

# BUNDLES

## MRBI BUNDLE #6

### PASTURELAND

## CONSERVATION STEWARDSHIP PROGRAM

<b>B000MRB6</b>	<b>MRBI Bundle#6 - Pastureland</b>	<b>Addresses soil quality degradation, water quality degradation, and fish/wildlife inadequate habitat plus an option on soil erosion</b>
<i>Code</i>	<i>Enhancement Name</i>	<i>Description</i>
<b>DO ALL ENHANCMENTS IN THIS GROUP</b>		
E512106Z2	Forage plantings that can help increase organic matter in depleted soils	Establishing adapted and/or compatible species, varieties, or cultivars of herbaceous species suitable for pasture, hay, or biomass production that can help improve soil quality of depleted sites through increase or conservation of the organic matter in the soil.
E472118Z	Manage livestock access to streams, ditches, and other waterbodies to reduce nutrients in surface water	Installation of structures and implementation of grazing management actions that restrict livestock access to streams, ditches, and other waterbodies in order to reduce nutrient loading to surface waters.
<b>PICK ONE FROM THIS GROUP</b>		
E528105Z	Prescribed grazing that improves or maintains riparian and watershed function-erosion	Grazing management employed will provide cover and density needed in the watershed in order to reduce runoff, improve infiltration, provide for above ground water filtration and sustain applicable fish and wildlife species habitat.
E528118Z1	Prescribed grazing on pastureland that maintains/improves riparian and watershed function impairment from nutrients.	Grazing management employed will provide cover and density needed in the watershed in order to reduce runoff, improve infiltration, provide for above ground water filtration and sustain applicable fish and wildlife species habitat.
<b>PICK ONE FROM THIS GROUP</b>		
E390136Z	Increase riparian herbaceous cover width to enhance wildlife habitat	Where an existing herbaceous riparian buffer is located along a river, stream, pond, lake, or other waterbody, increase the diversity of native species, control invasive species, install fencing and relocate equipment operations, trails, and livestock, and increase the width of the buffer.
E391136Z	Increase riparian forest buffer width to enhance wildlife habitat	Where an existing riparian forest buffer is located along a river, stream, pond, lake, or other waterbody, increase the diversity of native species, control invasive species, install fencing and relocate equipment operations, trails, and livestock to increase the functional width of the buffer.
