

**CONSERVATION ENHANCEMENT ACTIVITY**

**E528133Z1**

**CONSERVATION STEWARDSHIP PROGRAM**

Stockpiling cool season forage to improve structure and composition

**Conservation Practice 528: Prescribed Grazing**

**APPLICABLE LAND USE: Pasture; Associated Agricultural Land**

**RESOURCE CONCERN ADDRESSED: Degraded Plant Condition**

**ENHANCEMENT LIFE SPAN: 1 year**

**Enhancement Description**

Grazing management employed will stop grazing events of selected paddock(s) to allow pasture forages to grow to maximum vegetative biomass accumulation before the end of the growing season.

**Criteria**

Additions to the current Prescribed Grazing Plan must include:

- A record of designated paddocks and acreages to exclude grazing for a stated specified time period.
- The acreage needed for stockpiled forage will be predetermined.
- Stockpiled acreage will be supplied nutrients according to a land grant university approved soil test to achieve adequate forage growth at the beginning of the stockpiling period.
- Stockpile will be grazed in a manner that maintains specified minimum forage heights in the grazing plan to avoid damage to soil or forage.
- Do not allow livestock to access previously grazed stockpiled areas when spring regrowth begins until recommended forage heights exist.

## CONSERVATION STEWARDSHIP PROGRAM

- The NRCS Conservation Practice Standard Prescribed Grazing (Code 528) must be followed on all pasture each year this enhancement is in effect. Note - leaving recommended residual forage heights, even though plants are dormant, are needed for erosion control and wildlife.
- Certification recorded that practice requirements have been met after grazing of stockpiled forages is complete before the new growing season begins.

**Documentation and Implementation Requirements**

**CONSERVATION  
STEWARDSHIP  
PROGRAM**

Participant will:

- Prior to implementation, develop a prescribed grazing plan including a plan map that delineates where forage stockpiling will occur. Make these materials available to NRCS for review.
- After implementation, make grazing records and photo documentation of stockpiling and level of use available to NRCS.

NRCS will:

- Prior to implementation, review grazing plan and maps provided by participant.
- During implementation, as requested, assist the participant with adapting the grazing strategy and plan to current conditions.
- After implementation, review records and photos provide to confirm adequate stockpiling and acceptable levels of grazing use.

**NRCS Documentation Review:**

I have reviewed all required participant documentation and have determined the participant has implemented the enhancement and met all criteria and requirements.
