Region	Cropland	Hayland	Pasture	Woodland	Wetland
1	\$3,375	\$2,475	\$2,475	\$1,440	\$585
2	\$3,375	\$2,475	\$2,475	\$1,440	\$585
3	\$3,375	\$2,475	\$2,475	\$1,710	\$585
4	\$4,500	\$2,475	\$2,475	\$2,700	\$585
5	\$3,600	\$2,475	\$2,475	\$2,520	\$585
6	\$6,300	\$4,230	\$4,230	\$3,510	\$1,080
7	\$5,400	\$4,230	\$4,230	\$2,790	\$1,080
8	\$6,030	\$4,230	\$4,230	\$4,320	\$1,080
9	\$7,200	\$4,230	\$4,230	\$4,320	\$1,080

Cropland: Land that has been farmed to produce commodity crops at least once out of the last five years (including the associated non-infrastructure that is critical to farming drained hydric soils: ditches, buffers along ditches, pump stations, and irrigation pivots). Land currently in CRP qualifies as cropland.

Hayland: Land that has been farmed to produce hay at least three out of the last five years OR cropped at least once during the last ten years.

Pasture: Land that is primarily used to produce forage for livestock production (not cropped or used for hay production in the last five years).

Woodland: Land that is dominated (>50% cover) by woody species with a minimum height of fifteen feet at maturity.

Wetland: Land that contains hydric soils and currently has the hydrology to support a hydrophytic plant community. Land that has been idle for ten or more years and does not qualify as woodland.
