Questions:

Sub-heading Number	Question Number	Question	Points
	1	Is the program application for development of a TSP-prepared CAP? If answer is "Yes," do not answer any other State-level questions. If answer is "No," proceed with evaluation to address the remaining questions in this section.	400
	2	Does the application include core conservation practices that will be implemented within ¼ mile of a stream or water body that is threatened (i.e., receives significant runoff of excess nitrogen or phosphorous) and on the EPA 303(d) list, or listed as impaired with a TMDL in place and therefore not on the 303(d) list, or specified as a critical stream or water body authorized by the Regional Conservationist?	100
	3	Do more than 75 percent of the acres treated meet both of the following criteria? i. Located within a NWQI watershed ii. Have at least one core conservation practice planned on them	125
	4	Are core conservation practices planned for the applicant's treated acres within an existing non-USDA water quality project area addressing the same or similar pollutants?	75
	5	Does this program application include the implementation of a system of conservation practices that address the NWQI primary resource concerns?	50

	6	Are core conservation practices to be implemented on offered acres with a majority of soil types that are classified Hydrologic Group D (high runoff) or Group A (high infiltration)?	50
