its entirety by visiting <https://www.federalregister.gov/> and searching for NRCS-2024-0011. We have also included a mailer with the project map for your convenience. You can find additional project information at the NRCS project website:

Lower Bear River Watershed Plan

Notice of Intent

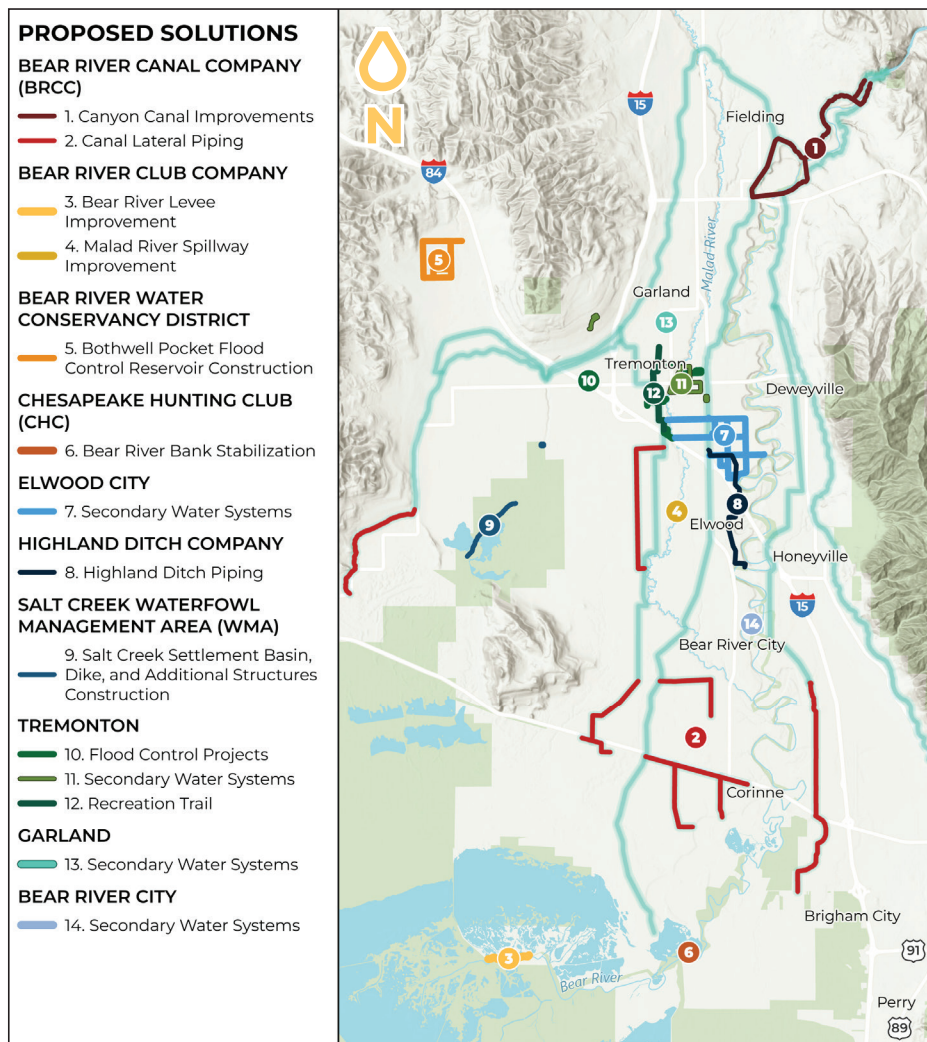

Project Information

The U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS), with the Bear River Water Conservation District and Bear River Canal Company as project Sponsors, announces its intent to prepare an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan located in Box Elder County, Utah. The proposed Lower Bear River Watershed Plan will examine alternative solutions to address agricultural water management, prevent flooding, protect the watershed, and enhance recreational opportunities in Tremonton, Elwood, Bear River City, Garland, and portions of unincorporated Box Elder County. NRCS is requesting comments to identify significant issues, potential alternatives, information, and analyses relevant to the proposed action from all interested individuals, Federal and State agencies, and Tribes.

NRCS began the environmental process in fall 2023 and held a public scoping meeting in November 2023. With the Notice of Intent (NOI), NRCS is now seeking further public comment to help determine the range of actions, alternatives, and impacts to be evaluated and included in the EIS.

The map to the right shows currently proposed design alternatives. Additional descriptions of these alternatives are available on the project webpage:

www.bit.ly/LowerBearRiverWatershed

Submit a Comment

Written comments can be submitted through June XX, 2024 (postmarked by the same date) and should be directed to:

Mail: Lower Bear River Watershed Plan-EIS
c/o The Langdon Group
466 N. 900 W.
Kayville, UT 84037

Email: lowerbear@utwatershed.com

Please note that all comments received previously following the scoping meeting in November 2023 will be included and do not need to be resubmitted. The full NOI, scoping meeting materials and additional background information and maps can be reviewed at: www.bit.ly/LowerBearRiverWatershed

Following the public comment period, the planning process will continue to move forward with development of alternatives and the alternative analysis required for the EIS. The Draft EIS is anticipated to be available by XX, which will include another public comment period.

Contact the project team at 435-239-3467 or lowerbear@utwatershed.com for more information.

Lower Bear River Watershed Plan Notice of Intent

NOI Email Notice

Dear Lower Bear River Watershed Plan Stakeholder,

The U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS), with the Bear River Water Conservation District and Bear River Canal Company as project Sponsors, announces its intent to prepare an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan located in Box Elder County, Utah. The proposed Lower Bear River Watershed Plan will examine alternative solutions to address agricultural water management, prevent flooding, protect the watershed, and enhance recreational opportunities in Tremonton, Elwood, Bear River City, Garland, and portions of unincorporated Box Elder County. NRCS is requesting comments to identify significant issues, potential alternatives, information, and analyses relevant to the proposed action from all interested individuals, Federal and State agencies, and Tribes.

NRCS began the environmental process in fall 2023 and held a public scoping meeting in November 2023. With the Notice of Intent (NOI) publication, NRCS is now seeking further public comment to help determine the range of actions, alternatives, and impacts to be evaluated and included in the EIS.

Written comments can be submitted through July 14, 2024 (postmarked by the same date) and should be directed to:

Mail: Lower Bear River Watershed Plan-EIS
c/o The Langdon Group
466 N. 900 W.
Kaysville, UT 84037

Email: lowerbear@utwatershed.com

Please note that all comments received previously following the scoping meeting in November 2023 will be included and do not need to be resubmitted. The full NOI, scoping meeting materials and additional background information and maps can be reviewed at: www.bit.ly/LowerBearRiverWatershed.

The full NOI was published and made available to the public in the June 14, 2024 issue of the Federal Register: [Regulations.gov](https://www.federalregister.gov)

Following the public comment period, the planning process will continue to move forward with development of alternatives and the alternative analysis required for the EIS. The Draft EIS is anticipated to be available by early 2026, which will include another public comment period.

Please contact the project team at 435-239-3467 or lowerbear@utwatershed.com for more information.

Best regards,
Lower Bear River Watershed Public Involvement Team

through July 14, 2024.

The U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS), with the Bear River Water Conservation District and Bear River Canal Company as project sponsors, announces its intent to prepare an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Plan located in Box Elder County, Utah. The proposed Lower Bear River Watershed Plan will examine alternative solutions to address agricultural water management, prevent flooding, protect the watershed, and enhance recreational opportunities in Tremonton, Elwood, Bear River City, Garfield, and portions of unincorporated Box Elder County. NRCS is requesting comments to identify significant issues, potential alternatives, information, and analyses relevant to the proposed action from all interested individuals, Federal and State agencies, and Tribes.

NRCS began the environmental process in fall 2023 and held a public scoping meeting in November 2023. With the NOI announcement, NRCS is now seeking further public comment to help determine the range of actions, alternatives, and impacts to be evaluated and included in the EIS.

Written comments can be submitted through July 14, 2024 (postmarked by the same date) and should be directed to:

Mail: Lower Bear River
Watershed Plan-EIS
c/o The Langdon Group
466 N. 900 W.
Kayville, UT 84037
Email:

lowerbear@utwatershed.com
Please note that all comments received previously following the scoping meeting in November 2023 will be included and do not need to be resubmitted. The full Notice of Intent (NOI), scoping meeting materials and additional background information and maps can be reviewed at: www.btrr/LowerBearRiverWatershed.

Following the public comment period, the planning process will continue to move forward with development of alternatives and the alternative analysis required for the EIS. The Draft EIS is anticipated to be available by early 2026, which will include another public comment period.

Please contact the project team at 435-239-3467 or lowerbear@utwatershed.com for more information.

We invite you to submit comments in response to this notice. You may submit your comments through one of the methods below:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov> and search for docket ID NRCS-2024-0011. Follow the online instructions for submitting comments; or
- **Mail or Hand Delivery:** Derek Hamilton, Water Resources Coordinator, USDA, NRCS, Utah State Office, 125 S. State Street, #4010, Salt Lake City, Utah 84138. In your comments, specify the docket ID NRCS-2024-0011.

All comments received will be posted without change and made publicly available on www.regulations.gov.

FOR FURTHER INFORMATION, CONTACT: Derek Hamilton, Water Resources Coordinator; telephone: (801) 524-4560; email: derek.hamilton@usda.gov. Individuals who require alternative means for communication should contact the U.S. Department of Agriculture Target Center at (202) 720-2600 (voice) and text telephone (TTY) or dial 711 for Telecommunications Relay service (both voice and text telephone users can initiate this call from any telephone).

I, Casey Claybaugh, being first duly sworn depose and say that I am the Publisher of the Box Elder News Journal, a newspaper of general circulation, published every Wednesday in Brigham City, Utah, County of Box Elder; that the notice

LOWER BEAR RIVER WATERSHED PLAN ENVIRONMENTAL IMPACT STATEMENT, BOX ELDER COUNTY, UTAH

of which a copy is hereto attached was published in said newspaper, the first publication having been made on the 19th day of June 2024, and the last on the 19th day of June 2024; that said notice was published in the regular and entire issue of every number of the paper during the period and times of publication, and the same was published in the newspaper proper and not in the supplement.

Same was also published online at utahlegals.com, according to Section 45-1-101, Utah Code Annotated beginning on the first date of publication and for 30 days thereafter.

Casey Claybaugh, Publisher

Subscribed and sworn before me this
19th day of June 2024.

Sean Michael Hales, Notary Public
Residence: Brigham City, Utah
My commission expires August 31, 2026

Lower Bear River Watershed

LOWER BEAR RIVER WATERSHED MAP (PROPOSED)

Lower Bear River Watershed, Box Elder County, Utah

September 2023

Lower Bear River Watershed Plan-EIS

Resource Concerns

Lack of water reliability due to canal breaches and slope failures

Flooding and flood-related damages to farms, homes, and businesses

Inefficiencies in irrigation water and strain on existing culinary water supplies

Sedimentation, unstable banks, and water delivery, management, and access problems to support wildlife habitats and recreation

Proposed Solutions

BEAR RIVER CANAL COMPANY (BRCC)

- 1. Canyon Canal Improvements
- 2. Canal Lateral Piping

BEAR RIVER CLUB COMPANY

- 3. Bear River Dock Replacement
- 4. Bear River Levee Improvement
- 5. Malad River Spillway Improvement

BEAR RIVER WATER CONSERVANCY DISTRICT

- 6. Bothwell Pocket Flood Control Reservoir Construction

CHESAPEAKE HUNTING CLUB (CHC)

- 7. Bear River Bank Stabilization
- 8. Lower Bear Ditch Piping Projects

ELWOOD CITY

- 9. Secondary Water Phase 1
- 10. Secondary Water Phase 2

HIGHLAND DITCH COMPANY

- 11. Highland Ditch Piping

Lower Bear River Watershed Resource Concerns and Potential Solutions

Historically, the canals in the canyon area have experienced failures

When the canals experience failure, it introduces massive amounts of sediment into the Bear River.

2020 Hammond Main Canal Breach

Proposed Solutions

BEAR RIVER CANAL COMPANY (BRCC)

- 1. Canyon Canal Improvements
- 2. Canal Lateral Piping

BEAR RIVER CLUB COMPANY

- 3. Bear River Dock Replacement
- 4. Bear River Levee Improvement
- 5. Malad River Spillway Improvement

BEAR RIVER WATER CONSERVANCY DISTRICT

- 6. Bothwell Pocket Flood Control Reservoir Construction

CHESAPEAKE HUNTING CLUB (CHC)

- 7. Bear River Bank Stabilization
- 8. Lower Bear Ditch Piping Projects

ELWOOD CITY

- 9. Secondary Water Phase 1
- 10. Secondary Water Phase 2

HIGHLAND DITCH COMPANY

- 11. Highland Ditch Piping

SALT CREEK WATERFOWL MANAGEMENT AREA (WMA)

- 12. Salt Creek Settlement Basin, Dike, and Additional Structures Construction

Schedule: Watershed Plan-EIS Process

Questions to Identify the Scope:

What are the concerns or issues you've observed?

Do the potential activities address the resource concerns in the watershed and align with the purpose and need of the project?

What other proposed activities within the watershed could potentially address the resource concerns?

Next Steps: Provide Comments

Submit written comments within 30 days of publication of the Notice of Intent (NOI) to prepare an EIS in the Federal Register

I. Introductions- See attendee list above

II. Project Location and Objectives

A. Funding-PL566

1. PL-566 is an old program established in 1954. Thousands of watershed plans countrywide have been funded through this program.
2. Provides technical and financial assistance to eligible sponsors.
3. Program is funding the planning phase 100% and if EIS is authorized, NRCS will pay 100% for the design phase.
4. Construction would be cost share, which would be dependent on projects and the benefits associated with those projects.

Derek Hamilton discussed the watershed boundaries and explained that it is a larger watershed that will be evaluated through a Plan-EIS. This plan is combined with the NEPA analysis, which includes a great deal of information and a very thorough economic analysis, engineering review, environmental survey, and consultation work. The Plan-EIS will be reviewed at multiple levels including a national level.

B. Project Objectives (See Slide 9 of attached presentation slides)

III. Water Resource Concerns

A. Lack of water reliability due to canal breaches and slope failures.

- 2020 Hammond Main Canal Breach Example (See Slide 11)

B. Flooding and flood-related damages to farms, homes, and businesses.

- Bothwell Pocket Flooding

C. Inefficiencies in irrigation water and strain on existing culinary water supplies.

- Much growth in the Tremonton and Garland area with agricultural land turning into residential or commercial. More of a need to transition the irrigation water into secondary water use.

D. Sedimentation, unstable banks, water delivery management, and access problems to support wildlife habitats and recreation.

- Salt Creek

Chris gave a summary of the process that has been taking place this past year or two, starting with the Preliminary Investigation and Feasibility Report (PIFR) with NRCS and key stakeholders in the watershed to identify some of the resource concerns.

IV. Proposed Solutions

A. Boxing, lining, or piping canals.

B. Repairing levies, installing sediment basins and dikes upstream of the Great Salt Lake, which is a key resource.

C. Evaluating alternatives for the canyon to make the channels more reliable for water delivery.

D. Evaluating secondary water delivery to users in Elwood and Garland through pressure systems.

E. Finding solutions for flooding of fields and channels including the Malad River that has affected the Tremonton area.

F. Improving delivery of water out to the end of ditches more efficiently within the Bear River Canal Company. Lining or piping, and/or automating these canals could help more water get to the end of the system.

G. Improving channels to help habitat areas located by the Great Salt Lake by being more efficient with the water.

Questions and Answers

- Q. *Many of the projects address many different issues with many landowners and users. Is each project being assessed individually or are they are all together?*
- A. We look at this as a watershed and how things can benefit the watershed. As we proceed with the evaluation, we will review each proposal and develop alternatives. Most importantly, we will work together as stakeholders to improve and benefit the watershed. Individual projects developed in the plan would need to be funded by the NRCS and one or more of the local sponsors.
- Q. *How were the projects identified and is this a closed list?*
- A. Alternatives and some of the resource concerns in the watershed were identified with key stakeholders during the creation of the PIFR. There will be a Public Scoping Meeting on November 9th where we will be requesting ideas from the public for solutions that fit the purpose and needs of the identified items. Alternatives can be adjusted as we move through the process. Proposed solutions will be analyzed for eligibility and incrementally. Each site and measure will be analyzed individually, including its cost-to-benefit ratio, to decide which projects to move forward through analysis.
- A. The PIFR will be made available for everyone to review. Not all current alternatives may qualify and there may be some added if the NRCS can fund those, they meet the purpose and need, and the local sponsors can provide the local matches If there are sponsors that are ready in a one to two-year vs. a three to five-year period, money can be phased in to corroborate with those sponsors.
- Q. *The State of Utah is being sued regarding the quantity of water flowing into the Great Salt Lake. Individuals may be asking if this project will be helping or harming the Great Salt Lake. Is this something that NRCS is aware of?*
- A. Groups that are involved with the Great Salt Lake have been identified and invited to the Public Scoping Meeting and their involvement is anticipated and encouraged.
- Q. *Will this be permitted under one action?*
- A. No, permitting is the responsibility of the sponsor and individual component of the project would be permitted individually, as appropriate. Before construction money is approved, all permits would need to be in place.

V. Schedule (see Slide 18)

Suzanne stated that each agency's involvement moving forward with this project is crucial in shaping it and ensuring that each agency's regulating authorities and concerns are addressed from the beginning to the end of the analysis.

Derek stated that NEPA regulations require a two-year window for completion of the EIS based on the publication date of the Notice of Intent (NOI). He also noted that the Lower Bear River Plan-EIS is unique because the federal funding contribution to construction exceeds \$25 million and Congress must approve the expenditures.

Matt Hubner commented the more work that is done before the NOI is published is extremely beneficial to meeting the two-year timeframe for completion.

VI. Next Steps

A. Public Scoping Meeting

Thursday, November 9th

6-8 p.m.

Box Elder County Fairgrounds/ Museum Building

Tremonton, Utah

All sponsors with proposed solutions will be discussing them with the public and what their vision is with the proposed solution.

B. Notice of Intent (NOI) to Prepare an EIS – Publication in Federal Register

C. Comment Period – Open until 30 days Following NOI Publication

D. Comment Review & Alternative Development

VII. Submitting a Comment

A. Submit written comments within 30 days of publication of Notice of Intent to prepare an EIS in the Federal Register.

B. Comment card @ Lower Bear River Public Scoping Meeting – November 9, 2023 (no virtual option).

C. Submit electronically to lowerbear@utwatershed.com

D. Mail to Lower Bear River Watershed Plan-EIS, 466 North 900 West Kaysville, Utah 84037.

VIII. Questions & Project Information:

A. Contact the Study Team at: 435-239-3467.

B. Email Derek Hamilton: derek.hamilton@usda.gov

C. Visit project website at www.bit.ly/LowerBearRiverWatershed.

J-U-B ENGINEERS, INC.

THE
LANGDON
GROUP

GATEWAY
MAPPING
INC.

J-U-B FAMILY OF COMPANIES

IX. Follow-Up Items

- A. Draft EIS will be sent to cooperating agencies for review before being submitted.**
- B. Public scoping meeting materials will be posted to the project website after the meeting.**

X. Next Meeting

- A. Meet with this group again in January after the purpose and need is clarified and discuss what was learned from the public scoping meeting and from submitted comments.**

Comments

1) Continue to explore pressurized secondary water system. Feasibility? Ultimately constructed to ease the demand on culinary water in a growing city.

2) Some flooding issues through NW area of city. Esp. in 2017 had major event. (Would need to get more info from city on specifics.)

Scoping Comments

	First Name	Last Name	Subject	Comment	Attachment
1	Charles	Holmgren	Central Canal Company	<p>Comments for the Lower Bear River Watershed Plan:</p> <p>I represent Central Canal Company which is the second largest diverter of water from Bear River Canal Company in Box Elder County Utah. We were of the understanding that we would be included in the proposed Watershed Plan but we see no evidence that we have been included. We have considerable needs and thought that we had applied through contact with the JUB Engineering application process. We wish to conserve water and improve safety to the canal that travels 5 miles from the diversion point in the Town of Elwood to the terminus back to Bear River Canal Company and/or the Malad River which in turn services the Bear River Bird Refuge and other wildlife habitat in Box Elder County Utah and then on to the Great Salt Lake. Thank you for reading our appeal.</p> <p>Charles Holmgren Secretary/Treasurer, Central Canal Company P O Box 231 Bear River City Utah 84301-0231 cwholm@frontiernet.net 435-279-3303</p>	
2	Dennis	Patterson	West Corinne Flooding	<p>Andy and Team</p> <p>Hope you're doing well.</p> <p>Thank you for sending the information.</p> <p>We are still in need of assistance to improve West Corinne Drainage because there are major constraints in the main drainage waterway.</p> <p>One update since we spoke last.</p> <p>Mr David Walker is impacted by flooding, he contacted friends of the Great Salt Lake for help.</p> <p>Friends of The Great Salt Lake replied that they had contacted Joel Ferry.</p> <p>He has knowledge of some of the flooding issues. Maybe he will help.</p> <p>Neighbor (Kurt Enright) called me recently and said he will be socializing the information and sending you a request.</p> <p>Please let me know if you have any questions or concerns.</p> <p>A recap of the situation is included below for your convenience.</p> <p>Thank you for all you do, please reply to this email before July 14 2024 for continuity, so I can ensure you received our information.</p> <p>Dennis</p>	<p>West Corinne flood mitigation</p> <p>Scope:</p> <p>Hundreds of people directly impacted in the West Corinne area.</p> <p>History:</p> <p>Over one hundred years ago the agriculture community of Appledale was created where West Corinne is now located. Fruit trees and other crops flourished for a short time until irrigation brought alkali and salt to the surface killing hopes, dreams and crops.</p> <p>The beet company along with engineers designed and built a drainage network to address flooding and poor drainage, work began in 1931 and finished in May 1939. Underground tile lines provide drainage for homes, fields etc... underground tile lines drain toward open drainage ditches. The largest drainage ditch (A ditch) ditch is approximately 5 miles long and drains into Appledale slough, it was enlarged significantly around 55 years ago to improve flow.</p> <p>Situation:</p> <p>The A drainage ditch maintenance has been neglected for around five or six decades! There are two exceptions.</p> <p>Exception one: Approximately ¼ mile section (5% of the ditch length) near the middle of the length of the A ditch was cleaned by a trackhoe around five years ago.</p> <p>Exception two: Two large trackhoes cleaned the upper portion (approximately 35%- 40% of length) the fall of 2023. One trackhoe removed a very large wooden vehicle bridge, an 18” culvert crossing and about forty trees before being stopped by land owner Steve Norman because he said he did not want anymore drainage ditch cleaning to occur until the drainage ditch was improved downstream from his home. Steve said the drainage ditch water during flood stage flows over the paved road near his home.</p> <p>Main problems that need to be corrected:</p> <p>Problem One: Over 145 invasive species Russian olive trees have invaded the ditch (40 removed fall of 2023) and they completely dominate in some sections, completely shading the water, the majority are tall and decades old, some trees have fallen across the ditch, tree trunks, limbs, roots, and leaves slow flow, many grow right up the center of the A ditch greatly slowing the flow (the A ditch flow was measured at two culverts spring of 2023 during flood stage, flow was less than ¼ of one foot per second as compared to the bear river canal on the same day at 4.2 feet per second.</p> <p>Problem Two: Culverts at paved roads are 36” and should be enlarged however, some farmer placed culverts at dirt</p>

	Dennis	Patterson	West Corinne Flooding		<p>One area of concern... Over ten land sections (640 Acres each) drain toward the crossing on 7600 North near Steve Normans home. All that water must flow through two 36” culverts and one has been 40% plugged most of the year by silt, cattails, etc...</p> <p>Note: Phragmites is now starting into the ditch.</p> <p>Action:</p> <p>For low cost when compared to other projects the West Corinne drainage can be GREATLY improved.</p> <p>Removal of approximately 100 more trees, this number might be slightly higher. Estimated cost of removal at today's prices... \$12,000, could be less costly.</p> <p>Enlarge as many culverts as possible starting on the lower end. About one dozen culverts are in the A ditch, estimated culvert crossing cost would vary however, for discussion purposes lets say \$2,700 per crossing. There are three paved road crossings, the cost would be higher due to pavement reconstruction. Some farmer crossings cost to replace might be lower.</p> <p>Maintain improvements and enact control measures for invasive species control.</p> <p>Result:</p> <p>Improved drainage for many people to homes, septic systems, businesses, roads, fields inside and outside of the floodplain.</p> <p>I sincerely believe the information above is accurate, if an error is found please let me know.</p> <p>Questions/concerns or comments regarding the above please contact,</p> <p>Dennis Patterson 435 695 7008.</p> <p>Will send photos.</p>
3	Matt	Knudson	Property Impacts	<p>Hello,</p> <p>We have a question regarding how this may impact our water supply. Our family owns property south of Forest Street and along both The Hammond Canal and The Black Slough. Will either of these sources be impacted by this project?</p> <p>Thank you,</p> <p>The Knudson Family Matt Knudson 801-979-9924 Bonnie Knudson 801-278-7889 Albert Knudson 801-518-5302</p>	
4	Kirt	Enright	West Corinne Flooding	<p>I have been informed through the grapevine that NRCS will not include any of the 14 undersized Appledale Drain Culverts that cause farmland and residential flooding will be included in this document. This includes 4 agricultural culverts and 2 culverts under the Bear River Canal system. One of which is highlighted in your document for complete piping.</p> <p>A 4th Flooding event occurred this February 2024. I had 4 1/4" rain between the Feb. 5th and 21st. The flooding came up to my basement door again. Benson Astle alfalfa fields (north of Hwy 83) were underwater again, also.</p> <p>Landowners have recently tried with their own time and money to fix part of the problem. The furthest west culvert crossing (Ferry/Yates) was updated to 2- 36" culverts. A trackhoe was rented and the ditch was cleaned from approx. 6000 west to 7100 west. a undersize culvert crossing (Singh) was purchased and installed by Patterson/Nelson/Astle. A trackhoe was hired (Stump) north of Hwy 83 to clean the drain ditch. The W. Corinne Drain Co. did not provide any money or manpower for the wok done. A comprehensive list of culverts /crossings and work completed since this proposed project was announced is attached.</p>	<p>2024 Appledale drain culvert issues</p> <p>1-North of Hwy 83. Davis Dairy road crossing undersized. Flooded Astle crop fields to the north and west every flood event. The ditch was dug out by Stump hiring a trackhoe</p> <p>2-Hwy 83 undersized culvert</p> <p>3-Historical railroad grade culvert</p> <p>4-Bear River Canal under crossing. This could easily be replaced when this project puts the lateral in 100% pipe.</p> <p>5-6400 west. Main problem area. Very undersized culvert. Patterson/nelson/astle hired a trackhoe and Nelson cleaned upstream and downstream ditch obstructions.</p> <p>6-Singh crossing. was undersized. Patterson bought 36” culvert and nelson picked it up from central utah and installed it.</p> <p>7-6800 west norman crossing. Undersized.</p> <p>8-Bear River Canal undercrossing undersized. Nelson cleared out the ditch to just west of here. Steve Norman stopped the removal of Russian olive trees in the ditch. He allowed the removal of some trees.</p> <p>9-norman/carter undersized crossing</p> <p>10-7600 west crossing. 2- 30-36” concrete culverts. One plugged with mud.</p> <p>11-Bear river club /ferry road crossing</p> <p>12-Yates/bear river club crossing. Ferry assisted with the purchase and install of 2 – 36” culverts.</p>

5	Intergovernmental Panel on Climate Change		Climate Change	<p>In terms of the scoping of issues for preparation of this DEIS, please consider how this proposed action and other feasible alternatives could help to respond to the already serious and rapidly worsening climate and extinction crises. These overlapping crises pose an existential threat to humanity and the biosphere (please review the attached IPCC report).</p> <p>There is overwhelming science on the urgent need to implement bold and innovative solutions. For example, how could fossil fuel use be avoided or minimized? How could clean, renewable energy sources be used? How could important wildlife habitats and sensitive species be better protected? How could water be more efficiently used, recycled, or allowed to recharge aquifers? How could the project be better designed and implemented to be resilient to climate change related droughts or more severe weather events? Where flooding has traditionally occurred, would it be cheaper to acquire those lands for riparian or wetland restoration instead of building expensive berms or diversions? How can we work with nature instead of always trying to fight it (and often losing)?</p> <p>In addition, please consider how this plan could increase water flows into the Great Salt Lake. I share the strong public concerns about maintaining the GSL ecosystem and the millions of migratory birds that depend on it for their survival.</p> <p>I hope that these scoping comments and questions are helpful. Thank you very much for this important work and for your kind consideration.</p>	Attachment: Climate Change IPCC 2023 Summary Report (A Report of the Intergovernmental Panel on Climate Change)
6	Anonymous		Smart Growth	<p>I recommend the preferred alternative be: Conservation through retreat, rewilding, degrowth, and population control. We multiplied and are now fruitless, waterless, and eventually lifeless if we do not live within our means and resources.</p> <p>The growth is unsustainable and we are experiencing shortages in energy, water, land and food. We need responsible government to redefine prosperity, and control runaway development.</p>	
7	Redge	Johnson	DNR, Public Lands Policy Coordinating Office	<p>By way of introduction, this comment letter begins with a brief description of the commenter’s mission and areas of expertise. Here, the commenter, PLPCO, is a State agency whose broad mission is “to coordinate, promote, and implement Utah’s public land priorities.” In addition to “develop[ing] and coordinat[ing] the State’s public lands policy initiatives” PLPCO is also involved in many different facets of public land management policy, including overseeing the State’s Resource Development Coordinating Committee (“RDCC”) which is “responsible for commenting on development and conservation proposals on Utah’s public lands” as well as assisting in resource management planning at the State and County levels.</p> <p>Because of PLPCO’s broad mission and expertise, the agency is involved in various issues and projects that involve (among other things) agriculture, grazing, forestry, energy development and transmission, and other multiple uses on federal lands.</p> <p>II.Purpose and Need</p> <p>The State understands that the primary purpose of the EIS is to evaluate alternative plans and management options to secure the agricultural water supply, develop secondary water systems for growing communities with limited water resources, reduce the potential for flood damage in previously flooded areas, improve wildlife habitat and enhance recreational opportunities for the community. Floodwater improvements, including piping and trenching to route flows, and ponds and control gates to detain and release flows, are needed to reduce damage to farms, homes, roadways, businesses, and industry. Improvements such as levee construction, sediment removal, delivery system automation, and bank stabilization are needed to reduce flooding, erosion, sediment, and agriculture-related pollution and enhance wetlands and wildlife habitat. Trails are anticipated along these levees to enhance recreational opportunities to bike or walk within areas of the watershed.</p> <p>III.Alternatives</p> <p>The State understands that three alternatives are being considered for analysis:</p> <p>Alternative 1—No Action Alternative: If the No Action Alternative is selected, the Hammond Main and West Canals will not be improved. Irrigators would likely have more periods without water as repairs would be needed to address periodic canal failures. Water shortages would lead to associated economic losses. Communities within the watershed may need to restrict growth as culinary water would continue being used for outdoor watering. Property owners would need to plan for periodic flooding of their properties and be prepared for the associated cleanup and repairs. Managers of waterfowl habitat areas would need to remove sediment from key water- holding areas periodically and would not be able to deliver water where it is needed in areas where levees are failing. The existing structures would continue to operate in their deteriorating condition and would not meet the purpose and need of agricultural water management improvement, flood prevention, watershed protection, or enhancement</p>	<p>RE: Lower Bear River Watershed Plan EIS</p> <p>Docket No. NRCS–2024–0011</p> <p>Dear Mr. Hamilton:</p> <p>The state of Utah (“State”), through its Public Lands Policy Coordinating Office “PLPCO”), has reviewed the Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for the Lower Bear River Watershed Project. The State understands that this project is co-sponsored by the Bear River Water Conservancy District and the Bear River Canal Company, with EIS funding via the Watershed Protection and Flood Prevention Act of 1954 (Pub. L. 83-566), as amended, and the Flood Control Act of 1944 (Pub. L. 78-534), with assistance from the USDA’s Natural Resources Conservation Service (“NRCS”).</p> <p>I. Utah’s Public Lands Policy Coordinating Office (PLPCO)</p> <p>By way of introduction, this comment letter begins with a brief description of the commenter’s mission and areas of expertise. Here, the commenter, PLPCO, is a State agency whose broad mission is “to coordinate, promote, and implement Utah’s public land priorities.”¹ In addition to “develop[ing] and coordinat[ing] the State’s public lands policy initiatives”² PLPCO is also involved in many different facets of public land management policy, including overseeing the State’s Resource Development Coordinating Committee (“RDCC”) which is “responsible for commenting on development and conservation proposals on Utah’s public lands”³ as well as assisting in resource management planning at the State and County levels. ⁴ Because of PLPCO’s broad mission and expertise, the agency is involved in various issues and projects that involve (among other things) agriculture, grazing, forestry, energy developmentand transmission, and other multiple uses on federal lands.</p> <p>II. Purpose and Need</p> <p>The State understands that the primary purpose of the EIS is to evaluate alternative plans and management options to secure the agricultural water supply, develop secondary water systems for growing communities with limited water resources, reduce the potential for flood damage in previously flooded areas, improve wildlife habitat and enhance recreational opportunities for the community. Floodwater improvements, including piping and trenching to route flows, and ponds and control gates to detain and release flows, are needed to reduce damage to farms, homes, roadways, businesses, and industry. Improvements such as levee construction, sediment removal, delivery system automation, and bank stabilization are needed to reduce flooding, erosion, sediment, and agriculture-related pollution and enhance wetlands and wildlife habitat. Trails are anticipated along these levees to enhance</p>

	Redge	Johnson	DNR, Public Lands Policy Coordinating Office		<p>III. Alternatives</p> <p>The State understands that three alternatives are being considered for analysis: Alternative 1—No Action Alternative: If the No Action Alternative is selected, the Hammond Main and West Canals will not be improved. Irrigators would likely have more periods without water as repairs would be needed to address periodic canal failures. Water shortages would lead to associated economic losses. Communities within the watershed may need to restrict growth as culinary water would continue being used for outdoor watering. Property owners would need to plan for periodic flooding of their properties and be prepared for the associated cleanup and repairs. Managers of waterfowl habitat areas would need to remove sediment from key water-holding areas periodically and would not be able to deliver water where it is needed in areas where levees are failing. The existing structures would continue to operate in their deteriorating condition and would not meet the purpose and need of agricultural water management improvement, flood prevention, watershed protection, or enhancement of recreational opportunities.</p> <p>Alternative 2—Proposed Action—Combine Canals Alternative. The proposed action would combine the Bear River Canal Company's Hammond Main Canal into the West Main Canal through the canyon below Cutler Reservoir to reduce the breach risk and improve delivery efficiencies. The West Canal would be improved by installing box culverts through the canyon and would require siphoning water across the Bear River. This alternative would also install automation and telemetry to existing irrigation canal head gates, pipe the Highland Ditch and other canals to improve water delivery near the ends of canals, construct agricultural water equalization ponds, and construct secondary water systems within the communities of Tremonton, Elwood, Bear River City, and Garland. Additionally, to address flood concerns, this alternative</p> <p>would install flood control channels and ponds around Tremonton, construct a flood control pond in the Bothwell Pocket, and improve a spillway along the Malad River. To protect the watershed by reducing floodwaters, erosion, and sediment, and improving habitat near the Great Salt Lake (GSL), the proposed action would improve levees, dikes, and banks along waterways near the GSL and the Bear River Migratory Bird Refuge and construct a sediment basin at Salt Creek. This alternative would also construct a recreational trail along the railway and an existing canal alignment through Tremonton to provide recreational opportunities.</p> <p>Alternative 3—Reasonable Alternative—Hammond Main and West Main Canal Improvement Alternative. The alternative would enclose the Bear River Canal Company's Hammond Main and West Main Canals through the canyon to reduce the breach risk and improve delivery efficiencies and would not require siphoning water across the Bear River.</p>
--	-------	---------	---	--	--

	Redge	Johnson	DNR, Public Lands Policy Coordinating Office		<p>Besides the Hammond Main and West Main Canal improvements and associated actions, the remainder of agricultural water improvements (i.e., automation and telemetry installation, Highland Ditch and other canal piping, secondary water systems construction, etc.) and all flood control, watershed protection, and recreation improvements would be the same as in Alternative 2. The State supports either of the action alternatives at this point and defers a commitment to Alternative 2 or 3 until further analysis is completed.</p> <p>IV. Consistency with the Box Elder County Resource Management Plan</p> <p>All counties in Utah have adopted County Resource Management Plans (CRMPs) to establish goals, objectives, and policies for the management of a wide variety of resources. The Box Elder County CRMP can be found on the county website at: https://www.boxeldercounty.org/planning/Page/county-plans. The State requests that the Lower Bear River Watershed Plan and associated projects be accomplished in a manner that is consistent with the CRMP to the greatest degree possible. Some relevant provisions of the county plan (and the associated plan Page number) include:</p> <p>“Box Elder County wishes to protect the economic viability of agricultural and closely associated livestock industries within the county through continued access to public lands for grazing. To support viability of these industries, vegetation on public lands should be managed to provide maximum sustainable production of forage for livestock, which is an important component of agriculture in the county. The county also desires that watersheds on public lands are managed to maximize water yields and water quality to meet present and future needs, including water for agriculture and livestock.” (See Page 4).</p> <p>“Coordinate with water resource management entities, especially water districts and canal companies, to ensure water supplies and water delivery infrastructure will meet growth needs.” (See Page 6).</p> <p>“Implement watershed protections and vegetation management to maintain availability of water for beneficial uses and to protect water quality.” (See Page 6).</p> <p>“Box Elder County desires to protect and improve existing and future water conveyance systems.” (See Page 23).</p> <p>“Seek funding for canal leakage study. Coordinate with agencies and water companies to protect existing water conveyance systems.” (See Page 24).</p> <p>“Box Elder County desires to promote a healthy hydrological system that encourages efficient flood control and water conveyance, while providing clean water, wildlife habitat, and recreational uses.” (See Page 42).</p>
--	-------	---------	---	--	---

	Redge	Johnson	DNR, Public Lands Policy Coordinating Office		<p>“Protect life and property from the increased risk of flooding through application of stream setbacks, FEMA flood zone requirements and careful review of development along streams and at the mouths of drainages on public lands.” See Page 42).</p> <p>“Box Elder County desires to protect its watersheds and water quality for the benefit of irrigation and other users downstream from public lands.” (See Page 48).</p> <p>“Support the development of community and regional recreational trail systems.” (See Page 83).</p> <p>“Support projects and management efforts that protect or restore riparian ecosystems, increasing the riparian area’s resiliency and ability to be used for multiple purposes.” (See Page 86).</p> <p>“Box Elder County desires to protect, maintain, and/or improve water quality and watersheds to provide stable and productive riparian and aquatic ecosystems on public lands and to protect the present and future water supply. The desires to review, study, and develop a water storage project in the western portion of the county.” (See Page 101).</p> <p>“Box Elder County desires to maintain healthy native wildlife populations. Residents enjoy participating in wildlife-related activities and feel that wildlife and wildlife habitat should be considered in future development decisions. The county desires to protect and enhance natural landscapes, ecosystems, and the biodiversity of the county to support healthy wildlife populations. The county desires to maintain and increase economic benefits derived from hunting and wildlife viewing. Conflicts between wildlife and other land use objectives may require mitigation.” (See Page 120).</p> <p>It appears that the action alternatives being proposed are very consistent with the goals and policies of the Box Elder CRMP.</p> <p>V. Consistency with the State Resource Management Plan</p> <p>The State has adopted a State Resource Management Plan (SRMP) to establish goals, objectives, and policies for the management of a wide variety of resources. The SRMP can be found on the PLPCO website at rmp.utah.gov. The State requests that the Lower Bear River Watershed Plan and associated projects be accomplished in a manner that is consistent with the SRMP to the greatest degree possible. Some relevant provisions of the state plan (and the associated plan Page number) include:</p> <ul style="list-style-type: none">• “Ensure that Utah’s water-use planning and management considers agriculture’s role within the entire social, economic, and natural systems landscape.” (See Page 16).
--	-------	---------	---	--	--

	Redge	Johnson	DNR, Public Lands Policy Coordinating Office		<ul style="list-style-type: none">• “Management and resource-use decisions by federal land management and regulatory agencies concerning Utah’s vegetative resources should reflect serious consideration of the proper optimization of the yield of water within the state’s watersheds.” (See Page 17).• “Support county plans for ditches and canals as well as irrigation. Preserve the integrity and functionality of Utah’s existing canals and ditches. Preserve the integrity and functionality of Utah’s irrigation companies, which manage and maintain the vast majority of the canals and ditches. Ensure adequate funding for canal infrastructure maintenance and replacement.” (See Pages 36 and 83).• “Encourage efficient water transport through the proper lining and piping of ditches and canals, as appropriate.” (See Page 37).• “Encourage the use of bio-engineering practices or flood structures, dams, catch basins, gully plugs, and reseeded grass ways to help reduce erosion during and after storm events.” (See Page 68).• “Prioritize and manage riparian areas to attain desired future conditions for riparian-related resources (e.g., fishery habitat, water quality, wildlife and livestock forage, and soil stability). (See Page 151).• “Support the use of structural and non-structural improvements in unstable water courses to restore riparian areas properly functioning/desired future conditions.” (See Page 151).• “Support a combination of active water management where necessary (e.g., Great Salt Lake) and maintaining or restoring natural hydrology when possible to support wildlife habitat and healthy functioning of aquatic ecosystems.” (See Page 175).• “Work with local governments and federal agencies to identify and conserve crucial wildlife habitat and migration corridors throughout Utah, including migratory bird stopover locations.” (See Page 187). <p>It appears that the action alternatives being proposed are very consistent with the goals and policies of the SRMP.</p> <p>Utah Division of Water Rights</p> <p>The EIS should address water rights and compliance with water rights regulations. The Division of Water Rights’ Northern region may be contacted at (435) 752-8755 for additional information.</p> <p>VI. Summary</p> <p>The cornerstone of proper management of this state’s resources is the coordination and cooperation between State and Federal agencies. Accordingly, I thank you for your consideration of the State’s comments. The State supports the Lower Bear River Watershed Project due to the benefits it will bring in terms of agricultural water management and provision of secondary water, flood mitigation, enhancements to wildlife habitat, and recreation opportunities.</p>
	Redge	Johnson	DNR, Public Lands Policy Coordinating Office		<p>The State looks forward to working with the NRCS as this project moves forward. Please direct any written correspondence to the Public Lands Policy Coordinating Office at the address below or call to discuss any questions or concerns.</p> <p>Sincerely,</p> <p>Redge B. Johnson</p> <p>Director</p>

8	Eve	Davies	Design, Operations (PacifiCorp)	<p>Dear Lower Bear River Watershed Plan Group-</p> <p>As a landowner in the Project Area and the supplier of the irrigation water in the Bear River Canal Company's (BRCC) irrigation system and manager of the Bear River system, PacifiCorp appreciates the opportunity to provide scoping comments on the Lower Bear Watershed Plan EIS. PacifiCorp owns the land underlying BRCC's East/Hammond and West canal intake gates, and these gates are an integral part of PacifiCorp's Cutler Hydroelectric Project Dam. The Cutler Project is regulated by the Federal Energy Regulatory Commission under FERC Project No. 2420 License. This Project is currently in the final stages of relicensing, and in fact has also just filed with FERC (document dated July 16, 2024) an Initial Consultation Document (ICD) exploring the feasibility of adding a pumped storage development to the existing Cutler Project. Given the potential for a high degree of construction activities in the near vicinity for both PacifiCorp and BRCC, and the lack of any specific detail regarding potential Cutler Project impacts, at this time, PacifiCorp is merely noting our interest in BRCC's proposed projects and the associated Watershed Plan EIS, and would ask to be involved at all levels as the watershed plan EIS and alternative development progresses. PacifiCorp has agreements with BRCC and other water users in the Bear River system that mandate water uses, timing, and responsibilities of the parties; further, as the Cutler Hydroelectric Project is operated, in part, to meet those delivery obligations, PacifiCorp notes that our requirements to manage and operate the Bear River system rely on the agreements and infrastructure potentially affected by the Lower Bear River Watershed Plan, and underline our request for cooperative information exchange with the EIS project proponents throughout the process. Thank you for the opportunity to provide these comments; please reach out to me or Jack Kolkman at jack.kolkman@pacificorp.com with any additional questions or comments.</p> <p>Eve</p> <p>Eve Davies, Principal Scientist and License Program Manager Renewable Resources, PacifiCorp 1407 West North Temple, Ste. 210 Salt Lake City, Utah 84116 801-220-2245 801-232-1704 (cell)</p>
