

**Environmental Quality Incentive Program (EQIP) – Zone 2 SDA  
Fund Code  
Screening Criteria Worksheet –FY 2016**

A Screening Worksheet is required to be completed for each eligible EQIP application being considered in the Zone 2 SDA fund category.

**Instructions:**

This screening worksheet must be completed for each eligible producer applying for EQIP Zone 2 SDA fund code. Applications will be accepted on a continuous basis; however, cutoff dates are established for purposes of ranking and funding allocation. The goal of this screening tool is to ensure that conservation technical assistance and EQIP program benefits are efficiently allocated to address the priorities of SDA producers in Zone 2, which are Inadequate Livestock Water, and Invasive Species.

Completion of this worksheet and documentation does not constitute agreement to provide EQIP program benefits or approval of an EQIP contract. The original screening worksheet should be filed with the applicant case file or EQIP program file and the screening priority (High, Medium, and Low) must be recorded in ProTracts. If any funding is left in any of the 3 categories due to lack of applications the money can be moved to one of the other priorities until the money is exhausted.

**Detailed Screening Criteria Worksheet- Complete for each eligible EQIP Applicant**
