Consider the amount of waste generated under planned Animal Units. What percentage of the operation's waste is already adequately handled?*	0-50% of waste is adequately handled	10
	50-75% of waste is adequately handled	5
	75-100% of waste is adequately handled	-30
	Not Applicable	0
Livestock - What is the severity of the point source water contamination issue, to be addressed through planned practices? *	The issue is 0-100ft from a water source OR direct continuity to a water source	20
	The issue is 101-200 ft from a water source OR >20 AU's have water source access	15
	The issue is 201-300 ft from a water source OR 10-20 AU's have water source access	10
