

Virginia Overview

The Regional Conservation Partnership Program (RCPP) promotes coordination between NRCS and its partners to deliver conservation assistance to producers and landowners. NRCS provides this assistance to producers through partnership agreements and program contracts or easement agreements.

RCPP combines the authorities of four former conservation programs – the Agricultural Water Enhancement Program, the Chesapeake Bay Watershed Program, the Cooperative Conservation Partnership Initiative, and the Great Lakes Basin Program. Assistance is delivered in accordance with the rules of EQIP, CSP, and ACEP.

Agricultural Act of 2014

RCPP

Regional Conservation Partnership Program

USDA's Natural Resources Conservation Service offers voluntary Farm Bill conservation programs that benefit agricultural producers and the environment.

Benefits

RCPP encourages partners to join in efforts with producers to increase the restoration and sustainable use of soil, water, wildlife and related natural resources on regional or watershed scales.

Through RCPP, NRCS and its partners help producers install and maintain conservation activities in selected project areas. Partners leverage RCPP funding in project areas and report on the benefits achieved. The Secretary of Agriculture has designated the Chesapeake Bay Watershed and the historical range of the Longleaf pine among eight critical conservation areas to focus RCPP assistance.

Eligibility

Eligible Partners - Agricultural or silvicultural producer associations, farmer cooperatives or other groups of producers, state or local governments, municipal

water treatment entities, water and irrigation districts, conservation-driven non-governmental organizations and institutions of higher education.

Eligible Participants - Under RCPP, eligible producers and landowners of agricultural land and non-industrial private forestland may enter into conservation program contracts or easement agreements under the framework of a partnership agreement.

RCPP assistance is also available independent of a partner if the land is located either in a partner project area or in a critical conservation area designated by the Secretary. Conservation program contracts and easement agreements are implemented through the :

- Agricultural Conservation Easement Program (ACEP)
- Environmental Quality Incentives Program (EQIP) or
- Conservation Stewardship Program (CSP)

NRCS may also utilize the authorities under the Watershed Protection and Flood Prevention Program, other than the Watershed Rehabilitation Program, in the designated critical conservation areas.

How to apply

Each fiscal year, NRCS will announce a request for proposals that will outline requirements for proposal submissions for funding. NRCS will review partnership proposals according to the priorities identified in the announcement and make project selections.

Upon selection of a partnership proposal, NRCS and the partner will

enter into a partnership agreement through which they will coordinate to provide assistance to producers in the project area. Partnership agreements may be for a period of up to five years. NRCS may extend an agreement one time for an additional 12 months if needed to meet the objectives of the program.

Producers may apply for RCPP assistance in several ways:

1. At the producer's request, a partner may submit the application for participation in a selected project area
2. Directly at their local USDA Service Center in a selected project area
3. Directly at their local USDA Service center in a critical conservation area designated by the Secretary of Agriculture

Partnership Agreement

The partnership agreement defines the scope of the project, including:

1. Eligible activities to be implemented
2. Potential agricultural or nonindustrial private forest operation affected
3. Local, state, multi-state or other geographic area covered
4. Planning, outreach, implementation, and assessment to be conducted

Partners are responsible for contributing to the cost of the project, conducting outreach and education to eligible producers for potential participation in the project, and conducting an assessment of the project's effects.

In addition, partners may act on behalf of the eligible landowner or producer in applying for assistance and for leveraging financial or technical assistance provided by NRCS with additional funds to help achieve the project objectives.

Before closing the agreement the partner must provide an assessment of the project costs and conservation effects.
