Arkansas NRCS • March 2025 State Conservationist Amanda Mathis amanda.mathis@usda.gov

FY24 TOTAL PROGRAM ACCOMPLISHMENTS

ACEP	\$ 9. 8M	2,153.3 AC	12 easements
CSP	\$63.6M	443,595.5AC	488 contracts
EQIP	\$101m	318,939.6 AC	1,965 contracts
RCPP	\$4.65M	13,241 AC	89contracts
EWP	\$2.31 M	<u> </u>	5 projects
TOTAL	\$181.4M	777,929.4 AC	2,559

Note: This graphic is based on contract obligations as listed below.

EQIP—Environmental Quality Incentives Program

ACE

Active Contracts: 4,963Acres: 917,309.9New Contracts: 1,965Acres: 318,939.6Active Contract Obligations:\$270,214,629

CSP-Conservation Stewardship Program

 Active Contracts: 1,686
 Acres: 1,381,841.17

 New Contracts: 488
 Acres: 443,595.5

 Active Contract Obligations:
 \$201,067,167

ACEP—Agricultural Conservation Easement Program

Easements: 12 Acres: 2,153.3 Obligations: \$9,821,743

RCPP—Regional Conservation Partnership Program

Contracts: 89 Obligations: \$4,658,904

Acres: 13,241.3

In FY24 Arkansas NRCS worked with more than 200 partners to help put conservation on the ground.

Ongoing Program Workload-Active Contracts, Easements

EQIP: 4,963 contracts CSP: 1,686 contracts ACEP/WRP: 764 easements

EQIP—Environmental Quality Incentives Program

SUB ACCOUNT	CONTRACTS	ACRES	OBLIGATIONS
Beginning Farmer/Rancher	4	992.2	\$616 K

Locally Led Work Groups Play Vital Role in Arkansas Conservation

Conservation efforts in Arkansas are most effective when they are driven by the people who know the land best – local farmers, ranchers, foresters, and community members. Locally led conservation empowers these stakeholders to guide natural resource management in a way that meets the needs of both the environment and the communities that depend on it.

At the heart of the process are Locally Led Work Groups (LLWG), which play a critical role in shaping NRCS conservation programs and ensures that resources are used efficiently and effectively. In Arkansas, the local conservation district provides leadership in convening and organizing the local work group in each county. The local work group is an important element of the locally led conservation way of doing business. Locally led work groups are a sub-committee of the State Technical Committee and include:

- Farmers
- Ranchers
- Industry representatives
- Tribal members
- Government officials
- Agency staff

The LLWG process helps NRCS get input at the ground level and align programs like Environmental Quality Incentives Program and the Conservation Stewardship Program with what's needed most by local producers, communities and others.

Across Arkansas farmers and ranchers are using NRCS programs to implement cover cropping and precision agriculture techniques that reduce soil erosion and improve water quality. These successes demonstrate the power of locally-led conservation. For more information, visit https:// www.nrcs.usda.gov/
