Step 1: Build SPACERS

Build 3 equal spacers as shown using oak or other wood that is strong and rot resistant. Use 20d nails min.

Simple Side View

Step 2: FORM THE LUNKER BOTTOM

Bridge the spacers with two 8 ft. planks. The spacers should be evenly spaced. Secure each plank with 20d nails.
Step 3: FORM THE LUNKER TOP

Bridge the spacers with three 8 ft. planks.
Secure each plank with 20d nails.
Step 4: PREPARE LUNKERS FOR PLACEMENT

Install cover board on bank side of Lunker.
The placement of the Lunker is dependent on the base material.
Three techniques are generally used.

1. Place soil anchors attach and soil anchors to Lunker.
   or
2. Place large rock on top of Lunker structure.
   Place Lunker with rock to weight it down.
   or
3. Drill \( \frac{3}{8} \)" holes through Lunkers.
   During installation insert rebar through holes to temporarily stabilize the structure as rock and soil is placed on top.
