ROOT WAD REVETMENT OVER STONE

(PLAN)

N.T.S.

Notes for Rock Bolster:

Secure to rock bolsters at overlap with a minimum of three wraps of $\frac{1}{8}$ – $\frac{1}{4}$" diameter galvanized non-greased, wire rope. If constructing in or near water drill holes in rock bolsters with gas or pneumatic drill. Holes must be clean of all dust, debris, oil, and soap following drilling. Insert a U-shaped 1" rebar into holes several times to dispense and completely mix epoxy and eliminate air pockets. Epoxy resin systems shall meet the requirements of ASTM C981, Type IV Grade 3. Test strength of bond after minimum cure time recommended by the epoxy manufacturer.
