

# Advanced Grazing Workshop

## Decatur, Texas, October 7-8, 2021

**HOW TO BALANCE ANIMAL PERFORMANCE, MITIGATE DROUGHT RISK, AND GROW MORE GRASS**

### Topics Include:

- Establishing the priorities – a case for low-cost, low-risk ranching
- The importance of ecosystem health and key monitoring to ensure results
- Identifying risks and how to manage, monitor, and correct deviations from the plan
- Steps to accelerate your learning with certainty and confidence
- Determining optimal plant recovery times for your land
- Identifying, managing, and monitoring key indicators – animal production, ecosystem function, and quality of life
- Financial considerations and decisions for healthy profits
- Considering risk, stress, and quality of life in production decisions
- Takeaway actions for you to implement on your ranch
