This template should be used in association with the landowner and the forester guides which include detailed instructions on how to correctly complete the template to develop a management plan that will meet the requirements for the American Tree Farm System (ATFS), Natural Resources Conservation Service (NRCS) and the US Forest Service. Please refer to the guide when working with your forester or natural resource professional to develop your plan.

This template was developed by the US Forest Service, Natural Resources Conservation Service (NRCS), and the American Forest Foundation's American Tree Farm System (ATFS) using information from the following state joint Forest Stewardship, ATFS and NRCS templates:

- Mississippi Forest Stewardship Management Plan developed by the Mississippi Stewardship Forest, Mississippi Forestry Commission and the US Forest Service
- Missouri Common Forest Plan Format developed by the Missouri Department of Conservation and NRCS
- Montana Forest Stewardship Plan/Tree Farm Plan developed by the Montana Forest Stewardship Program, Montana Tree Farm Program, Montana State University Extension, Montana DNRC, US Forest Service and NRCS
- Oregon Forest Stewardship Plan Template developed by Oregon State University Forestry Extension Program

Forest Natural Resources Enhancement and Protection

This section relates to the natural resource elements found **throughout the entire property**. Some of the treatments related to these resources may qualify for federal and state assistance programs. For this section, include appropriate activities and treatments in the Management Activity Schedule and Tracking table as well as on the map(s). Complete the Activity Schedule and draw and label the areas of management on the map if using this plan as part of an assistance program application. There is no need to repeat this information in the stand specific section.

For each resource element, consider:

1. *What treatments/monitoring/protection are planned?*
2. *When will you implement treatments (season, year), follow-up activities, etc?*
3. *Where will the management take place: entire stand, part of a stand, acres?*
4. *Do you have applicable permits, professional assistance, and applications for the assistance programs?*
