

Watershed Rehabilitation Status June 2020

2020 Activities

\$10 million in discretionary funding and \$25 million was received through Farm Bill annual funding for rehabilitation. The \$10 million in discretionary funding is a continuance of the typical annual investment in the watershed rehabilitation program, which recognizes the critical role of these watershed structures in flood management, water supply, erosion control, agricultural productivity, recreation and wildlife habitat. This funding helps to repair aging infrastructure, create jobs and commerce, and protect homes and lives.

In 2020, NRCS continued to provide funding for assessments of high-hazard dams based on their risk index. The agency utilized \$1,184,000 to fund assessments for 51 dams in 6 states. Overall, dam assessments are completed for 1,569 dams.

Projects ready for construction and design received priority for funding in 2020. Funding of \$4.7 million for design was provided for 11 dams in 5 states; funding of \$13.8 million for construction was provided for 12 dams in 6 states; and funding of \$9.9 million was provided to complete 29 watershed plans and 15 new watershed plans in 18 states.

Plan Implem.: Plan is authorized, and the project is ready for or is being designed or is under construction.

* Funded with CCC funds authorized in the 2014 Farm Bill and FY 2015 Appropriations Act. There are multiple dams in some lines. These dams are in the same watershed, same county, and have the same status: Example: WV Brush Creek 9; 14; 15.
