

MO 2016 EQIP

Environmental Quality Incentives Program Policy

REVISED November 6, 2015

This Policy is based on the Interim Final Rule (IFR) for EQIP, Federal Register 7 CFR Part 1466 published 12/12/14.

NRCS will verify Beginning Farmer, Limited Resource Farmer, and/or Veteran Farmer status prior to contract obligation. There is no verification process for participants who self certify as Socially Disadvantaged. All practices must meet the minimum criteria in the Conservation Practice Standard (see the Missouri eFOTG) and the criteria listed below.

If the applicant is a tenant, the applicant must obtain written evidence or assurance of control from the landowner prior to contract obligation. Control may be a written lease, other legal agreement, or letter signed by the landowner indicating the length of control. Zero payment share landowner signature on the contract document does not demonstrate control of land.

Management Practices - Management practice payments are only available on acres where the practice has not been previously applied (with or without financial assistance), or where the practice will result in a higher level of conservation benefit.

Structural Practices - Structural practices include conservation practices that are either structural or vegetative, and have a multi-year lifespan. Structural practices involve the establishment, construction, or installation of site-specific measures. Payments are established as a one-time payment.

Conservation Activity Plans (CAP) - Conservation Activity Plans are conservation plans developed for producers to assist in identifying conservation practices needed to address a specific natural resource need. CAPs are completed by NRCS certified Technical Service Providers (TSP). The list of NRCS certified TSPs is available on the NRCS TSP webpage: www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/technical/tsp

Maximum Payments - Maximum payments, where identified in this policy, are implemented at the contract item (CIN) Level in ProTracts by using the Cost Share Cap input box. The contract may have multiple CINs for a practice, however each CIN must be capped utilizing the Cost Share Cap input box at the Maximum Payment level identified in this policy.

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
---------------	-----------------------	-----------------	--------------------	--------------------------------	--------------	--------------------	------------------

472	Access Control <i>Structural</i>	\$5,000	\$7,000	Acre			10
	Animal Exclusion from Sensitive Areas			Acre	\$27.80	\$38.50	

- 1 Payment is authorized to exclude livestock only if livestock currently have access to the area to be excluded at the time of EQIP application. An EQIP funded Permanent Fence (382) is required in conjunction with this practice.
- 2 Payment is based on the number of acres protected from livestock.
- 3 When applied under the forestland fund pool, payment for this practice is only authorized when included as a planned practice in a Forest Management Plan approved prior to contract obligation (see FMP definition in footnote 2/).
- 4 See the (472) Access Control conservation practice standard.

	Large Animal Composter (average weight > 500lbs)			Lbs/day	\$239.10	\$331.07	

- 1 Payment for this practice is only authorized when included as a component of an existing CNMP.
- 2 Payment for this practice is only authorized for Animal Feeding Operations (AFO) (see definition in footnote 3/).
- 3 Financial Assistance is limited to the capacity of the operation at the time of application.
- 4 See the MO NRCS " Pre-Engineered Structure" Activity Sheet and the (316) Animal Mortality Facility conservation practice standard.

	> 60% undesirable woody canopy cover			Acre	\$205.50	\$284.50	

- 1 This practice is authorized for the treatment of woody plants on all non-cropland areas (including those that are invasive, exotic and noxious), and for the restoration of glades and savannas.
- 2 When addressing pasture or hayland resource concerns, this practice is only authorized when used in conjunction with (528) Prescribed Grazing and/or (511) Forage Harvest Management.
- 3 When restoring glades and savannas, payment is only authorized where the Ecological Site Description indicates a savanna or glade, the area is restored as specified within the (643) Restoration and Management of Rare and Declining Habitats conservation practices standard, and is planned in conjunction with (338) Prescribed Burning.
- 4 When applied on forestland, payment for this practice is only authorized when included as a planned practice in a Forest Management Plan approved prior to contract obligation (see FMP definition in footnote 2/). Glade and savanna restorations do not require a FMP (glades and savannas are not considered forestland).
- 5 When addressing forest or wildlife resource concerns, grazing is not allowed on those acres during the practice lifespan unless the FMP prescribes biological control of invasive species with grazing animals. Grazing on glades is prohibited unless approved by the Area Biologist.
- 6 With the exception of restoring glades or savannas, this practice is not to be used for conversion of woodlands or forests to grassland; such as the removal of woody vegetation to establish or re-establish grass cover.
- 7 Payment is not for site preparation activities for a new seeding or re-seeding, or maintenance/management of a new seeding or re-seeding.
- 8 Clipping/mowing as a stand alone treatment is not authorized for payment
- 9 Practice is not authorized for payment on the same acres as (649) Structures for Wildlife.
- 10 See the (314) Brush Management conservation practice standard.

	Livestock Operation ≥ 300 AU without Land Application			Each	\$7,154.00	\$8,585.00	

1 Must be completed by a NRCS certified Technical Service Provider (TSP).

2 Financial assistance under 102 is not available for CNMP revisions or updates.

3 Financial assistance is not authorized for new operations.

4 Payment for this practice is only authorized for Animal Feeding Operations (AFO) (see definition in footnote 3/).

5 The "Without Land Application" scenarios are authorized for operations that export (or plan to export) greater than 50% manure or agricultural by-products produced by their operation.

6 The CNMP must be developed for animal waste management operations under the control of the applicant (either directly or indirectly through lease, contract, or other agreements).

8 A CNMP is required prior to providing technical and/or financial assistance for an animal waste management system through EQIP. The CNMP must describe the waste management system and the conservation practice(s).

9 Only one Conservation Activity Plan may be concurrently approved and developed on an eligible land unit (e.g., field) at the same time, and must cover all eligible acres currently under the control of the applicant and included in their conservation plan.

- 1 This practice is authorized for the treatment of herbaceous plants, including those that are invasive, exotic and noxious on all non-cropland areas.
- 2 When addressing pasture or hayland resource concerns, this practice is only authorized when used in conjunction with (528) Prescribed Grazing and/or (511) Forage Harvest Management.
- 3 When applied under the forestland fund pool, payment for this practice is only authorized when included as a planned practice in a Forest Management Plan approved prior to contract obligation (see FMP definition in footnote 2/).
- 4 When applied within the Wildlife fund pool, grazing is not allowed unless grazing multi-species native forage mixes and wildlife considerations are part of the grazing plan. Requires State Grassland Conservationist approval.
- 5 Payment is not for site preparation activities for a new seeding or re-seeding, or maintenance/management of a new seeding or re-seeding.
- 6 See the (315) Herbaceous Weed Control conservation practice standard.

- 1 Payment is only authorized for this practice as a component of (528) Prescribed Grazing, (472) Access Control and/or a CNMP (CNMP must identify that a new water well is necessary to comply with wellhead protection requirements before technical or financial assistance is provided).
- 2 Payment is authorized for this practice on grazing lands where the current water supply is inadequate, and the underground water supply is adequate in quantity and quality for the purpose to be served and can be developed at an economical cost.
- 3 Payment is not authorized for electricity or a power unit.
- 4 See the (642) Water Well conservation practice standard.
- 5 MAXIMUM PAYMENT NOTE: Payment is limited to \$100 per acre served (\$125 per acre served for HU participants).

Footnotes and Acronym Information

- 1/ HU Payment Rate refers to the payment rate for Historically Underserved Farmers (Limited Resource Farmers, Beginning Farmers, Socially Disadvantaged Farmers, and Veteran Farmers who also qualify as Beginning Farmers).
- 2/ FMP = Forest Management Plan. Approved FMP's are any plans written by NRCS, Technical Service Providers, or partners that meet the Forest Management Plan Criteria for Practice/Activity Code 106 found in Section III of the Missouri eFOTG.
- 3/ AFO = Animal Feeding Operation. An AFO is an agricultural operation where animals are kept and raised in confined situations. AFOs generally congregate animals, feed, manure, dead animals, and production operations on a small land area. Feed is brought to the animals rather than the animals grazing or otherwise seeking feed in pastures, fields, or on rangeland. An AFO is a lot or facility (other than an aquatic animal production facility) where both of the following conditions are met:
 - (a) Animals have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period (note: 45 days do not have to be consecutive).
 - (b) Crops, vegetation, forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility (note: greater than 50% of the lot does not sustain vegetative cover to be considered an AFO per MO Code of State Regulations 6.300(1)(B)4).
