NRCS CONSERVATION PRACTICE EFFECTS - NETWORK DIAGRAM

Irrigation System, Surface and Subsurface (443)

1. Installed surface/subsurface irrigation system (applied by means other than trickle or sprinkler nozzles)

- D.1 (+/-) Water use potential
- D.2 (+) Water delivery to crop
- D.3 (+) Cost of installation, operation, and maintenance
- D.4 (+) Agricultural chemicals delivery to crop
- D.5 (+) Erosion potential; (+) potential for deep percolation

Start

Initial setting: Agricultural land where irrigation/chemigation is needed to enhance plant growth and/or to improve the efficiency of the current system

Pathway

Legend
- Mitigating practice
- Associated practice
- #. Created by practice
- D. Direct effect
- I. Indirect effect
- C. Cumulative effect

Notes:
Effects are qualified with a plus (+) or minus (-). These symbols indicate only an increase (+) or a decrease (-) in the effect upon the resource, not whether the effect is beneficial or adverse.
