

7. Will the producer improve wildlife habitat for T&E species or species of concern by adopting one of the following conservation activity options?

- a. Producer will adopt at least one wildlife bundle
- b. Producer will adopt at least two individual wildlife conservation activities
- c. Producer will adopt one wildlife conservation activity

8. Will the producer improve the resource concern Soil Quality Degradation to address soil health by adopting one of the following conservation activity options?

- a. Producer will adopt at least one soil health bundle
- b. Producer will adopt at least two individual soil quality degradation conservation activities
- c. Producer will adopt one soil quality degradation conservation activity

State Issue Questions

1. Using the CAET Summary Report completed for this application, identify the one land use (Crop, Pasture, Range, or Forest) with the smallest number of targeted resource concerns met at the time of application. Choose the response that is the best match. Note: Associated Ag Land and Farmstead land uses are excluded from consideration.

- a. All five targeted resource concerns are met.
- b. Four targeted resource concerns are met.
- c. Three targeted resource concerns are met.
- d. Two targeted resource concerns are met.
- e. One targeted resource concerns are met.
- f. No targeted resource concern is met.

2. Using the CAET Summary Report completed for this application, identify the one land use (Crop, Pasture, Range, or Forest) with the smallest number of targeted resource concerns met by the end of the contract period. Choose the response that is the best match. Note: Associated Ag Land and Farmstead land uses are excluded from consideration.

- a. All five targeted resource concerns will be met.
- b. Four targeted resource concerns will be met.
- c. Three targeted resource concerns will be met.
- d. Two targeted resource concerns will be met.
- e. One targeted resource concerns will be met.
- f. No targeted resource concerns will be met.

3. Using the CAET Summary Report, identify the one land use (Crop, Pasture, Range, or Forest) with the smallest number of non-targeted resource concerns met by the end of the contract period. Choose the response that is the best match.

- a. All five non-targeted resource concerns will be met.
- b. Four non-targeted resource concerns will be met.
- c. Three non-targeted resource concerns will be met.

d. Two non-targeted resource concerns will be met.
e. One non-targeted resource concerns will be met.
f. No non-targeted resource concerns will be met.
4. <i>If the majority of the land (51% or greater) in the contract offer is within a State designated priority sub-geographic area of the designated fund pool (see delineated areas supplied by the State), answer question 4. Otherwise skip to the next question.</i> Using the CAET Summary Report, how many out of all ten resource concerns will be met by the end of the contract in the priority area (add up the total number of unique resource concerns met across all land uses in the application; only count a resource concern one time even if the same resource concern is met across multiple land uses in the application)?
a. 10 resource concerns are met. If applicant's only land use is range, 8 resource concerns are met.
b. 8-9 resource concerns will be met. If applicant's only land use is range, do not select this response.
c. 6-7 resource concerns will be met.
d. 4-5 resource concerns will be met.
e. 2-3 resource concerns will be met.
f. 0-1 resource concerns will be met.
g. The majority of the land is NOT in a state designated priority sub-geographic area.
5. <i>If the majority of the land (51% or greater) in the contract offer is within an airshed targeted for air quality improvement efforts (see delineated areas supplied by the State), answer question 5. Otherwise skip to the next question.</i> Using the CAET Summary Report, how many of the 9 remaining resource concerns will be met by the end of the contract in addition to air quality (add up the total number of unique resource concerns met across all land uses in the application; only count a resource concern one time even if the same resource concern is met across multiple land uses in the application)?
a. 9 resource concerns are met. If applicant's only land use is range, 7 resource concerns are met.
b. 7-8 resource concerns are met. If applicant's only land use is range, do not select this response.
c. 5-6 resource concerns are met.
d. 3-4 resource concerns are met.
e. 1-2 resource concerns are met.
f. The majority of the land is NOT in a state designated priority airshed for air quality improvement.
6. <i>If the majority of the land (51% or greater) in the contract offer is within a watershed targeted for water quality improvement efforts (see delineated areas supplied by the State), answer question 6. Otherwise skip to the next question.</i> Using the CAET Summary Report, how many of the 9 remaining resource concerns will be met by the end of the contract in addition to water quality (add up the total number of unique resource concerns met across all land uses in the application; only count a resource concern one time even if the same resource concern is met across multiple land uses in the application)?
a. 9 resource concerns are met. If applicant's only land use is range, 7 resource concerns are met.
b. 7-8 resource concerns are met. If applicant's only land use is range, do not select this response.
c. 5-6 resource concerns are met.
d. 3-4 resource concerns are met.
e. 1-2 resource concerns are met.
f. The majority of the land is NOT in a state designated priority watershed for water quality improvement.
