

FY2021 EQIP Livestock

Livestock Applicability Question

1. Do practices in the application address resource concerns associated with livestock operations?

Livestock Category Question

1. Is the land included in the application, located primarily in the state of Massachusetts?
 - a. Massachusetts
 - b. Otherwise

Livestock Program Questions

1. Is the land included in the application located within the MA Source Water Protection Area?
 - a. Source Water Protection Area
 - b. Otherwise
2. Will this application implement practices identified in an approved CNMP?
3. Does the application include practices to address resource concerns associated with insufficient feed, forage, or stock water?
4. Will the proposed project address grazing improvements?
5. Are practices included in the application documented to address source water pollution from livestock waste?
6. Will this application facilitate local food production marketed within what specified radius from the operation?
 - a. Less than 50 miles
 - b. 50 to 100 miles
 - c. More than 100 miles
7. Do practices in the application benefit threatened and endangered, at-risk, candidate, or species of concern?
 - a. Federally listed species
 - b. State listed species
 - c. Species of Conservation Concern
 - d. Otherwise

Livestock Resource Questions

1. Will the proposed project improve the water quality of any of the following:
 - a. 303D listed waters (within ¼ mile buffer)
 - b. Drinking Water: Surface Water Zones A or B, Ground Water Zone 2, and/or IWPA (within areas)
 - c. Other Water (within 300 feet upstream from streams, surface water, designated shellfish growing areas, aquifers, wells)
 - d. Otherwise
2. Will practices included in the application reduce erosion and sediment from concentrated flows?
3. Does the application include a field border, filter strip, or riparian buffer to reduce contaminants from entering surface water?
4. Will practices included in the application restrict animal access to rivers, streams, and/or other water bodies?
5. Will the application implement prescribed grazing to adjust intensity, frequency, timing, and duration of grazing to meet the desired objectives of plant communities?
