Soil Map Unit

% Soil Moisture

% Moisture	Moderately coarse texture	Medium texture	Fine and very fine texture
75-100%	Forms weak ball, breaks easily when bounced in hand.*	Forms ball, very pliable, slicks readily.*	Easily ribbons out between thumb and forefinger.*
50-75%	Will form ball, but falls apart when bounced in hand.*	Forms ball, slicks under pressure.*	Forms ball, will ribbon out between thumb and forefinger.*
25-50%	Appears dry, will not form ball with pressure.*	Crumbly, holds together from pressure.*	Somewhat pliable, will ball under pressure.*
0-25%	Dry, loose, flows through fingers.	Powdery, crumbles easily.	Hard, difficult to break into powder

*Squeeze a handful of soil firmly to make ball test.
