

Soil Your Undies Challenge

- Whether you're on crop, range, or forestland, the quick and dirty way to test your soil health is to soil your undies!
- Send photos of your "harvest" and info sheet to your local NRCS office or orinfo@nracs.usda.gov

1

- "Plant" a pair of new, cotton underwear horizontally about 3 inches deep in the site you're curious about. Don't forget to mark the spot you planted!

2

- Wait at least 60 days. This gives your soil microbes time to do their magic!

3

- Send us a photo and a little info about your operation to orinfo@nracs.usda.gov and we'll put your undies on the map!

they took the challenge... Are **YOU** Ready?

Eat my shorts!

- Healthy soil is full of microbes, and they're hungry for your undies!
- Put your undies on the map!
