

ONLINE EVENT

**Prescribed Burning Design for
Technical Service Providers (TSP)**

March 21, 2025 | **9-11 a.m.**

A Prescribed Burning Design and Implementation Activity (DIA-160) is a site-specific plan that helps a participant with implementing their conservation plans by providing site-specific instructions, requirements, plans, or specifications on the land.

NRCS Technical Service Providers (TSPs) prepare these plans using inputs such as:

- Location of the burn unit
- Specifically required weather conditions
- Resource management objectives
- Smoke management plan
- Identification of burning methods
- Firing sequence
- Pre-burn preparation and post burn evaluation and management
- Contingency plan and identification of safety zones

Individuals, private businesses, American Indian tribes, non-profit organizations, and public agencies are eligible to become Technical Service Providers (TSPs).

**NRCS
Washington**

is hosting a **free** informational session on
**Prescribed
Burning Plans &
becoming a TSP.**
