

Title 210 – National Engineering Manual
Part 505 – Non-NRCS Engineering Services
Subpart B – Use of Non-NRCS Engineering Resources

PIA505.11 Non-TSP Providers

It is NRCS policy in PIA to encourage the use of non-NRCS engineering services for planning and applying conservation measures, for individuals or groups who wish to use these services and where NRCS standards and specifications will be followed.

- (3) An NRCS employee with the appropriate engineering job approval authority must perform a functional review of the design documentation, drawings, and specifications to ensure, at a minimum, that the work:
 - a. Achieves the objectives of the plan and program.
 - b. Meets the criteria in the applicable conservation practice standards.
 - c. Includes all items required by the practice statement of work.
 - d. Complies with the applicable State and Federal programs.
