Animal Enhancement Activity—KS-ANM03
Incorporate native grasses and/or legumes to 15% or more of herbage dry matter productivity

Kansas Criteria for National Animal Enhancement Activity—ANM03

1. Due to management implications, do not seed native grass species into existing established cool-season grass plantings.
2. Establish new plantings with native grasses or cool-season-introduced forages with legumes into approved seedbeds. See Conservation Practice Construction Specifications 512, Pasture and Hay Planting, for details.
3. Design new plantings consisting of cool-season forages with legumes according to specifications. See Conservation Practice Construction Specifications 512 for details.
4. For existing stands of forage where the intention is to add legumes to the forage base, use an approved interseeding method. See Conservation Practice Construction Specifications 550, Range Planting, for details.
5. For approved species and seeding rates planted into new or existing forage bases, refer to Table 1 of Conservation Practice Construction Specifications 512.
6. If drilled, seed at 50% of the maximum full seeding rate; if broadcast, seed at 100% of the maximum full seeding rate. (Interseed the total acres entered in CMT for this enhancement.)
7. Planting dates are as follows:
   a. Warm-season grasses—December 1 to May 15
   b. Cool-season grasses—December 1 to April 15 and August 15 to October 1
   c. Legumes—December 1 to April 15 and August 15 to October 1
8. Apply lime and fertilizer requirements as described in Conservation Practice Construction Specifications 512.
