Initial setting: A potentially environmentally harmful waste is used for a conservation benefit.

1. An agricultural waste processed and recycled for an agriculture use.
   - D.1 (+) Water quality and quantity
     - I.1 (+) Wildlife Habitat

2. An agricultural waste processed and recycled for a nonagricultural use.
   - D.2 (+) Energy conservation or production
     - C.1 (+) Income stability (individuals and community)

3. A nonagricultural waste processed and recycled for an agricultural use.
   - D.3 (+) Soil quality
     - I.2 (-) Fertilizer use
     - C.2 (+) Quality of Life (individuals and community)

Notes:
Effects are qualified with a plus (+) or minus (-). These symbols indicate only an increase (+) or a decrease (-) in the effect upon the resource, not whether the effect is beneficial or adverse.
