**Livestock Shelter Structure (576)**

A permanent or portable structure to provide shelter for livestock from negative environmental factors.

- **D.1 (+) Protection from heat, wind, cold, or snow**
- **D.2 (+) Protect surface waters from nutrient and pathogen loading**
- **D.3 (+) Protect wooded areas from erosion and nutrient deposition**
- **D.4 (+) Improve grazing distribution**

**Initial setting:** Provide protection to livestock from negative environmental factors. Need to facilitate prescribed grazing. There is a need to remove animals from sensitive areas by providing a source of shade or shelter that is located away from the existing shade or shelter in wooded areas and on stream banks or depressions.

**Notes:**
Effects are qualified with a plus (+) or minus (-). These symbols indicate only an increase (+) or a decrease (-) in the effect upon the resource, not whether the effect is beneficial or adverse.

**LEGEND**
