Ranking Tool Summary

for FY2016 - Beginning Farmer - Livestock

(Released 01/05/2016)

Description:

A beginning farmer or rancher is an applicant who meets both of the following criteria: has not operated a farm or ranch, or has operated a farm or ranch for not more than 10 consecutive years AND will materially and substantially participate in the operation of the farm or ranch. A legal entity or joint operation may be considered beginning farmer or rancher only if all of the individual members independently qualify. In the case of a contract with an individual, individually or with the immediate family, material and substantial participation requires that the individual provide substantial day-to-day labor and management of the farm or ranch, consistent with the practices in the county or State where the farm is located. In the case of a contract made with a legal entity, all members must materially and substantially participate in the operation of the farm or ranch. Material and substantial participation requires that the members provide some amount of the management, labor, or both necessary for day-to-day activities, such that if the members did not provide these inputs, operation of the farm or ranch would be seriously impaired. Applicants who self-certify eligibility as a beginner farmer or rancher may be requested to provide records to justify their claim. It is the responsibility of the applicant to provide accurate data. False certifications are subject to prosecution and litigation under criminal and civil fraud statutes.

Land Uses:

Associated Agriculture Land, Farmstead, Pasture

Efficiency Score:

Scoring Multiplier: 7.840

Optional Notes:

National Priorities:

Scoring Multiplier: 1.000

Questions:

Number	Question	Points
1	a. Is the program application to support the development of a Conservation Activity Plan (CAP)? If answer is "Yes", do not answer any other national level questions. If answer is "No", proceed with evaluation to address the remaining questions in this section.	250
2	a. Implementing the practices in a Comprehensive Nutrient Management Plan (CNMP)?	15
2	b. Implementing the practices in a Nutrient Management Plan (NMP)?	10
2	c. Reducing impacts from sediment, nutrients, salinity, or pesticides on land adjoining a designated "impaired water body" (TMDL, 303d listed waterbody, or other State designation)?	10
2	d. Reducing the impacts from sediment, nutrients, salinity, or pesticides in a "non-impaired water body"?	10
2	e. Implementing practices that improve water quality through animal mortality and carcass management?	10
3	a. Implementing irrigation practices that reduce aquifer overdraft.	15
3	b. Implementing irrigation practices that reduce on-farm water use?	10
3	c. Implementing practices in an area where the applicant participates in a geographically established or watershed-wide project?	10
3	d. Implementing practices that reduce on-farm water use as a result of changing to crops with lower water consumptive use, the rotation of crops, or the modification of cultural operations?	10

4	a. Meeting on-farm regulatory requirements relating to air quality or proactively avoid the need for regulatory measures?	10
4	b. Implementing practices that reduce on-farm emissions of particulate matter (PM2.5, PM10)?	10
4	c. Implementing practices that reduce on-farm generated greenhouse gases such as carbon dioxide (CO2), methane (CH4), and nitrous oxide (N2O)?	10
4	d. Implementing practices that increase on-farm carbon sequestration?	10
5	a. Reduce erosion to tolerable limits (Soil "T")?	10
5	b. Increasing organic matter and carbon content, and improving soil tilth and structure?	10
6	a. Implementing practices benefitting threatened and endangered, at-risk, candidate, or species of concern.	10
6	b. Implementing practices that retain wildlife and plant habitat on land exiting the Conservation Reserve Program (CRP) or other set-aside program?	10
6	c. Implementing practices benefitting honey bee populations or other pollinators?	10
6	d. Implementing land-based practices that improve habitat for aquatic wildlife?	10
7	a. Implementing practices that result in the management control of noxious or invasive plant species on non-cropland?	10
7	b. Implementing practice in an Integrated Pest Management Plan (IPM)?	10
8	a. Reducing on-farm energy consumption?	10
8	b. Implementing practice(s) identified in an approved AgEMP or energy audit, which meet ASABE S612 criteria?	10
9	a. Enhancement of existing conservation practice(s) or conservation systems already in place at the time the application is received?	10
Total Points		500

State Issues:

Scoring Multiplier: 1.000

Questions:

Sub-heading Number	Question Number	Question	Points
1		Water: Applications include practices that address water quality degradation occurring from livestock access to surface water. Maximum 65 points. Questions 1-5: Only one Yes allowed. For the purposes of this ranking tool, tract means: contiguous land operated and managed (same labor, equipment, and accounting system) by the same individual or entity, i.e., the applicant.	
	1	The application includes conservation practices (382, 390 or 391, and 472) that establishes a 35-foot (or greater) riparian buffer (planted or natural succession) and excludes livestock access to 100% of the water features that flow off of the tract that is associated with the land being offered in the application. The water quality degradation's source is livestock that is, at the time of the Inventory and Evaluation, actively degrading the water feature (stream, etc). Visual evidence of the water quality degradation must be witnessed and documented at the time of the Inventory and Evaluation.	65
	2	The application includes conservation practices (382, and 472) that excludes livestock access to 100% of the water features that flow off the tract that is associated with the land being offered in the application. The water quality degradation's source is livestock that is, at the time of the Inventory and Evaluation, actively degrading the water feature (stream, etc). Visual evidence of the water quality degradation must be witnessed and documented at the time of the Inventory and Evaluation.	55
	3	The application includes conservation practices (382, 390 or 391, and 472)	45

		that establishes a 35-foot (or greater) riparian buffer (planted or natural succession) and excludes livestock access to less than 100% but more than 50% of the water features that flow off the tract that is associated with the land being offered in the application. The water quality degradation's source is livestock that is, at the time of the Inventory and Evaluation, actively degrading the water feature (stream, etc). Visual evidence of the water quality degradation must be witnessed and documented at the time of the Inventory and Evaluation.	
	4	The application includes conservation practices (382 and 472) that exclude livestock access to less than 100% but more than 50% of the water features that flow off the tract that is associated with the land being offered in the application. The water quality degradation's source is livestock that is, at the time of the Inventory and Evaluation, actively degrading the water feature (stream, etc). Visual evidence of the water quality degradation must be witnessed and documented at the time of the Inventory and Evaluation.	35
	5	The application includes conservation practices (382 and 472) that exclude livestock access to less than 50% of the water features that flow off the tract that is associated with the land being offered in the application. The water quality degradation's source is livestock that is, at the time of the Inventory and Evaluation, actively degrading the water feature (stream, etc). Visual evidence of the water quality degradation must be witnessed and documented at the time of the Inventory and Evaluation.	25
2		Water: Applications include practices that address water quality degradation occurring from Animal Concentration Areas (ACAs). Maximum 95 points. Questions 1-3: Only one Yes allowed - maximum 70 points. Applications that include a 561* MUST also implement a Loafing Lot System OR a Prescribed Grazing System to properly address the resource concern. *561s that are associated with 100% confinement do no need to implement a Prescribed Grazing System or Loafing Lot System.	
	1	The application includes one or more practices (313, 367, 393, 527, 561) that, when installed, will eliminate water quality degradation to a water feature or open sinkhole. Applications that include a 561 MUST implement Prescribed Grazing. The water quality degradation's source is stormwater run-off from a concentrated livestock area. Visual evidence of the water quality degradation must be witnessed and documented at the time of the Inventory and Evaluation. (Planners should reference the Water Quality Planning Criteria.)	70
	2	The application includes one or more practices (313, 367, 561) that will result in the creation of a loafing lot management system, which, when installed, will eliminate water quality degradation to a water feature or open sinkhole. The water quality degradation's source is stormwater run-off from a concentrated livestock area. Visual evidence of the water quality degradation must be witnessed and documented at the time of the Inventory and Evaluation. (Planners should reference the Water Quality Planning Criteria.)	60
	3	The application includes practices, 313 or 561, to be implemented on a 100 percent livestock confinement operation OR a livestock operation that needs additional waste storage. The practices will, when installed, result in adequate storage and proper application of nutrients from animal manures produced on the farm. (Planners should reference the Water Quality Planning Criteria.)	40
	4	The application includes practices (316, 317) which will result in the proper disposal and management of animal carcasses in order to reduce adverse impacts on surface and/or groundwater	25
3		Soil Erosion: maximum 120 points	
	1	The application includes conservation practices (342, 472, 412, 575) that will eliminate erosion and sedimentation caused by livestock that is reaching water features.	75

	2	The application includes conservation practices (612) that convert marginal grazing land to trees.	45
4		Soil Quality: Questions 1-3: Only one Yes allowed - maximum 80 points	
	1	The grazing operation on the tract(s) offered in the application will be managed according to a NEW (not currently under contract) INTENSIVE Prescribed Grazing Plan (528).	80
	2	The grazing operation on the tract(s) offered in the application will be managed according to a NEW (not currently under contract) STANDARD Prescribed Grazing Plan (528).	50
5		Plants: maximum 40 points	
	1	The application includes Nutrient Management that will be implemented on the tracts(s) offered in the application.	20
	2	The grazing operation has at least 2.5 acres of available pasture for each animal unit currently grazing on the tract(s) offered in the application. (not implementing a prescribed grazing plan)	15
	3	The proposed contract includes at least one practice that improves the quality and quantity of forages.	5
		Maximum Points: Total Points	710

Local Issues:

Scoring Multiplier: 1.000

Questions:

Sub-heading Number	Question Number	Question	Points
1		Fish and Wildlife	
	1	The application includes two of the practices listed below that benefit wildlife (inadequate food/cover/shelter or Inadequate Habitat Continuity (Space). The direct benefit shall be confirmed by a biologist and documentation exists to substantiate points awarded. - 327 Conservation Cover - 338 Prescribed Burning - 390 Riparian Herbaceous Cover - 391 Riparian Forest Buffer - 395 Stream Habitat Improvement and Management - 422 Hedgerow Planting - 528 Prescribed Grazing: The Prescribed Grazing Plan must specify grazing guidelines for the species of concern. - 643 Restoration and Management of Rare and Declining Habitats - 644 Wetland Wildlife Habitat Management - 645 Upland Wildlife Habitat Management - 647 Early Successional Habitat Development/Management - 649 Structures for Wildlife - 657 Wetland Restoration - 658 Wetland Creation - 659 Wetland Enhancement	45
2		Livestock Production	
	1	The application includes three of the practices listed below that benefit livestock (Inadequate Feed & Forage or Inadequate Water) - 314 Brush Management - 315 Herbaceous Weed Control - 338 Prescribed Burning - 390 Riparian Herbaceous Cover - 512 Forage and Biomass Planting - 528 Prescribed Grazing - 574 Spring Development - 590 Nutrient Management - 614 Watering Facility - 642 Water Well	40
3		Geographic and Resource Priorities	
	1	The area being considered for an EQIP contract is within an impaired watershed shown on the "Impaired Waters of Virginia" Toolkit GIS layer, AND, the application includes practices that address the impairment.	75
	2	The area being considered is within the Chesapeake Bay Watershed.	40
	3	Will the project occur within 2 miles of, AND provide a direct benefit to a species that is in the Toolkit layer T&E species (either DGIF or Natural Heritage). The direct benefit shall be confirmed by a biologist and documentation exists to substantiate points awarded.	50

Selected Resource Concerns and Practices:

Degraded Plant Condition: Excessive Plant Pest Pressure

- Access Control (472)
- Brush Management (314)
- Composting Facility (317)
- Conservation Cover (327)
- Critical Area Planting (342)
- Early Successional Habitat Development/M (647)
- Field Border (386)
- Filter Strip (393)
- Firebreak (394)
- Grassed Waterway (412)
- Hedgerow Planting (422)
- Herbaceous Weed Control (315)
- Irrigation Water Management (449)
- Mulching (484)
- Prescribed Burning (338)
- Prescribed Grazing (528)
- Restoration and Management of Rare and D (643)
- Riparian Forest Buffer (391)
- Riparian Herbaceous Cover (390)
- Stream Habitat Improvement and Managemen (395)
- Streambank and Shoreline Protection (580)
- Tree/Shrub Establishment (612)
- Tree/Shrub Site Preparation (490)
- Upland Wildlife Habitat Management (645)
- Waste Transfer (634)
- Wetland Creation (658)
- Wetland Enhancement (659)
- Wetland Restoration (657)
- Wetland Wildlife Habitat Management (644)
- Windbreak/Shelterbelt Establishment (380)

Degraded Plant Condition: Inadequate Structure and Composition

- Access Control (472)
- Brush Management (314)
- Conservation Cover (327)
- Critical Area Planting (342)
- Early Successional Habitat Development/M (647)
- Field Border (386)
- Filter Strip (393)
- Forage and Biomass Planting (512)
- Grassed Waterway (412)
- Hedgerow Planting (422)
- Herbaceous Weed Control (315)
- Nutrient Management (590)
- Prescribed Burning (338)
- Prescribed Grazing (528)
- Restoration and Management of Rare and D (643)
- Riparian Forest Buffer (391)
- Riparian Herbaceous Cover (390)
- Silvopasture Establishment (381)
- Stream Habitat Improvement and Managemen (395)
- Streambank and Shoreline Protection (580)
- Tree/Shrub Establishment (612)
- Tree/Shrub Site Preparation (490)
- Upland Wildlife Habitat Management (645)
- Wetland Creation (658)

Wetland Enhancement (659)
 Wetland Restoration (657)
 Wetland Wildlife Habitat Management (644)
 Windbreak/Shelterbelt Establishment (380)
 Degraded Plant Condition: Undesirable Plant Productivity and Health
 Access Control (472)
 Access Road (560)
 Amendments for Treatment of Ag Waste (591)
 Brush Management (314)
