Survey: Applicability Questions

Section: Applicability Question		
Question	Answer Choices	Points
Does at least one planned land unit (PLU) in the project area intersect the GLRI priority watersheds layer by 50 percent or more?	Yes, 50% or greater of at least one PLU is in the GLRI Priority Watershed	--
	Otherwise	--

Survey: Category Questions

Section: Category Question		
Question	Answer Choices	Points
Which GLRI priority watershed are the planned land units in?	Saginaw Bay	--
	Western Lake Erie Basin (WLEB)	--

Survey: Program Questions

Section: Program Questions		
Question	Answer Choices	Points
Is the application for developing a standalone conservation planning activity (CPA), design and implementation activity (DIA), conservation evaluation and monitoring activity (CEMA) or a combination of these?	YES	200
	NO	0
Is the treatment to be implemented using EQIP part of an Implementation Schedule or Farmstead/Cropping Improvement Action Plan that will assist in a farm becoming MAEAP verified, Wildlife Risk Mitigated or will result in Risk Reduction of a "high risk," as identified by one of the State of Michigan's "A*Syst" Tools?*	YES	40
	NO	0

Survey: Resource Questions

Section: Resource Questions		
Question	Answer Choices	Points
Is the application for developing a standalone conservation planning activity (CPA), design and implementation activity (DIA), conservation evaluation and monitoring activity (CEMA) or a combination of these?*	YES	200
	NO	0
Is the application located entirely within a GLRI phosphorus priority watershed?*	Yes	70
	Otherwise	0
Watershed impacts. Does the application include core conservation practices planned for phosphorus reduction within an existing state agency or other non-USDA water quality project area (Example: state or county watershed plan, non-governmental organization focus watershed) that addresses the same or similar watershed impairments (excess nutrients or sediment)?*	YES	25
	NO	0

Section: Resource Questions

Question	Answer Choices	Points
Collaborative efforts - Edge-of-field monitoring. Does the program application include core conservation practices planned for phosphorus reduction within a phosphorus priority watershed that has a joint NRCS-USGS edge-of-field and stream monitoring project in place (or scheduled to be in place) and located upstream of the stream gauge?*	YES	25
	NO	0
Soil health. Will the program application result in improved soil health by (select all that apply):*	Implementing residue management (329 or 345 or both for all crops) AND nutrient management (590) by placing nutrients below the surface or by implementing to a higher level of management to further reduce nutrient losses?	20
	Implementing cover crop (340) on acres not previously using this practice?	20
	Implementing grazing management (528) by converting row-cropped acres or acres with row crops in rotation to a permanent grazing system?	20
	None of the above.	0
