

Additional computer set-up steps to perform before installing WinTR-55 Small Watershed Hydrology Version 1.00.10 for Windows 7

Before the installation of WinTR-55, the computer must be set to show hidden files, directories and drives. Instructions for Window 7 are shown below.

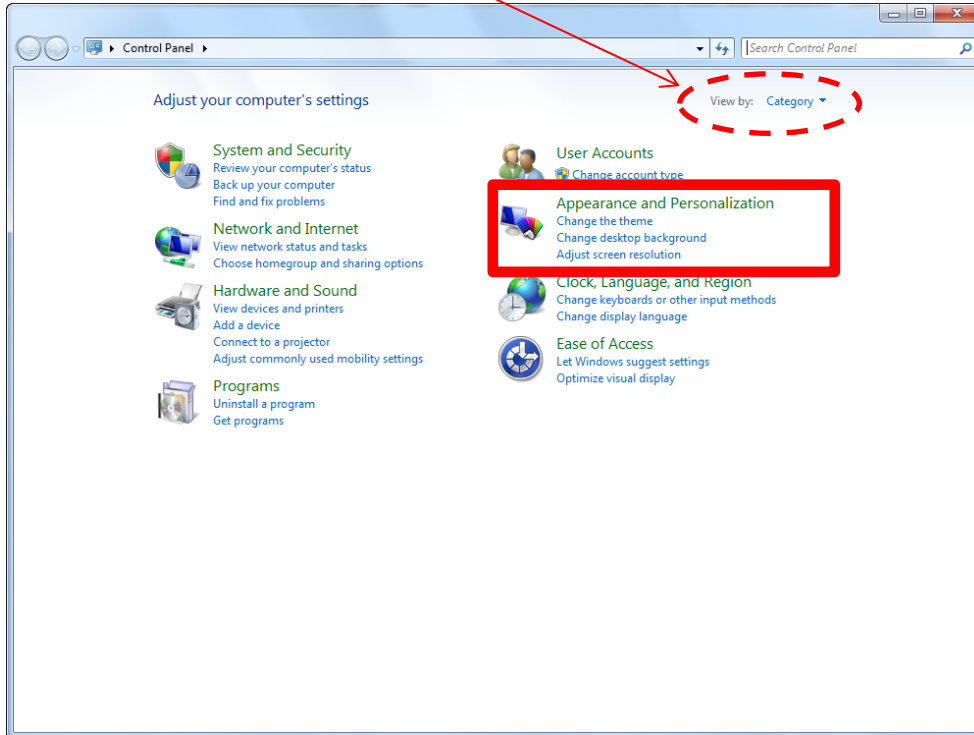

Click → [Start] 

Click → [Control Panel]

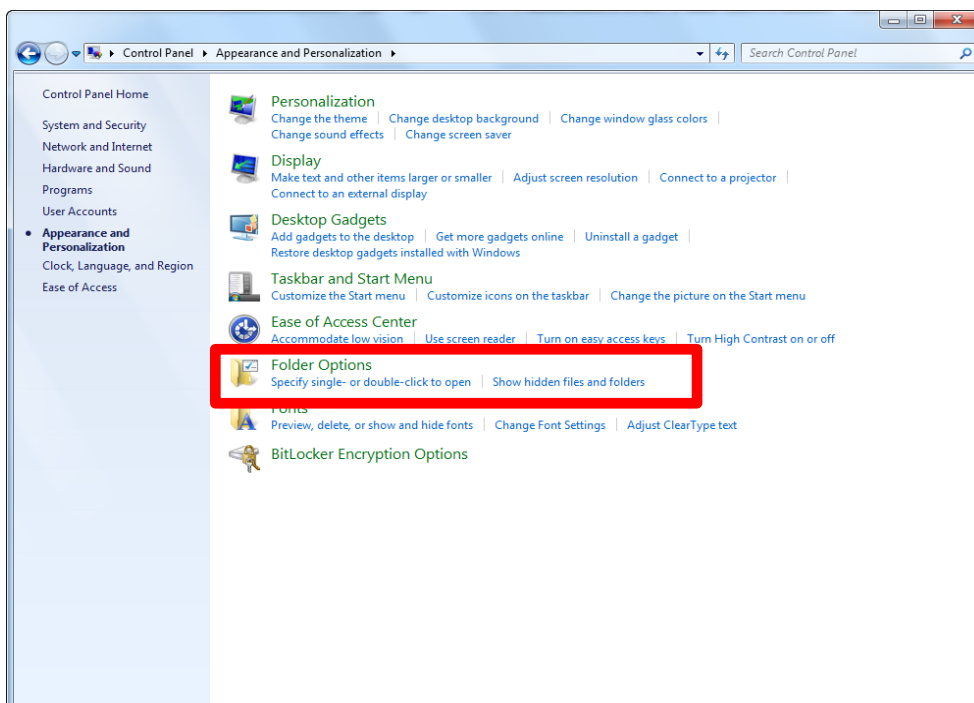

Click → [Appearance and Personalization]

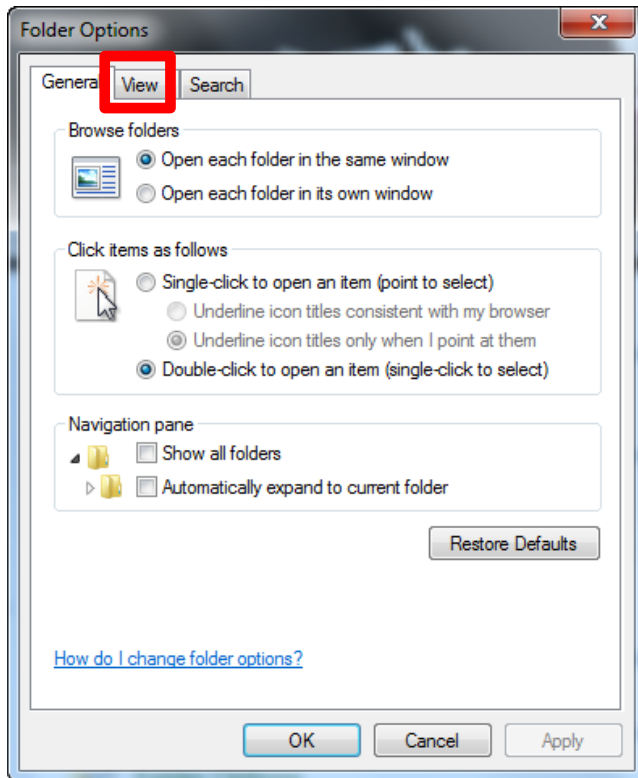

Note: If this screen isn't showing as below, the user needs to select "Category" from the "View by" drop down in the upper right corner of the screen.

Click → [Folder Options]

Folder Options window → Click → [View tab]

Under [Hidden files and folder] → Check → [Show hidden files, folder, and drives]
