

CROPLAND OPERATION DATA (CSP 2015-1)

1. Annually planted row crop acres

- a. Acres where soil moisture content can be manipulated by existing drainage systems
- b. Acres surrounded by levees (e.g., rice fields)
- c. Hayland acres (annually planted ONLY)
- d. Acres converted from grass/legume cover (CRP or other) within the past 2 years
- e. Other row crop acres
- f. Total row crop acres (This is the sum of 1a, 1b, 1c 1d and 1e above)

2. Acres of sod (turfgrass or seed harvest)

3. Nursery crop acres (ornamentals, Christmas trees, bare root, pot in pot, etc.)

4. Hayland acres (permanent ONLY)

5. Orchards and/or vineyard acres

6. Other selected cropland amounts

Acres transitioning from CRP this year

Linear feet of existing field borders

Linear feet of existing filter strips and riparian herbaceous cover buffers (count both sides if controlled)

Linear feet of existing riparian forest buffer(s)(count both sides if controlled)

Linear feet of ALL existing permanent fence on the land use

Number of existing water facilities (do not include facilities on "other lands")

Number of existing pumping plants (used for irrigation ONLY)

Number of single speed motors (do not include headquarters or CAFOs)

Acres used to temporarily graze livestock

Linear feet of existing windbreaks or shelterbelts

Irrigated acres

Number of center pivot systems

Acres of soils that were once prairie (reference soil survey)

Acres of maple trees for syrup or other cropped forest

Acres in an organic system

Acres in a transition to organic system

Linear feet of ditches

Number of predator attractants that can be managed (e.g., perching/nesting structures, water sources, food sources, etc.)

Acres of critical area planting needed to address a resource concern

Linear feet of fence needed to address a resource concern

Acres of field borders needed to address a resource concern

Acres of filter strips needed to address a resource concern

Linear feet of windbreak/shelterbelt establishment needed to address a resource concern

Acres of riparian herbaceous cover needed to address a resource concern

Acres of forest riparian buffers needed to address a resource concern

Acres recommended for tree/shrub establishment in a forestry management plan or similar

Number of watering facilities needed to address a resource concern

Linear feet of road/trails/landings needing closure

Acres of trails/landings needed to address a resource concern (for linear features assume a 15 ft width * length)

Total Cropland acres (This is the sum of 1f, 2, 3, 4 and 5)
