Thank you for your interest in working with USDA's Natural Resources Conservation Service (NRCS) to help you manage your natural resources in a sustainable manner!

This guide will help you understand how NRCS can provide voluntary technical and financial assistance as you prepare to work with us for the first time. New to farming? Want to learn how to start a farm? NRCS can help!

We offer additional assistance to beginning farmers and ranchers (those who have operated a farm or ranch for less than ten years), and can help you get started or grow your operation through a variety of programs and services.

Your first step should be to contact your USDA Service Center and make an appointment. Be sure to ask what documents you'll need. Also consider -- what is your vision for your land and farm? What are your challenges?

Need information in a language other than English? We offer free translation services.
Thinking About Working with NRCS?

Here’s what you need to know

So you’re ready to make some improvements on your land but not sure where to start?

The USDA Natural Resources Conservation Service may be able to help. NRCS works with farmers, ranchers, tribes and other individuals interested in conserving the soil, water and other natural resources on their land.

We can help you identify natural resource concerns and develop a conservation plan to address those issues on your property.

Funding is available to help you offset the costs to implement the actions identified in your conservation plan.

Still interested? That’s great! Below are a few things to think about before applying to NRCS for financial assistance programs.

Can you answer YES to the following questions?

If so, then you may be eligible to participate in NRCS financial assistance programs.

1. Do you have a social security number or employer identification number issued by the IRS?

2. Will you maintain control of your land for the entire span of the proposed NRCS contract? Land control/ownership can be documented as a deed, lease, or another form of evidence.

3. Is your adjusted gross income less than $900,000?

4. If you’re an entity, do you have signature authority to make management decisions on the land?

5. Is your land in agriculture, such as cropland, grassland, pasture or non-industrial private forest land?

6. Is your land in compliance with Highly Erodible Land and wetland conservation provisions?

7. Do you have an interest in the agricultural or forestry operation on your land?
THINKING ABOUT WORKING WITH NRCS?

It’s a contract
It’s important to understand that to receive financial payments from NRCS, you are entering into a contract with the U.S. government. That means you agree to complete certain conservation activities on your land within a set time frame to earn financial incentives. NRCS understands that things can happen outside your control that result in delays, such as a natural disaster; so we may be able to modify the contract if needed. But keep in mind that if contract conditions aren’t met, you may be liable for paying back all or a portion of the funding, or your contract may be terminated.

While NRCS accepts applications for its conservation programs year-round, there are state-specific, ranking dates to evaluate applications for funding. You should apply by the ranking dates to be considered for funding in the current cycle which is provided through a competitive process.

You pay up-front costs
NRCS contracts work kind of like a mail-in rebate. Typically, you pay the costs up-front for conservation practices, then NRCS issues you a payment after completion. Therefore, it’s important to consider your out-of-pocket costs up-front and determine if the proposed project makes financial sense for your operation. Advance payments are an option that can minimize your up-front costs if you qualify as a historically underserved producer. Ask your local NRCS office about advance payments if that sounds like a better fit for you.

Work must take place during the specified contract timeline
This means you’ll need to wait to begin working on a conservation practice until your contract is signed. You must have at least one conservation practice commenced during the first year of your contract. NRCS will help you in the planning process to figure out the best schedule for your operation, but keep in mind that the contract will require certain practices to be completed within a specified time frame.

Projects must meet NRCS design standards
Because we want to ensure the conservation projects on your land will perform as intended, NRCS has developed science-based conservation standards for each of the conservation practices. That means when you implement projects on your land, they need to meet NRCS technical specifications. Activities that fall short of these standards will not receive payment and may need to be removed or replaced.

NRCS must certify the completed work before issuing your payment
Before NRCS can issue your payment, NRCS staff will need to visit your land to certify that the conservation practices have been completed according to our conservation standards. Once NRCS certifies a practice, you will receive payment via direct deposit.

NRCS payments vary depending on the type of conservation practice
Interested in how much you may get paid for various conservation practices? NRCS has set payment schedules that determine the payment amount. Check with your local NRCS office to find out more about payment schedules.

You are responsible for paying income tax on any NRCS payments
By law, you must report any payments you receive from NRCS as taxable income when filing your annual income tax return. You may need to consider how this will impact your tax returns.

You’ll be asked to provide your personal information, but it’s kept strictly confidential.
NRCS financial assistance programs require you to provide personal, financial, or sensitive information to process your applications, contracts and payments. This information is kept confidential and is protected by USDA.

We realize this is a lot of information to process, and we’re here to help. Contact your local NRCS field office to get started. We are looking forward to working with you!
NRCS offers Conservation Technical Assistance (CTA) at No Cost to New Jersey producers and landowners! Our goal is to give our customers personalized advice and information, based on the latest science and research, to help them make informed decisions.

Contact a USDA Service Center to discuss your goals with an NRCS Planner and start the conservation planning process.

Walk your land with an NRCS Planner to Evaluate your operation and current resource conditions.

The NRCS Planner will provide specific Recommendations for your operation.

Weigh your options and Decide if you want to move forward on your own OR apply for NRCS financial assistance.

Apply for conservation programs, NRCS will confirm your eligibility.

NRCS will Rank your application.

Once your application is approved, Implement your plan.

Learn about conservation technical assistance next . . .

NRCS offers voluntary conservation programs that provide financial assistance which help implement conservation practices to address natural resource concerns. Financial assistance programs include:

- The Environmental Quality Incentives Program (EQIP) provides financial and technical assistance to agricultural producers to address natural resource concerns and deliver environmental benefits such as improved water and air quality, conserved ground and surface water, increased soil health and reduced soil erosion and sedimentation, improved or created wildlife habitat, and mitigation against increasing weather volatility.

- The Conservation Stewardship Program (CSP) helps agricultural producers maintain and improve their existing conservation systems and adopt additional conservation activities to address priority resources concerns.
Conservation Technical Assistance (CTA)

Here's What You Need to Know

Overview

The Conservation Technical Assistance Program (CTA) provides you with the knowledge and tools they need to conserve, maintain and restore the natural resources on your lands and improve the health of your operations for the future.

NRCS offers this assistance at no cost to you. Our goal is to give you personalized advice and information, based on the latest science and research, to help you make informed decisions.

Conservation Technical Assistance

If you choose to take the next step towards improving your operations, we can work with you to develop a conservation plan, with suggested conservation practices that can help you reach your conservation goals.

You can also choose to apply for financial assistance to get help installing the conservation practices outlined in your conservation plan.

NRCS has six local Service Centers across the State to help farmers, ranchers and foresters get started.

Voluntary Involvement

Through the CTA program, NRCS provides conservation technical assistance to help you voluntarily conserve, maintain, and improve natural resources. NRCS staff and partners provide tools and technical assistance by science to help you make decisions on your lands.

Conservation Planning

Most technical assistance provided by NRCS leads to the development of a conservation plan - a resource assessment of the land that allows you to determine the opportunities for using the resources under your care and how you may achieve your goals. A successful plan helps you achieve your objectives while, at the same time, protecting our natural resources for the future.

NRCS helps decision makers with the conservation planning process ranging from site-specific plans for individuals to more complex community, watershed, or area-wide plans for groups of land managers.

Conservation on the Ground

Based on the conservation plans developed, NRCS and its partners provide the guidance and assistance needed to design, layout and install approved conservation practices. There are over 167 approved conservation practices designed to fit both the resource needs and the land users objectives. Practices may range from simple management activities like irrigation water management to complex structural practices like animal waste management systems.

More Information

For more information, visit your local NRCS field office or nrcs.usda.gov/farmbill or farmers.gov.
Establishing Your Farm Record
Before Applying for USDA Programs

If you’re a new customer applying for USDA farm and conservation programs for the first time, you need to establish your farm record with the USDA Farm Service Agency (FSA) first, before applying for financial assistance.

What is a Farm Record?
Your farm record registers you and your agricultural operation so that you may apply for USDA financial assistance programs, such as farm loans, disaster assistance, crop insurance as well as NRCS conservation programs. It creates a unique farm and tract number for your operation. Registering your farm means that when programs become available that could be useful to you, you will already be in the FSA system and ready to apply.

How to Get Your Farm Record
Make an appointment with your local FSA office:

**Burlington, Camden, and Ocean Counties**
1971 Jacksonville Jobstown Road, Columbus, NJ 08022; Phone: (609) 267-1639

**Monmouth, Mercer, and Middlesex Counties**
PO Box 5033 4000 Kozloski Road, Freehold, NJ 07728; Phone: (732) 462-0075

**Hunterdon, Somerset, and Union Counties**
687 Pittstown Road, Frenchtown, NJ 08825; Phone: (908) 782-4614

**Warren, Sussex, Essex, Hudson, Passaic, Bergen, and Morris Counties**
101 Bilby Road, Suite 1H, Hackettstown, NJ 07840; Phone: (908) 852-2576

**Cumberland, Cape May, and Atlantic Counties**
1318 S Main Road, Building 5A, Vineland, NJ 08360; Phone: (856) 205-1225

**Salem and Gloucester Counties**
51 Cheney Road, Woodstown, NJ 08098; Phone: (856) 769-1126

Additional information is available at the FSA New Jersey website: [www.fsa.usda.gov/state-offices/New-Jersey/](http://www.fsa.usda.gov/state-offices/New-Jersey/)

**Forms Required**

- Form AD 2047: Customer Data Worksheet Request for Business Partner Record Change
- Form AD 1026: Highly Erodible Land Conservation and Wetland Conservation Certification
- Form CCC 941: Average Adjusted Gross Income Certification and Consent to Disclosure of Tax Information
- Forms CCC 902I and/or 902E: Farm Operating Plan for an Individual or Entity
- Form CCC-901: Member’s Information (for members of an entity)

**What to Bring**

- Your Social Security or Employer Identification number, property and mailing address, phone number
- Proof of land control such as a deed or lease document
- Copy of the articles of incorporation, by-laws, partnership paperwork, etc.
- Copy of entity documents, if applicable.

Additional forms and/or documents may be required. Please contact your FSA office for more information.
Do you Qualify as a Historically Underserved Producer?

Overview
The Agriculture Improvement Act of 2018 (2018 Farm Bill) includes provisions that address the unique circumstances and concerns of socially disadvantaged, beginning, limited resource, and veteran farmers and ranchers (“historically underserved producers”). The 2018 Farm Bill provides for voluntary participation, offers incentives, and focuses on equity in accessing U.S. Department of Agriculture (USDA) programs and services.

The Natural Resources Conservation Service, as an agency of the U.S. Department of Agriculture, is committed to ensuring that its programs and services are accessible to all our customers, fairly and equitably, with emphasis on reaching the underserved and socially disadvantaged farmers, ranchers, and tribes of our state.

Historically Underserved Groups:
- Beginning Farmer or Rancher
- Limited Resource Farmer or Rancher
- Socially Disadvantaged Farmer or Rancher
- Veteran Farmer or Rancher

New Jersey NRCS considers any land that produces food and fiber as agricultural land for Farm Bill program eligibility purposes.

Self-Evaluation Determination Questions
Use these questions as your guide to the NRCS-CPA-1200 Conservation Program Application block 9. To qualify as historically underserved, you must answer yes to all of the questions within a category.

Beginning Farmer or Rancher
Have you, as the individual or entity applying, operated a farm or ranch for not more than 10 consecutive years?

Will you, the individual or entity applying, be materially and substantially participating in the operation of the farm or ranch such that if you did not, the operation would be seriously impaired?

If you are a legal entity or joint operation, do all members of the entity or operation individually qualify?

Veteran Farmer or Rancher
Did you serve in the United States Army, Navy, Marine Corps, Air Force, or Coast Guard, including the reserve components thereof, and were you discharged or released therefrom, under conditions other than dishonorable?

Do you qualify as a beginning farmer or rancher?

If you are a legal entity or joint operation, do all members of the entity or operation individually qualify as both veteran and beginning farmer and rancher?

Limited Resource Farmer or Rancher*
In each of the last two years, was your direct or indirect gross farm sales less than or equal to the pre-determined amount found online at the NRCS Limited Resource Farmer Tool? ($189,200 for FY20)

In each of the last two tax years, was your total household income less than the “County/Area Value,” as found online on the NRCS Limited Resource Farmer Tool?

If you are a legal entity or joint operation, do all members of the entity or operation individually qualify?

*Gender alone is not a socially disadvantaged group for the purposes of NRCS conservation programs.

Socially Disadvantaged Farmer or Rancher
Are you, as the individual or entity applying, a member of a socially disadvantaged group? (Including: American Indians or Alaska Natives, Asians, Black or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics.)

*Gender alone is not a socially disadvantaged group for the purposes of NRCS conservation programs.

If you are a legal entity or joint operation, is at least 50 percent ownership of the entity or operation held by socially disadvantaged individuals.
Environmental Quality Incentives Program

USDA’s Natural Resources Conservation Service - New Jersey offers voluntary Farm Bill programs that benefit both agricultural producers and the environment.

Overview
The Environmental Quality Incentives Program (EQIP) provides technical and financial assistance to producers to address natural resource concerns and deliver environmental benefits such as improved water and air quality, conserved ground and surface water, increased soil health and reduced soil erosion and sedimentation, improved or created wildlife habitat, and mitigation against drought and increasing weather volatility.

Benefits
Through EQIP, NRCS provides agricultural producers with one-on-one help and financial assistance to plan and implement improvements, or what NRCS calls conservation practices. Together, NRCS and producers invest in solutions that conserve natural resources for the future while improving agricultural operations.

Program at a Glance
NRCS may visit your property to inventory your natural resources and identify opportunities for conservation improvements. Then you will decide how best to address your natural resource concerns. These decisions will be part of your EQIP application and will be recorded in a Conservation Plan. NRCS offers over 100 unique practices designed for working farms and forests.

Who is Eligible?
Farmers, ranchers, and forest landowners who own or rent agricultural land, meet the Adjusted Gross Income (AGI) payment limitations and are in compliance with the highly erodible land conservation (HELC) and wetland conservation (WC) provisions.

EQIP assistance can be used on all types of agricultural operations, including:

• Conventional and organic
• Specialty crops and commodity crops
• Forestry and wildlife
• Historically underserved farmers*
• Livestock operations

*Increased and advance payments available for historically underserved producers (beginning, limited resource, socially disadvantaged, and military veterans).

How to Apply
Applications for EQIP financial assistance are accepted throughout the year. Planning and ranking usually take place in the Fall or Winter, and contracts are awarded in the Spring.

If your application is ranked and selected, you will enter into a contract with NRCS to receive financial assistance for a portion of the cost of implementing conservation practices. Payment rates for conservation practices are reviewed and set each fiscal year.

Apply at your local USDA Service Center, which can be found on the back of this document, or at farmers.gov/servicelocator.

Top New Jersey EQIP Practices

- Cover Crop
- Brush Management
- Forest Stand Improvement
- Structures for Wildlife
- Tree/Shrub Establishment
- Mulching
- Conservation Cover
- Underground Outlet
- Fence
- Lined Waterway or Outlet
- High Tunnel System

More Information
For more information, visit nrcs.usda.gov/farmbill or farmers.gov.

Learn about Advanced Payment options for EQIP . . .
Advance Payment Options for EQIP

What You Need to Know

Overview
The Environmental Quality Incentives Program (EQIP) advance payment option limits out-of-pocket conservation costs for historically underserved producers. EQIP provides at least 50 percent of the contracted payment for each conservation practice up front, before the practice is implemented, to purchase materials or contract services.

Advance payments are only available under EQIP. EQIP provides financial and technical assistance to address natural resource concerns resulting in environmental benefits such as improved water and air quality, conserved ground and surface water, reduced soil erosion and sedimentation, and improved or created wildlife habitat.

Under the general EQIP payment process, a producer is reimbursed after a conservation practice is implemented. This process often means that producers must pay up front costs, which can be cost prohibitive for many historically underserved producers. The advance payment must be expended within 90 days of receipt, and the practice completed as agreed to on the EQIP schedule of operations.

Who is Eligible for an Advanced Payment?

Beginning Farmer or Rancher: someone who has never operated a farm or ranch, previously, or has operated a farm or ranch for less than 10 consecutive years.

Socially Disadvantaged Farmer or Rancher: a member of a group whose members have been subjected to racial or ethnic prejudice because of their identity as members of that group without regard to their individual qualities.

Veteran Farmer or Rancher: someone who has served in the armed forces and has not operated a farm or ranch, has operated a farm or ranch for less than 10-consecutive years, or first obtained veteran status during the last 10 years.

Limited Resource Farmer or Rancher: someone with a household income at or below the national poverty level. Eligibility can be determined by using the Limited Resources Farmer or Rancher Tool online at: https://lrftool.sc.egov.usda.gov.

What is an Advance Payment?

An advance payment provides the opportunity to receive up to 50% of the payment up front to purchase immediately-needed materials and services.

The 2018 Farm Bill requires NRCS to offer proactively the advance payment option to all historically underserved EQIP participants.

NRCS field staff are required to document the producer’s decision to select (or not select) the advance payment on a contract item basis.
How it Works
All EQIP practices are eligible for advance payments, including vegetative, structural, and management practices, and conservation activity plans. Producers can use the option for as many or as few practices as they choose and can change their decision before they receive payment.

Historically underserved farmers producers are also eligible for a higher payment rates.

Advance Payment Requirements
An advance payment provides the opportunity to receive up to 50% of the payment up front to purchase immediately-needed materials and services. However, there are some requirements you should be aware of before making the request:

- Any funds not expended within 90 days of receipt must be returned to NRCS. Therefore, participants should make sure that the advance payment is for an immediate need and any additional funding needed to purchase materials is ready and available before requesting the funds.

- Participants should also ensure their contract matches their design exactly. If not, your contract may needed to be modified to reflect the appropriate practice component and quantities to exactly match your completed conservation practice design.

Example
A beginning farmer applies for and is approved for an EQIP contract to plant cover crops on 40 acres of land.

The payment rate for implementation of a cover crop practice is $56.81 per acre. Multiplying that rate by 40 acres, the total payment that beginning farmer would receive for planting cover crops through EQIP would be $2,272.40.

- $56.81 x 40 acres = $2,272.40
- $2,272.40 / 2 = $1,136.20 (50% of the full payment rate)

Under the advance payment rate of 50%, that beginning farmer would be eligible to receive $1,136.20 in advance of implementing the practice, thus making it possible to offset some of the up-front costs such as purchasing the seed. The beginning farmer would then receive the remaining payment upon completing the cover crop practice.

Schedule of Operations
Conservation practices must be completed as scheduled in your contract. The conservation practices associated with advance payment must be completed as scheduled in the EQIP schedule of operations. Failure to complete the conservation practices as scheduled will result in the EQIP contract being in violation with the terms and conditions of the contract.
Conservation Compliance
What You Need to Know

One of the cornerstones of participating in USDA conservation programs is compliance with Highly Erodible Land Compliance (HELC), and Wetland Conservation (WC) requirements.

What is Highly Erodible Land (HEL)?
Highly erodible land is defined as land that can erode at an excessive rate because of soil properties, leading to long-term decreased productivity. HEL is designated on a field basis and based on the proportion of the total field acreage that contains HEL soils.

A field that is classified as an HEL field has:
• 33.33 percent or more of the total acreage identified as soil map units that are highly erodible; or
• Fifty or more acres identified as soil map units that are highly erodible.

HEL Compliance Provisions
The 1985 Act, as amended, provides that persons who produce an agricultural commodity, or make the production of an agricultural commodity possible, on an HEL field and that are not following an approved conservation system on that land shall be ineligible for benefits under programs administered by USDA.

Additionally, there are stricter erosion protection requirements for fields that do not have a cropping history prior to 1985. The HEL land that grows commodity crops must follow an approved conservation plan or system.

Wetland Compliance Provisions
The 1985 Act, as amended, provides that, unless exempt, persons are ineligible for benefits under certain programs administered by USDA if the operator, other tenant, or the landowner:
• Plant an agricultural commodity on wetland that was converted after December 23, 1985; or
• Convert a wetland after November 28, 1990, by draining, dredging, filling, leveling, removing woody vegetation, or any other means having the effect of making the production of an agricultural commodity possible.

What is a Wetland?
According to the Farm Bill, a wetland is land that meets the following characteristics:
• Predominance of hydric soils;
• Has wetland hydrology (area is typically ponded, saturated or inundated for at least two weeks during the growing season once frost is out of the ground); and
• Is inundated or saturated by surface or ground water at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.
• Under normal circumstances, supports a prevalence of hydrophytic vegetation, typically adapted for life in saturated soil conditions.
**USDA Self Certification Provision**

To remain eligible for USDA programs, applicants must self-certify their compliance with Highly Erodible Land and Wetland Compliance provisions on form AD-1026 when applying for benefits.

To document compliance for USDA programs, complete the AD-1026, Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification. Below are the terms you are agreeing to by self-certifying compliance:

1. Not to plant or produce an agricultural commodity actively applying an approved conservation plan or maintaining a fully applied conservation system.
2. Not to plant or produce an agricultural commodity on wetlands converted after December 23, 1985.
3. Not to convert wetlands by draining, dredging, filling, leveling, removing woody vegetation or any other means that would allow the planting of any crop, pasture, agricultural commodity, or other such crops.
4. Not to use proceeds from any FSA farm loan, insured or guaranteed, or any USDA cost-share program, in such a way that might result in negative impacts to wetlands, except for those projects evaluated and approved by NRCS.

The signature on the form AD-1026 also gives representatives of USDA authorization to enter upon and inspect all farms in which you have an interest for the purpose of confirming the above statements.

**What Does This Mean to You?**

- If you review your maps and Producer Farm Data Report, and it states you have Highly Erodible Land (HEL), you need to ensure you are following a Conservation Plan or system.
- If you are uncertain if you have a Conservation Plan in place, please inquire with FSA or NRCS.
- If you are doing any type of work on the property such as cleaning out fence lines, clearing trees, adding tile, replacing tile, adding fill or working up pasture, ensure you have filled out an AD-1026 ahead of time so you do not jeopardize USDA program eligibility. This may require NRCS to complete a certified HEL and/or wetland determination.

**Once Activity is Proposed on AD-1026, What Now?**

After you complete form AD-1026, NRCS will make a technical determination whether HEL or NHEL (non-highly erodible land). NRCS will also determine location of wetlands, and assign labels to them if exemptions apply. This process can vary from a few weeks to over several months, depending on complexity.

NRCS will look at past aerial photos and a soil map of the site. Quite often, USDA may make the determination right in the office. NRCS must often make site visits to verify findings. Site visits will add time to the process as field determinations may only be made when conditions are favorable.

Once NRCS makes the determination, a letter and map will be issued explaining the decision making process USDA followed. If the decision is adverse, and you disagree, you will have an opportunity to appeal and provide information that may not have been considered.

Learn about the Farmers.Gov Portal . . .
Farmers and ranchers can now manage their conservation activities and request assistance from the USDA through a new feature on farmers.gov. These conservation features join several others already available through the farmers.gov portal, including the ability to view farm loan information. As more content and capabilities are added, farmers.gov is quickly becoming the one-stop shop for USDA customers to find resources, submit applications and assistance requests, and make connections.

**Conservation Information**

The Conservation tab on the farmers.gov portal enables individual producers to:

- View, upload, download and e-sign documents;
- Request conservation assistance;
- Request financial assistance, including submitting a program application;
- View and request application details;
- Reference technical terms and submit questions;
- Access information on current and past conservation practices;
- Report practice completion and request practice certification;
- View detailed information on all previous and ongoing contracts, including the amount of cost-share assistance received and anticipated; and
- Have authority for FSA and NRCS customers to work in the portal and act on behalf of their active power-of-attorney entitlements and their current authorities for business entities.

The new conservation features enhance the request process with a customer-friendly unified mapping tool that allows farmers to locate areas of interest in minutes with high-resolution aerial imagery and multi-layered display functionality.

**How to Access**

To access conservation information, visit farmers.gov and sign in to the site’s authenticated portal, available on the menu at the top right of the site. To access, you will need a Level 2 USDA eAuthentication account.

If you do not have a Level 2 USDA eAuthentication account, sign up for one today. This account gets you access to your loan information and other self-service features available through the farmers.gov portal. To enroll, you will need to:

1. Contact your local service center to ensure you have a USDA customer record in Business Partner with a correct email address.
2. Go to the eAuth Account Registration page.
3. Select “Customer” on the registration page.
4. Enter your standard email address. You will receive an email from eAuth asking you to confirm your email address. Click the “Continue Registration” link in this email to continue the registration process.
5. Complete identity verification by using the online self-service identity verification method or by visiting a local registration authority at a USDA service center office. A local registration authority is a USDA employee who verifies the identity of a customer in-person using their official government-issued photo ID.
6. You’re ready to login!

For more in-depth instructions visit farmers.gov/sign-in.

*Current CCG users can use their existing login and password to access the Conservation features on farmers.gov.*
The Conservation tab on farmers.gov allows you to access your conservation activities and request assistance.

More Features to Come

USDA is building farmers.gov for farmers, by farmers. Future self-service features available through the farmers.gov portal include the ability for multiple producers to sign documents and contracts.

Help and Support

A “Conservation User Guide for Producers” that features how-to video instructions for popular features is available online at farmers.gov. If you need additional help, personal assistance is available at the farmers.gov Service Desk by selecting the ‘Help’ link located at the top of the all authenticated portal pages and submitting a ‘Contact Us’ request. NRCS field office staff are always available to assist you with your conservation questions and other needs.
Get the News First!
Here’s What You Need to Know

Sign up for email updates on Gov Delivery to stay informed about NRCS New Jersey programs, funding opportunities and news.

The USDA Natural Resources Conservation Service (NRCS) in New Jersey offers a free instant electronic subscription service through Gov Delivery. Agricultural producers, conservation partners, and others interested in keeping up-to-date on important NRCS program deadlines and information are encouraged to sign up.

You can choose to receive notifications by email or text message when new information becomes available about any state or national NRCS topic you choose. If you sign up for these automatic updates, you will only receive notifications you request and you may unsubscribe at any time.

Privacy Policies
Signing up for Gov Delivery is entirely voluntary. The information you provide is used to deliver the notifications you have requested and allow you to update your subscription preferences. Your personal information will not be shared with third parties for promotional purposes. GovDelivery is a service operated by Granicus. Please receive the GovDelivery privacy policy to learn how GovDelivery may use your information: https://granicus.com/privacy-policy.

Prevent e-mails being marked “Spam”
Emails sent to you from GovDelivery will show up from “USDA-NRCS@public.govdelivery.com.” To ensure you receive emails through your GovDelivery subscription, be sure to add this email address to your contact list, check your spam settings, or follow instructions from your e-mail provider on how to prevent these e-mails from being marked “spam” or “junk mail.”

How to Start, Change or Cancel Your Subscription

1. Go to the link below or scan the QR code with your phone.
https://public.govdelivery.com/accounts/USDAFARMERS/subscriber/new?qsp=USDAFARMERS_33
You may also sign up via the NRCS New Jersey website at www.nj.nrcs.usda.gov and click the Gov Delivery icon (red envelope).

2. Enter the email address and/or phone number where you want the notifications to be sent and select which state and/or national topics you would like to receive, then click “Submit.”

3. Click the “subscriber preferences” link to change your email address, modify your password, add or delete subscriptions.

Learn about Financial Assistance Programs . . .
NRCS Financial Assistance Programs Crosswalk

The USDA Natural Resources Conservation Service (NRCS) offers financial and technical assistance programs for agricultural producers and private land owners across New Jersey. NRCS programs are designed to improve and conserve natural resources such as soil, water, air, plants, animals and energy. This chart provides a brief crosswalk of NRCS conservation programs available in New Jersey. To learn more and to apply for assistance, contact your local NRCS Field Office.

<td>$200,000, $400,000 (General Partnership and Joint Venture), No payment limitation for Tribes.</td>
<td>Entire operation (Separate contracts for Ag and Forestry operations)</td>
<td>Generally someone who has worked with NRCS with few resource concerns and/or have installed the majority of practices they are willing to adopt. This program is for clients who are willing to take their existing stewardship to higher levels of conservation.</td>
</tr>
<tr>
<td>AMA (Agricultural Management Assistance)</td>
<td>1 - 10 years</td>
<td>Management, structural and vegetative practices.</td>
<td>Varies annually; 2 different competitions - national and state</td>
<td>Client Choice</td>
<td>New or existing clients with one or more resource concerns they would like to address. This program targets beginning and limited resource farmers, small farms, and producers who have had limited participation in other USDA financial assistance programs. It is for clients who need to mitigate risk through production diversification or resource conservation practices.</td>
</tr>
<tr>
<td>ACEP-ALE (Agricultural Conservation Easement Program-Agricultural Land Easements)</td>
<td>Perpetual</td>
<td>Up to 50% purchase of the easement.</td>
<td>Dependent on appraisal</td>
<td>Client Choice</td>
<td>Clients who are passionate about their land staying in agriculture or an undeveloped condition or as working lands. Clients must work through a third party land trust to secure the easement.</td>
</tr>
<tr>
<td>ACEP-WRE (Agricultural Conservation Easement Program-Wetlands Reserve Easements)</td>
<td>Perpetual, 30-year easement, 30-year contract</td>
<td>Purchase of the easement and possible restoration costs.</td>
<td>30-year contract is 75% deed value and restoration activities.</td>
<td>Client Choice</td>
<td>Clients who would like to restore their agricultural land back to wetland conditions and preserve habitat values for those lands.</td>
</tr>
<tr>
<td>RCPP (Regional Conservation Partnership Program)</td>
<td>5 years (with possible extension to 6 years)</td>
<td>Both NRCS and project partners provide funding and expertise to increase conservation implementation through public/private partnerships.</td>
<td>Payment limits may vary from year to year; minimum and maximum payments are established in the RCPP funding opportunity announcement.</td>
<td>RCPP projects may vary in size and scope and address the lead partner’s resource concerns and natural resource priorities.</td>
<td>Partners that offer value-added contributions to expand our collective ability to address on-farm, watershed, and regional natural resource concerns.</td>
</tr>
