

CONSERVATION ENHANCEMENT ACTIVITY

E528132Z2 - Colorado

CONSERVATION STEWARDSHIP PROGRAM

Stockpiling cool season forage to improve plant productivity and health

Conservation Practice 528: Prescribed Grazing

APPLICABLE LAND USE: Pasture; Associated Agricultural Land

RESOURCE CONCERN ADDRESSED: Degraded Plant Condition

ENHANCEMENT LIFE SPAN: 1 year

Enhancement Description

Grazing management employed will stop grazing events of selected paddock(s) to allow pasture forages to grow to maximum vegetative biomass accumulation before the end of the growing season.

Criteria

Additions to the current Prescribed Grazing Plan must include:

- A record of the pastures (or paddocks) and the acreage of each, where forage will be stockpiled.
- The acreage needed for stockpiled forage will be predetermined.
- Stockpiled area will be fertilized at the beginning of the stockpiling period, according to a land grant university approved soil test, to achieve adequate forage growth.
- Stockpile will be grazed in a manner that maintains specified minimum forage heights in the grazing plan to avoid damage to soil or forage.
- Do not allow livestock to access previously grazed stockpiled areas when spring regrowth begins until recommended forage heights exist.

CONSERVATION STEWARDSHIP PROGRAM

- The NRCS Conservation Practice Standard Prescribed Grazing (Code 528) must be followed on all pastures each year this enhancement is in effect. Note - leaving recommended residual forage heights, even though plants are dormant, are needed for erosion control and wildlife.
- Certification recorded that practice requirements have been met after grazing of stockpiled forages is complete before the new growing season begins.

CONSERVATION STEWARDSHIP PROGRAM

Documentation and Implementation Requirements

Participant will:

- Prior to implementation, obtain a prescribed grazing plan including a plan map that delineates where forage stockpiling will occur. Make these materials available to NRCS for review.
- During implementation, keep pasture/herd in/out records.
- After implementation, make grazing records and photo documentation of stockpiling and level of use available to NRCS.

NRCS will:

- Prior to implementation, review grazing plan and maps provided by participant.
- During implementation, as requested, assist the participant with adapting the grazing strategy and plan to current conditions.
- After implementation, review records and photos provide to confirm adequate stockpiling and acceptable levels of grazing use.

NRCS Documentation Review:

I have reviewed all required participant documentation and have determined the participant has implemented the enhancement and met all criteria and requirements.
