NOTES:
1. ALL WOOD SHALL BE PRESSURE TREATED.
2. INSTALL WIRE PANELS WITH CLOSE SPACING AT THE TOP, AS SHOWN. USE A MINIMUM OF 4 NAILS AND/OR STAPLES PER POST FACE.
3. WHERE THE CONCRETE IS TO BE IN CONTACT WITH THE PIPE, WRAP IT WITH A STRIP OF HEAVY ROOFING FELT BEFORE THE CONCRETE IS POURED.
4. CUT BARS AROUND PIPE PROVIDING A MINIMUM OF 2" CLEARANCE.
5. THE MAXIMUM WATER LEVEL SHALL BE BELOW THE TOP OF THE TRASH RACK UNLESS A WIRE PANEL COVER IS PROVIDED.
