

# MO 2017 EQIP-RCPP Restoring Glade and Woodland Communities for Threatened Species Environmental Quality Incentives Program Policy for the 2015 RCPP Project with Missouri Department of Conservation

Revised December 8, 2016

This Policy is based on the Final Rule for EQIP, Federal Register 7 CFR Part 1466 published May 12, 2016.

NRCS will verify Beginning Farmer, Limited Resource Farmer, and/or Veteran Farmer status prior to contract obligation. There is no verification process for participants who self certify as Socially Disadvantaged. All practices must meet the minimum criteria in the Conservation Practice Standard (see the Missouri eFOTG) and the criteria listed below.

If the applicant is a tenant, the applicant must obtain written evidence or assurance of control from the landowner prior to contract obligation. Control may be a written lease, other legal agreement, or letter signed by the landowner indicating the length of control. Zero payment share landowner signature on the contract document does not demonstrate control of land.

Payment Scenarios - Each conservation practice listed in this policy has one or more payment scenarios available. The scenario nomenclature is determined by NRCS at the regional or national level. Where the scenario name is not descriptive enough to cover all the State Conservationist and State Technical Committee approved uses of the scenario for Missouri, a footnote has been added directly below the scenario name to clarify its use in planning and contract development.

Management Practices - Management practice payments are only available on acres where the practice has not been previously applied (with or without financial assistance), or where the practice will result in a higher level of conservation benefit.

Structural Practices - Structural practices include conservation practices that are either structural or vegetative, and have a multi-year lifespan. Structural practices involve the establishment, construction, or installation of site-specific measures. Payments are established as a one-time payment. In addition to control of land, tenants must obtain and provide to NRCS prior to obligation written concurrence from the landowner to apply a structural or vegetative practice. In lieu of written concurrence, the landowner may be a signatory to the contract with 0% payment shares to indicate their concurrence.

Maximum Payments - Maximum payments, where identified in this policy, are implemented at the contract item (CIN) Level in ProTracts by using the Cost Share Cap input box. The contract may have multiple CINs for a practice, however each CIN must be capped utilizing the Cost Share Cap input box at the Maximum Payment level identified in this policy.

An additional 20% of the payment rate will be provided to participants by the Missouri Department of Conservation following the completion of practice implementation.

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
472	<b>Access Control</b> <i>Structural</i>	\$5,000	\$7,000	Acre			10
	<b>Animal exclusion from sensitive areas</b>			Acre	\$33.29	\$39.95	
	<p>1 Payment is authorized to exclude livestock only if livestock currently have access to the area to be excluded at the time of EQIP application. An EQIP funded Permanent Fence (382) is required in conjunction with this practice.</p> <p>2 Payment is based on the number of acres protected from livestock.</p> <p>3 See the (472) Access Control conservation practice standard.</p>						
314	<b>Brush Management</b> <i>Structural</i>	\$5,000	\$7,000	Acre			10
	<b>Medium Brush Management</b> 10% - 39% undesirable woody canopy cover			Acre	\$61.18	\$73.41	
	<b>High Brush Management</b> 40% - 60% undesirable woody canopy cover			Acre	\$145.92	\$175.10	
	<b>Very High Brush Management</b> > 60% undesirable woody canopy cover			Acre	\$238.94	\$286.73	
	<p>1 This practice is authorized for the treatment of woody plants on all non-cropland areas (including those that are invasive, exotic and noxious).</p> <p>2 When applied on forestland, payment for this practice is only authorized when included as a planned practice in a Forest Management Plan approved prior to contract obligation (see FMP definition in footnote 2/).</p> <p>3 When addressing forest or wildlife resource concerns, grazing is not allowed on those acres during the practice lifespan unless the FMP prescribes biological control of invasive species with grazing animals.</p> <p>4 This practice is not to be used for conversion of woodlands or forests to grassland; such as the removal of woody vegetation to establish or re-establish grass cover (See IS-MO-314).</p> <p>5 Payment is not for site preparation activities for a new seeding or re-seeding, or maintenance/management of a new seeding or re-seeding. Where additional site preparation activities are needed for adequate seedbed prep a waiver can be requested from the State Office.</p> <p>6 Clipping/mowing as a stand alone treatment is not authorized for payment</p> <p>7 Practice is not authorized for payment on the same acres as (649) Structures for Wildlife.</p> <p>8 See the (314) Brush Management conservation practice standard and Information Sheet IS-MO-314.</p>						

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
---------------	-----------------------	-----------------	--------------------	--------------------------------	--------------	--------------------	------------------

327	<b>Conservation Cover Structural</b>			Acre			5
-----	--------------------------------------	--	--	------	--	--	---

	<b>Introduced with Foregone Income</b>			Acre	\$411.53	\$493.84	
--	--	--	--	------	----------	----------	--

*Introduced grass is only eligible in association with a perennial green browse plot.*

	<b>Native Species with Foregone Income</b>			Acre	\$453.72	\$544.46	
--	--	--	--	------	----------	----------	--

	<b>Pollinator Species with Foregone Income</b>			Acre	\$670.87	\$805.04	
--	--	--	--	------	----------	----------	--

*Scenario is applicable to pollinator habitat and prairie restorations. For prairie restorations, payment is only authorized where the Ecological Site Description indicates a prairie, and is restored as specified within the 643 Restoration and Management of Rare and Declining Habitats conservation practice standard.*

	<b>Monarch Species Mix</b>			Acre	\$673.36	\$808.04	
--	----------------------------	--	--	------	----------	----------	--

	<b>Monarch Species Mix - Interseeding</b>			Acre	\$226.73	\$272.07	
--	---	--	--	------	----------	----------	--

- 1 Payment is authorized for the establishment and maintenance of permanent vegetative cover on land not utilized for forage production.
- 2 Payment includes site preparation equivalent to two activities or passes (spraying, disking, mowing, burning, etc). Where additional site preparation activities are needed through 314, 315 or 338 for adequate seedbed prep a waiver can be requested from the State Office.
- 3 Only one scenario is applicable per acre (i.e., multiple options such as native species and pollinator species cannot be stacked on the same acre).
- 4 Refer to the (645) Upland Wildlife Habitat Management conservation practice standard for the Pollinator Species and Monarch Species scenarios.
- 5 See the (327) Conservation Cover conservation practice standard and (723) Vegetation Establishment, Herbaceous Seeding Specification

340	<b>Cover Crop Management</b>	\$5,000	\$6,000	Acre			1
-----	------------------------------	---------	---------	------	--	--	---

	<b>Cover Crop - Basic and organic/non-organic</b>			Acre	\$62.84	\$75.40	
--	---	--	--	------	---------	---------	--

- 1 Practice is only eligible for payment in the karst zone in Perry County.
- 2 Practice is only authorized for one payment per acre within the contract period.
- 3 Payment is not authorized for crops harvested for grain, seed or hay.
- 4 No more than three separate management practices may be combined per acre.
- 5 See the (340) Cover Crop conservation practice standard.

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
342	<b>Critical Area Planting</b>						
	<i>Structural</i>			Acre			10
	<b>Vegetation-normal tillage (Organic and Non-Organic)</b>			Acre	\$139.76	\$167.71	
	<ol style="list-style-type: none"> <li>1 Only herbaceous species with a Good or Excellent wildlife habitat rating in Table 1 - Vegetation Establishment Herbaceous Seeding (723) are eligible for payment.</li> <li>2 See the (342) Critical Area Planting conservation practice standard and (723) Vegetation Establishment, Herbaceous Seeding Specification.</li> </ol>						
647	<b>Early Successional Habitat Development and Management</b>						
	<i>Management</i>			Acre			1
	<b>Disking</b>			Acre	\$74.33	\$89.20	
	<b>Mowing and Heavy Disking</b>			Acre	\$167.27	\$200.73	
	<i>Scenario is applicable to brush hog plus multiple disk passes.</i>						
	<ol style="list-style-type: none"> <li>1 Practice is only authorized for one payment per acre within the contract period.</li> <li>2 No more than three separate management practices may be combined per acre.</li> <li>3 See the (647) Early Successional Habitat Development and Management conservation practice standard</li> </ol>						
382	<b>Fence</b>						
	<i>Structural</i>			Feet			20
	<b>Permanent High Tensile Electric Single Strand</b>			Foot	\$0.78	\$0.94	
	<b>Permanent High Tensile Electric 2-3 Strand</b>			Foot	\$1.15	\$1.38	
	<i>Scenario is applicable to all multi-strand high tensile electric fence installations, and small ruminant electrified woven wire fence products.</i>						
	<b>Permanent Barbed Wire Multi Strand</b>			Foot	\$1.59	\$1.90	
	<ol style="list-style-type: none"> <li>1 This practice is only authorized as a component of (472) Access Control, (410) Grade Stabilization Structure to exclude livestock from areas that need protection.</li> <li>2 Only one Fence payment can be earned for each length/reach of fence (i.e., multiple options can not be stacked on the same running length/reach of fence).</li> <li>3 See the (382) Fence conservation practice standard.</li> </ol>						

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
386	<b>Field Border</b> <i>Structural</i>			Acre			10
	Field Border, Native Species, Foregone Income			Acre	\$405.03	\$486.04	
	Field Border, Pollinator, Foregone Income			Acre	\$448.07	\$537.69	
	<p>1 Payment includes vegetation establishment. Payment is not available for natural regeneration.</p> <p>2 Payment includes site preparation equivalent to two activities or passes (spraying, disking, mowing, burning, etc). Where additional site preparation activities are needed through 314, 315 or 338 for adequate seedbed prep a waiver can be requested from the State Office.</p> <p>3 Only one scenario is applicable per acre (i.e., multiple options such as native species and pollinator cannot be stacked on the same acre).</p> <p>4 Refer to the (645) Upland Wildlife Habitat Management conservation practice standard for the Pollinator option.</p> <p>5 See the (386) Field Border conservation practice standard and (723) Vegetation Establishment, Herbaceous Seeding Specification</p>						
394	<b>Firebreak</b> <i>Structural</i>			Feet			5
	Constructed - Handline			Foot	\$0.08	\$0.10	
	Constructed - Light Equipment <i>Disking or equivalent</i>			Foot	\$0.04	\$0.05	
	Constructed - Medium equipment, flat-medium slopes <i>Small dozer or equivalent. Scenario is applicable to all slope types.</i>			Foot	\$0.27	\$0.32	
	<b>Vegetated permanent firebreak</b> <i>Payment includes vegetation establishment.</i>			Foot	\$0.12	\$0.14	
	<p>1 Payment is only authorized in conjunction with (338) Prescribed Burning.</p> <p>2 See the (394) Firebreak conservation practice standard</p>						
512	<b>Forage and Biomass Planting</b> <i>Structural</i>	\$28,500	\$40,000	Acre			5
	<b>Native Grass Establishment or Renovation - with fertility</b> <i>Scenario is applicable to any native grass establishment or renovation regardless of fertility requirements (follow standards and specifications for soil test and fertility requirements).</i>			Acre	\$329.83	\$395.80	
	<p>1 Payment is not authorized for the conversion of native prairie or woodland to pasture or hayland.</p> <p>2 See the (512) Forage and Biomass Planting conservation practice standard and (723) Vegetation Establishment, Herbaceous Seeding Specification</p>						

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
---------------	-----------------------	-----------------	--------------------	--------------------------------	--------------	--------------------	------------------

666	<b>Forest Stand Improvement</b> <i>Structural</i>	\$14,000	\$20,000	Acre			10
	<b>Forest Stand Improvement, Light</b> <i>Reduce basal area by 20-29 sq ft/ac, or kill 100 to 199 trees/ac, or release 20-40 crop trees/ac.</i>			Acre	\$89.25	\$107.10	
	<b>Forest Stand Improvement, Medium</b> <i>Reduce basal area by 30-40 sq ft/ac, or kill 200 to 400 trees/ac, or release 41-60 crop trees/ac.</i>			Acre	\$109.51	\$131.41	
	<b>Forest Stand Improvement, Heavy</b> <i>Reduce basal area by &gt; 40 sq ft/ac, or kill &gt; 400 trees/ac, or release &gt;60 crop trees/ac.</i>			Acre	\$138.50	\$166.20	
	<b>Temporary Forest Openings, patch clearcuts</b> <i>Refer to the Temporary Forest Openings Job Sheet.</i>			Acre	\$158.61	\$190.33	

- 1 Payment for this practice is only authorized when included as a planned practice in a Forest Management Plan approved prior to contract obligation (see FMP definition in footnote 2/), and when planned according to the Additional Criteria and Considerations for Wildlife.
- 2 Payment is not authorized if forest products are removed commercially (timber, posts, or fuel wood) with forest stand improvement work.
- 3 Payment for FSI may be used either before or after a commercial harvest to treat the stand.
- 4 See the (666) Forest Stand Improvement conservation practice standard.

655	<b>Forest Trails and Landings</b> <i>Structural</i>			Acre			5
	<b>Shaping and Grading</b>			Foot	\$0.37	\$0.44	
	<b>Shaping and Grading with Vegetation Establishment</b> <i>Payment includes vegetation establishment.</i>			Foot	\$0.54	\$0.64	
	<b>Water Bar Installation</b> <i>Payment includes shaping and grading.</i>			Each	\$47.36	\$56.84	
	<b>Temporary Stream Crossing</b>			Each	\$645.91	\$775.10	
	<b>Log Landing Shaping and Grading with Vegetation Establishment</b> <i>Payment includes vegetation establishment.</i>			Acre	\$1,299.38	\$1,559.26	

- 1 Payment for this practice is only authorized when included as a planned practice in a Forest Management Plan approved prior to contract obligation (see FMP definition in footnote 2/).
- 2 Eligible acres for this practice are limited to existing trails/landings needing treatment to address documented resource concerns, or as recommended according to a current forest harvest plan prepared by a professional forester as an addendum to the FMP.
- 3 See the (655) Forest Trails and Landings conservation practice standard.

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
---------------	-----------------------	-----------------	--------------------	--------------------------------	--------------	--------------------	------------------

410	<b>Grade Stabilization Structure</b>	\$10,000	\$13,000	Number			15						
	<i>Structural</i>												
	<b>Embankment 8in-12in Pipe</b>							Cu Yd Fill	\$3.42	\$4.11			
	<i>Scenario is applicable to any pipe size needed to meet standards and specifications</i>												
	<b>Pipe Drop, Smooth Steel or CMP</b>							Sq Ft	\$9.96	\$11.95			
	<i>Full Flow Drop Pipe Structure. Payment unit is riser weir length * barrel length.</i>												
	<b>Concrete Block Chute</b>							Sq Ft	\$7.45	\$8.94			
	<i>Payment unit is concrete block lined area</i>												
	<b>Rock Rip Rap Chute</b>			Cu Yd Rock	\$52.73	\$63.27							
	<b>Concrete Drop Structure</b>			Cu Yd Conc	\$627.05	\$752.47							
	<b>Gabion Chute</b>			Cu Yd	\$229.99	\$275.99							
	<b>Geotextile Reinforced Vegetated Outlet</b>			Sq Ft	\$2.01	\$2.42							

- 1 Practice is only eligible for payment in the karst zone in Perry County.
- 2 Payment is authorized when it is the least-cost method for an outlet in conjunction with a (412) Grassed Waterway conservation practice, and the waterway was previously installed or is included in this EQIP application.
- 3 See the (410) Grade Stabilization Structure conservation practice standard.

412	<b>Grassed Waterway</b>			Acre			10						
	<i>Structural</i>												
	<b>35-55 foot topwidth</b>							Acre	\$2,559.28	\$3,071.14			
	<i>Scenario is applicable to any waterway ≤ 55 feet wide</i>												
	<b>35-55 foot topwidth with checks</b>							Acre	\$3,396.07	\$4,075.28			
<i>Scenario is applicable to any waterway ≤ 55 feet wide</i>													
	<b>&gt;55 foot topwidth</b>			Acre	\$3,109.61	\$3,731.53							
	<b>&gt;55 foot topwidth with checks</b>			Acre	\$3,899.40	\$4,679.28							

- 1 Practice is only eligible for payment in the karst zone in Perry County.
- 2 Payment includes vegetation establishment. Do not contract Critical Area Planting (342) in conjunction with this practice. Payment does not include (484) Mulching.
- 3 See the (412) Grassed Waterway conservation practice standard.

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
---------------	-----------------------	-----------------	--------------------	--------------------------------	--------------	--------------------	------------------

315	<b>Herbaceous Weed Control</b>	\$5,000	\$7,000				5		
	<i>Structural</i>								
	<b>Light Spot Treatment</b>					Acre		\$23.88	\$28.65
	<i>≤ 10% undesirable herbaceous cover</i>								
	<b>Medium Spot Treatments</b>					Acre		\$69.00	\$82.80
	<i>&gt; 10% undesirable herbaceous cover</i>								
	<b>Blanket Treatment One Pass</b>			Acre	\$47.05	\$56.46			
	<b>Blanket Treatment Multi Pass</b>			Acre	\$102.30	\$122.76			
	<b>Tree &amp; Shrub Post-planting Weed Control</b>			Acre	\$105.04	\$126.04			

- 1 This practice is authorized for the treatment of herbaceous plants, including those that are invasive, exotic and noxious on all non-cropland areas.*
- 2 This practice is not to be utilized for forage production.*
- 3 Payment is not for site preparation activities for a new seeding or re-seeding, or maintenance/management of a new seeding or re-seeding. Where additional site preparation activities are needed for adequate seedbed prep a waiver can be requested from the State Office.*
- 4 See the (315) Herbaceous Weed Control conservation practice standard.*

484	<b>Mulching</b>						1
	<i>Management</i>			Acre			
	<b>Natural Material, Vegetation Establishment</b>			Acre	\$242.96	\$291.56	
	<b>Natural Material, Soil Moisture Management</b>			Acre	\$318.18	\$381.82	
	<b>Synthetic Material, Soil Moisture Management</b>			Acre	\$1,291.11	\$1,549.34	
	<b>Tree and Shrub, Individual Treatment, Soil Moisture Management</b>			Each	\$1.80	\$2.16	
	<i>Use this scenario when trees/shrubs will be mulched individually rather than in a continuous mulched row. Otherwise use the appropriate per acre soil moisture management mulching option.</i>						

- 1 Practice is only authorized for one payment per acre within the contract period.*
- 2 See the (484) Mulching conservation practice standard.*

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
338	<b>Prescribed Burning Management</b>			Acre			1
	Grassland, > 10 acres			Acre	\$23.39	\$28.07	
	Grassland, Small acreage (<=10 acres)			Acre	\$29.35	\$35.22	
	Woodland, >10 acres			Acre	\$61.56	\$73.87	
	Woodland, Small acreage (<=10 acres)			Acre	\$88.69	\$106.43	

1 Practice is only authorized for one payment per acre within the contract period.

2 Payment is not for site preparation activities for a new seeding or re-seeding, or maintenance/management of a new seeding or re-seeding. Where additional site preparation activities are needed for adequate seedbed prep a waiver can be requested from the State Office.

3 See the (338) Prescribed Burning conservation practice standard.

---------------	-----------------------	-----------------	--------------------	--------------------------------	--------------	--------------------	------------------

### Footnotes and Acronym Information

- 1/ HU Payment Rate refers to the payment rate for Historically Underserved Farmers (Limited Resource Farmers, Beginning Farmers, Socially Disadvantaged Farmers, and Veteran Farmers who also qualify as Beginning Farmers).
- 2/ FMP = Forest Management Plan. Approved FMP's are any plans written by NRCS, Technical Service Providers, or partners that meet the Forest Management Plan Criteria for Practice/Activity Code 106 found in Section III of the Missouri eFOTG.

This Program Policy is approved for use in Missouri
