

FINDING OF NO SIGNIFICANT IMPACT

Tri-Valley Watershed Plan (Supplement 1)

Wasatch County, Utah

September 2026

Unique Identification Number

SEAXX-005-53-049-1080697555

Agency Role and Responsibility

Lead Federal Agency: U.S. Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS)

Sponsoring Local Organizations: Wasatch County and Utah Department of Agriculture and Food

In accordance with USDA regulations (7 CFR Part 1b) implementing the National Environmental Policy Act (NEPA), NRCS has completed an environmental review of the Proposed Action associated with the Tri-Valley Watershed Plan (Supplement 1) in Wasatch County, Utah.

The Proposed Action is anticipated to be implemented in 2028 and would improve irrigation delivery efficiency for the Daniels Irrigation system. It includes installing 14,115 linear feet of new irrigation pipe, replacing/upsizing 7,810 linear feet of irrigation pipe, replacing 1,660 linear feet of asbestos cement pipe with PVC pipe, and abandoning 12,585 linear feet of asbestos cement pipe in place. It would also install a new interconnection to the Central Utah Water Conservancy District's pipeline with a valve vault to better control water delivery.

NRCS Decision to be Made

As the delegated NRCS Responsible Federal Official (RFO) for compliance with NEPA, I must make the following decision:

I must determine if the agency's Proposed Action (Daniel Irrigation Modified Alignment Alternative) will or will not be a major Federal action that requires the issuance of an Environmental Impact Statement. The Final Supplemental Tri-Valley Watershed Plan-Environmental Assessment (EA) has provided the analysis needed to assess the significance of the potential impacts from the selected alternative. As per NEPA, all supporting data leading to this decision is incorporated by reference and presented in the Final Supplemental Tri-Valley Watershed Plan-EA.

Conclusion

Based on the information incorporated by reference and presented in the Final Supplemental Tri-Valley Watershed Plan-EA, I find in accordance with NEPA, that the selection of the agency Proposed Action is not a major Federal action that will have a reasonably foreseeable significant affecting impact on the quality of the human environment requiring preparation of an Environmental Impact Statement. Thus, a Finding of No Significant Impact has been created for this Federal action.
