

Summary Information

Federal Awarding Agency Name: U.S. Department Of Agriculture - Natural Resources Conservation Service (NRCS), Commodity Credit Corporation (CCC)

Funding Opportunity Title: Announcement for Program Funding for NRCS' Conservation Innovation Grants (CIG) for Federal fiscal year (FY) 2020 – Iowa

Initial Announcement

Funding Opportunity Number: USDA-NRCS-IA-CIG-20-NOFO0001007

Catalog of Federal Domestic Assistance Number: 10.912, Environmental Quality Incentives Program

NRCS is announcing the availability of CIG to stimulate the development and adoption of innovative conservation approaches and technologies. Applications are accepted from [eligible entities](#) for projects carried out in the state of Iowa. A total of up to \$350,000.00 is available for the Iowa (State) CIG competition in FY 2020. All non-federal entities (NFE) and individuals are invited to apply, with the sole exception of federal agencies. Projects may be between one and three years in duration. The maximum award amount for a single award in FY 2020 is \$100,000.00.

APPLICATIONS DUE DATE: Applications must be received by 5:00 p.m. Central Standard Time on June 26, 2020.

SUBMISSIONS: Applications must be submitted electronically through [grants.gov](#). In addition, a PDF of the complete application must be emailed to Judy.Martinson@usda.gov with a cc to Carolyn.Christian@usda.gov. Note in the message line of the email: FY20 CIG [organization name] [proposal name]. You are encouraged to keep the name of your proposal short. Attachments must be named and emailed as separate documents. Do not send as one adobe document or as a compressed (i.e. zipped) files. Attachment names must reflect the name of the organization and the form name (Example: Cambridge University_SF-424A) If it takes more than one email to send the attachments, number the emails in the message line (example: three emails would be numbered 1 of 3, 2 of 3, and 3 of 3)

Submissions must be received by the time and date due. Late submissions will not be reviewed or considered. The agency will rely on system generated date and time receipt documentation for submission made both via Grants.gov and e-mail to determine whether applications meet the submission deadline. [Click here for more on how to submit an application.](#)

The grants.gov electronic submission interface is called Workspace. Workspace is the standard way for organizations or individuals to apply for federal grants in grants.gov. Workspace allows an applicant grant team to access and edit different forms within an application simultaneously. In addition, the forms may be filled out online or as a PDF. An overview of Workspace can be

viewed at grants.gov ([WEBINAR - Getting Started with Workspace: Become a Workspace Wizard](#)).

Please allow extra time to register in Workspace because there are several preliminary registration steps before an applicant can submit the application. To register, go to www.grants.gov, click on “Applicants”, then click on “Get Registered.” If you have completed a prior grants.gov application, you may already have completed the registration process. Persons with disabilities who require alternative means for communication (e.g., Braille, large print, or audio tape) should contact the USDA TARGET Center at (202) 720-2600 (voice and TDD).

FOR MORE INFORMATION: Applicants are encouraged to visit the Iowa State CIG website at <https://www.nrcs.usda.gov/wps/portal/nrcs/ia/programs/financial/cig/> to learn more about the CIG program. Questions about this announcement can be directed to Judy.Martinson@usda.gov or by calling 515-323-2229.

SUPPLEMENTARY INFORMATION:

I. PROGRAM DESCRIPTION

A. Legislative Authority

The Conservation Innovation Grants (CIG) program is authorized as part of the Environmental Quality Incentives Program (EQIP) (16 U.S.C. 3839aa-8). The Secretary of Agriculture delegated the authority for the administration of EQIP, including CIG, to the Chief of the Natural Resources Conservation Service (NRCS), who is Vice President of the Commodity Credit Corporation (CCC). EQIP is funded and administered by NRCS under the authorities of CCC.

B. Overview

The purpose of CIG is to stimulate the development and adoption of innovative conservation approaches and technologies in conjunction with agricultural production. CIG projects are expected to lead to the transfer of conservation technologies, management systems, and innovative approaches (such as market-based systems) to agricultural producers, into NRCS technical manuals and guides, or to the private sector. CIG generally funds pilot projects, field demonstrations, and on-farm conservation research. On-farm conservation research is defined as an investigation conducted to answer a specific applied conservation question using a statistically valid design while employing farm-scale equipment on farms, ranches or private forest lands.

C. Innovative Conservation Projects or Activities

CIG funds the development and field testing, on-farm research and demonstration, evaluation, or implementation of:

- Approaches to incentivizing conservation adoption, including market-based and conservation finance approaches; and
- Conservation technologies, practices, and systems.
- Demonstrate and evaluate coupling renewable energy with conservation

Projects or activities under CIG must comply with all applicable federal, tribal, state, and local laws and regulations throughout the duration of the project; and

- Use a technology or approach that was studied sufficiently to indicate a high probability for success;
- Demonstrate, evaluate, and verify the effectiveness, utility, affordability, and usability of natural resource conservation technologies and approaches in the field;
- Adapt and transfer conservation technologies, management, practices, systems, approaches, and incentive systems to improve performance and encourage adoption;
- Introduce proven conservation technologies and approaches to a geographic area or agricultural sector where that technology or approach is not currently in use.

Technologies and approaches that are eligible for funding in a project's geographic area using an [EQIP](#) contract for an established conservation practice standard are ineligible for CIG funding, except where the use of those technologies and approaches demonstrates clear innovation.

D. State Component

For FY 2020, NRCS accepts proposals that address one or more of the State priorities listed below.

CIG Priorities for FY 2020:

1) Habitat

The vast majority of Iowa is privately owned, and most privately-owned land in Iowa is engaged in agriculture. NRCS and its partners help farmers and private landowners address wildlife habitat needs through the conservation planning process and conservation practice implementation. The same practices that improve wildlife habitat often also help improve water quality, soil conservation and other resource concerns.

Projects must address one or more of the following issues:

- Demonstrate the environmental benefits (water quality/wildlife) of managed grazing practices.
- Demonstrate practices that benefit Monarch butterflies, pollinators and other wildlife.
- Evaluate the potential use of carbon credits in grasslands and grazing systems.
- Evaluate and quantify the economic and environmental benefits of converting existing row crop areas to perennial grazing systems.
- Evaluate the potential benefits of agro-forestry/forest management to woodland health.
- Evaluate practices that reduce gully erosion within forest lands.
- Demonstrate practices that benefit pollinators within forest lands.
- Evaluate and demonstrate the market viability of native perennial plantings.
- Evaluate and demonstrate the potential benefits of silvopasture.

2) Water Quality and Quantity

NRCS supports ongoing implementation of the Iowa Nutrient Reduction Strategy, projects that address impaired waters, will help implement source water protection, and projects at all scales to improve water quality. The scale and intensity of crop and livestock production in Iowa provide a myriad of challenges and opportunities related to water quality.

At the same time, increasing annual, seasonal and geographic variability of precipitation in the Midwest challenge farmers to manage cropland, grazing land and wildlife land to meet immediate economic needs and overall environmental goals.

CIG proposals must address one or more of the following water quality and/or quantity priorities:

- Demonstrate practices that protect source water quality, including practices that protect both groundwater and surface water sources of drinking water
- Evaluate and quantify the economic benefits of practices that improve water quality.
- Demonstrate practices that improve water quality, including practices that reduce bacteria levels and that improve the biological health of waters.
- Demonstrate creative ways to increase farmer's implementation of Iowa Nutrient Reduction Strategy practices.
- Demonstrate and evaluate economics, soil and water quality benefits of a three-year or longer extended crop rotation.
- Demonstrate and evaluate economics, and soil and water quality benefits of integrating manure/nutrient management and cover crops.

3) Soil Health

Soil Health Management Systems (SHMS) are a collection of NRCS conservation practices that focus on maintaining or enhancing soil health by addressing all four soil health planning principles: minimize disturbance, maximize soil cover, maximize biodiversity and maximize presence of living roots. A SHMS is a specific cropping system and contains practices that treat the entire field. When applied as a system, SHMS achieves the greatest soil health benefit by creating systemwide synergistic effects. Information obtained through soil health assessments can be used to develop a SHMS to target specific identified constraints.

NRCS invites proposals that support the adoption of SHMS in one or more of the following areas:

- Evaluate and quantify the economic and water quality benefits of practices that improve soil health.
- Validate techniques that evaluate soil health metrics and practices.
- Demonstrate the economics of cover crops.
- Evaluate cover crop species performance in monocultures and mixes.
- Evaluate and quantify the economic and environmental benefits of integrating managed grazing into cover crops.
- Evaluate and demonstrate the best management practices for managing different types of cover crops.

II. FEDERAL AWARD INFORMATION

It is anticipated that a total of up to \$350,000.00 in funding will be available for this announcement. The funding floor for a single award is \$25,000.00 and the funding ceiling for a single award is \$100,000.

Awards made through this announcement will be executed through a grant agreement between NRCS and the awardee.

NRCS accepts proposals for projects of one to three years in duration.

III. ELIGIBILITY INFORMATION

A. Applicant Eligibility

All U.S.-based non-Federal entities (NFE) and individuals, with the exception of Federal agencies, are eligible to apply for projects carried out in Iowa. Individuals and entities may submit more than one application and may receive more than one award.

B. Project Eligibility

All CIG projects must involve [EQIP](#)-eligible producers that meet EQIP's eligibility requirements listed in [7 CFR § 1466.6\(b\)\(1\) through \(3\)](#):

- Be in compliance with the highly erodible land and wetland conservation provisions (7 CFR Part 12).
- Be a person, legal entity, joint operation, Indian tribe, or native corporation who is engaged in agricultural production or forestry management or has an interest in the agricultural or forestry operation as defined in [7 CFR Part 1400](#).
- Have control of the land involved for the term of the proposed contract period.

C. EQIP Payment Limitation and Duplicate Payments

The following provisions apply to CIG funding:

- CIG funds are awarded through grant agreements. These grant agreements are not EQIP contracts; thus, CIG awards in and of themselves are not limited by the payment limitation found at section 1240G of the Food Security Act of 1985, 16 U.S.C. 3839aa-7, which imposes a \$450,000 payment limitation for all payments made to persons or legal entities under an EQIP contract entered into between FY 2019 and FY 2023.
- All agricultural producers receiving a payment through participation in a CIG project must meet the eligibility requirements of [7 CFR § 1466.6\(b\)\(1\) through \(3\)](#) noted above. In addition, all CIG payments are subject to the Adjusted Gross Income (AGI) limitation. All agricultural producers receiving a payment through participation in a CIG project must have an AGI that does not exceed \$900,000. If awarded a grant, grantees must self-certify and maintain records showing that participating producers

- receiving payments using CIG funding meet the EQIP eligibility and AGI requirements. Section 1704 (a)(3) of the 2018 Farm Bill states the Secretary may waive the AGI limit on a case by case basis, if the Secretary determines that environmentally sensitive land of special significance would be protected as a result of such waiver. CIG grantees may request waivers once their project commences.
- Section 1240B of the Food Security Act of 1985, [16 U.S.C. 3839aa-2](#), prohibits duplicative payments. Accordingly, direct or indirect payments cannot be made for a practice for which an individual or legal entity has already received funds, or is contracted to receive funds through any USDA conservation program (e.g., Conservation Reserve Program, EQIP, Agricultural Management Assistance, Conservation Stewardship Program). If awarded a grant, grantees must self-certify that payments to producers using CIG funding are not duplicative.

D. Cost Sharing/Matching Requirements

CIG recipients must provide a non-federal funding match or cost-share amount at least equal to the amount of federal funding requested. Applications that do not include cost-sharing will be ineligible for award. Cost sharing may be achieved with contributions of cash, services, materials, equipment, or third party in-kind contributions. See [Section IV, subsection 8](#) of this announcement for information on cost share/match.

E. Technical Assistance for CIG Projects

Conservation Innovation Grants are Grant Agreements and as such do not provide for substantial involvement between NRCS and the grantee in carrying out the activity contemplated by the federal award. The technical assistance required to carry out a project is the responsibility of the grantee. NRCS designates an NRCS employee as a Technical Contact for each grant award. Technical contacts provide oversight activities during the project, such as site visits, reviewing performance reports, financial reports, and audits to ensure that standards, objectives, terms, and conditions for the projects are accomplished, but will not be substantially involved in carrying out the activity contemplated by the federal award.

F. SAM.gov Exclusions Database

Applicant entities identified in the SAM.gov Exclusions database as ineligible, prohibited/restricted or excluded from receiving Federal contracts, certain subcontracts, and certain Federal assistance and benefits will not be considered for Federal funding, as applicable to the funding being requested under this Federal program (2 CFR 200.205(d)).

IV. APPLICATION AND SUBMISSION INFORMATION

There is no pre-proposal process for this announcement. All standard forms necessary for CIG application submission are included in the [grants.gov](#) application package.

A. Executive Order (EO) 12372

This funding opportunity is not subject to Executive Order 12372, “Intergovernmental Review of Federal Programs.”

B. Content and Format

Applications must contain the content, format, and information set forth below to receive consideration for funding. Submit a separate application for each project if submitting more than one. Applicants should not assume prior knowledge on the part of NRCS or others as to the relative merits of the project described in the application. Applicants must submit a single copy of the application in the following format:

- Each page must be on numbered, letter-sized (8½” x 11”) paper using a white background that has one-inch margins; and
- The text of the application must be typed, single spaced, black, and in a font no smaller than 12-point.

Applications that are incomplete or fail to comply with the required content and formatting requirements will not be considered for funding.

1. Project Abstract (1 page maximum).

On a single page, provide the following information:

- The applicant entity name.
- The duration of project in months.
- The amount of federal funding requested.
- The amount of non-federal cost-share/match funding committed.
- The project title.
- The geographic location of the project.
- A brief project description - describe in non-technical language the issue or problem, the objectives to address the issue or problem, the innovative approach to be employed (including the role of participating partners, if applicable), how the impact will be quantified, and the predicted benefits or deliverables of the project.
- The State priority that is being addressd by the project. List one priority from section I.D. above. If the proposal addresses more than one priority, please use your discretion to select the one that is the best fit.
- A technical and administrative contact for the project. NRCS will use the technical and administrative contacts identified as the primary applicant contacts.

2. *Standard application form.*

“Standard Form 424, Application for Federal Assistance” and instructions to complete it are included in the application package posted on grants.gov.

3. *Project Narrative (15-page maximum).*

The project description must include the following information in order. A sample project description is included in the application package on grants.gov.:

- a. **Project background:** Describe the issue or problem driving the need for the proposed innovation. Provide evidence that the proposed innovation has been studied sufficiently to indicate a high probability for success of the project.
- b. **Project objectives:** Be specific using qualitative and quantitative measures, if possible, to describe the project’s purpose, goals, and objectives. Describe how the project is innovative. If the project is addressing a NRCS Conservation Practice Standard, or proposing a new standard, please state this explicitly and identify the standard.
- c. **Project methods:** Describe clearly the methodology of the project and the tools or processes that will be used to implement the project.
- d. **Geographic location and size of project or project area:** Identify the geographic location and the relative size and scope (e.g., acres, farm types, demographics, etc.) of the project area. Maps are highly recommended.
- e. **EQIP eligible producer participation:** Estimate the number of EQIP eligible producers involved in the project, and describe the type and extent of their involvement.
- f. **Project action plan and timeline:** Provide a table listing project actions, timeframes, and associated milestones through project completion. Applicants should develop their timelines based on a project start date of September 15, 2020.
- g. **Project management:** Give a description of how the project will be organized and managed, including a list/description of project partners. Include a list of key technical and administrative personnel, their experience managing federal awards, and their anticipated contributions to the project. Also, include a description of how communication will be structured within the project team to ensure effective project management. Do not include resumes or CVs.
- h. **Project deliverables/products:** Provide a list of specific deliverables and products that will allow NRCS to monitor project progress and approve payments. The proposal must include a set of technical deliverables designed to evaluate the performance and broader applicability of the project. In addition to project-specific deliverables, selected grantees are responsible for:
 1. Participation in at least one event (e.g., conference or workshop) during the grant period where the grantee presents on the activities of the project, with notification of the NRCS technical contact;
 2. Participation in a 15-30 minute presentation to the Iowa State Technical committee;
 3. A final fact sheet for use in public settings;
 4. Closing event – could be a webinar, field day, training event, etc., with notification of the NRCS technical contact.

5. Submission of the Iowa NRCS Semi-Annual report (every 6 months) and the Iowa NRCS Final Report (within 90 days of completion of the project.) Both documents will be provided to successful applicants.
 - i. Project evaluation: Describe the methodology or procedures used to evaluate the project, determine technical feasibility, quantify the results of the project, and ensure project objectives were impactful.
 - j. Benefits or results expected and transferability: Identify the results and benefits derived from the project. Identify project beneficiaries, i.e., agricultural producers by type, region, or sector; Historically Underserved producers and communities; rural communities; and/or municipalities. Describe how the results will be communicated to others via outreach activities and how these entities will benefit. Forecast the lasting impact of project results.
 - k. Graphics – including pictures, charts, graphs and similar items – count towards the 15-page maximum.
 - l. References, bibliographies, and citations, if included, do not count towards the 15-page maximum.

4. *Assessment of environmental impacts.*

If implementation of the proposal is anticipated to have physical, chemical, or biological impacts on the environment, please describe the impacts and their extent. The description of the potential environmental impacts must address both beneficial and adverse impacts of the proposed action. The length of the description should be commensurate with the complexity of the project proposed and the natural environmental resources impacted directly, indirectly, or cumulatively. Where possible, information on environmental impacts should be quantified, such as number of acres of wetlands impacted, amount of carbon sequestration estimated, etc. Natural environmental resources include soil, water, air, plants, and animals, as well as other resources protected by law, regulation, executive order, and agency policy. NRCS may choose not to approve funding for projects that may result in unacceptable adverse environmental impacts.

Every funded CIG project that involves ground disturbance activities is subject to the National Environmental Protection Act (NEPA). NRCS must complete an environmental review of each awarded project before project commencement. Applicants may be required to prepare and pay for preparation of an Environmental Assessment (EA) or Environmental Impact Statement (EIS), should the environmental review find that an EA or EIS is required.

In addition, a National Historic Preservation Act (NHPA) Section 106 review and consultation by NRCS State or area office with consulting parties (such as the pertinent State Historic Preservation Officer and federally recognized Indian Tribes) may be required prior to the implementation of project activities that have the potential to impact cultural resources. NHPA Section 106, its implementing regulations (36 CFR Part 800), and other related authorities, require federal agencies to determine if a project has the potential to cause an effect to historic properties and, if so, if they are adverse and how the effects may be addressed. The NHPA review and compliance in accordance with Section 106 of NHPA and implementing regulations at 36 CFR Part 800 must be completed by NRCS and applicants may be required to pay for any cultural resource surveys needed for NRCS to assess CIG project effects. More information on the applicants role in NHPA Section 106 process can be [found here](#).

5. *Budget Information, (12-page maximum).*

The budget portion of the application consists of two parts, as described below:

- a. Standard Form (SF) 424A Budget Information – Non-Construction Programs. The SF-424A is included as part of the application package posted on Grants.gov. Section B, Item 6, Column 1 should reflect the agency funds, and Column 2 should reflect the applicant’s matching funds. This form is the summary budget for the project. See Instructions for Completing SF 424A located in the Related Documents tab of this announcement on Grants.gov.
- b. Detailed Budget Narrative. Provide a detailed narrative in support of the budget for the project broken down by each project year. Detail how the totals on the SF-424A were determined and demonstrate a clear connection between costs and the proposed project activities. Justify the project cost effectiveness and include justification for personnel and consultant salaries with a description of duties. Statement(s) of work for any subcontractors and consultants must be included as part of the application. The budget narrative should include both the federal funds requested and the applicant’s matching funds.

The budget narrative must be in text format with no charts, spreadsheets, or tables. It should be readable on letter-size, printable pages. The information needs to be presented in such a way that the reviewers can readily understand what expenses are incurred to support the project.

Note: Please include \$3,000 in the budget for project travel required by NRCS. These funds are required and can be part of the Federal portion, the applicant’s matching funds, or a combination of both. Any additional travel required for completion of the project must be considered additional to this \$3,000.

6. *Funding Restrictions*

CIG funds may not be used to pay any of the following costs unless otherwise permitted by law or approved in writing by the Authorized Departmental Officer in advance of incurring such costs:

1. Costs above the amount of funds authorized for the project;
2. Costs incurred prior to the effective date of the grant (preaward costs);
3. Costs which lay outside the scope of the approved project and amendments thereto;
4. Entertainment costs, regardless of their apparent relationship to project objectives;
5. Compensation for injuries to persons or damage to property arising out of project activities;
6. Consulting services performed by a federal employee during official duty hours when such consulting services result in the payment of additional compensation to the employee; and
7. Renovation or refurbishment of research or related spaces, the purchase or installation of fixed equipment in such spaces, and the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

This list is not exhaustive. For more details, refer to [2 CFR 200](#).

Profit is not an eligible project cost. Therefore, any funds awarded to for-profit entities must be used for reimbursement of award related direct and indirect costs only.

Individuals applying for a CIG award may not include any indirect costs in the proposed budget.

7. Indirect (F&A) costs.

To be eligible to recover any indirect costs under a federal award, an applicant must either 1) have a current negotiated indirect cost rate agreement (NICRA) with its cognizant federal agency that has not expired or 2) qualify for use of the de minimis rate of 10% of the modified total direct costs (MTDC) as authorized by 2 CFR 200.414(f). In order to qualify for the de minimis rate, the applicant must not have, or have previously held, a NICRA. A State, local, or tribal governmental department or agency unit that receives more than \$35 million in direct federal funding is not eligible for the de minimis rate.

Applicants with a NICRA must calculate indirect costs using the rate and base specified in their NICRA. The total amount of indirect costs is entered in Section B, Row J, of the SF-424A (Budget Information). A copy of the applicant's current NICRA must be provided with the application. If the applicant does not have a current NICRA, indirect costs may not be recovered under an expired NICRA. A new NICRA can be negotiated with its cognizant federal agency, which is the agency that provides the applicant entity its largest amount of federal funding.

Entities that are eligible for the de minimis rate who already have a de minimis rate agreement must use the rate and base specified in the agreement, which is modified total direct costs (MTDC) as defined by 2 CFR 200.68 and also excluding the amount of each subcontract exceeding \$25,000. Note that MTDC excludes certain costs from the base to which the rate is applied. A copy of the applicant's de minimis rate agreement must be provided with the application. If a recipient is eligible to use the de minimis rate, but does not have a de minimis rate agreement, use an indirect cost rate of no more than 10% of MTDC when preparing the budget and state in the budget narrative that a de minimis rate agreement is requested. If selected for award, a de minimis rate agreement will be executed along with the award.

An applicant may voluntarily reduce or waive recovery of indirect costs at their sole discretion and must not be encouraged or coerced in any way to do so by the NRCS. If voluntarily reduced or waived, the applicant may choose to apply any unrecovered indirect costs as part of their cost share or match. Unrecovered indirect cost are the difference between the amount charged to the federal award and the amount which could have been charged to the federal award under the applicant's approved negotiated indirect cost rate (2 CFR 200.306(c)).

8. Cost Share or Matching Funds.

Selected applicants may receive CIG grants of up to 50 percent of their total project cost. CIG recipients must provide a non-federal funding match or cost-share amount at least equal to the amount of federal funding requested. For example, if an applicant requests \$50,000 in CIG funding, at least \$50,000 in non-federal cost-share or matching funds must be committed by the applicant.

Matching funds may be committed by the applicant, project partners, or both and can be a combination of cash and in-kind contributions. Examples of in-kind contributions include work done by unpaid volunteers and donations of supplies, facilities, or equipment. In-kind contributions identified in the project budget must be quantifiable, verifiable, and necessary to accomplish program activities.

Cost sharing/matching must be committed at the time of application submission. Cost sharing or matching funds must meet the criteria stated at 2 CFR 200.306 and be valued in accordance with 2 CFR 200.306(d). Additional details about cost sharing or matching funds/contributions is located at 2 CFR 200.306.

All matching funds must be identified in both the SF-424A and budget narrative components of the application. Project partners (other than the applicant) must provide commitment letters for all cash and in kind matching contributions. A separate commitment letter is required for each cash and/or in-kind match contribution. Commitment letters must be signed by the authorized organizational representative of the contributing organization and the applicant organization and must include: (1) the name, address, and telephone number of the project partner; (2) the name of the applicant organization; (3) the title of the project for which the contribution is made, (4) the dollar value of the contribution; and (5) a statement that the contributor commits to furnish the contribution during the grant period. A sample commitment letter is included as part of the application package on grants.gov.

Applications without signed written commitments covering the full value of the matching contribution are deemed incomplete.

The value of applicant contributions to the project is established according to federal cost principles. Applicants should refer to [2 CFR 200.306](#) for additional guidance on matching funds, in-kind contributions, and allowable costs.

9. Declaration of previous CIG projects involvement and past performance.

If the applicant has previously received a CIG award (either at the National or State levels), please list the following for each award:

- Project Title
- CIG agreement number
- Award funding amount
- Year of Award

10. Certifications.

All proposals must include the following signed certification forms, which are available at grants.gov:

- SF-424B, Assurances for Non-Construction Programs. Must be completed by applicants that are individuals.
- Certification Regarding Lobbying. Must be completed by all applicants.

11. *Letters of support.*

Letters of support for the project from individuals or entities that are not project partners may be submitted and should be placed at the very end of the application package. Letters of support may not come from Iowa NRCS employees or representatives.

12. *Risk Review Documentation*

NRCS may request additional documentation from selected applicants in order to evaluate the financial, management, and performance risk posed by awardees as required by 2 CFR 200.205. Based on this risk review, NRCS may apply to a CIG award special conditions that correspond to the degree of risk assessed.

C. DUNS and SAM Numbers

Each applicant (unless the applicant is an individual excepted from those requirements under 2 CFR §25.110(b) or (c), or has an exception approved by the federal awarding agency under 2 CFR §25.110(d)) is required to: (i) Be registered in the System for Award Management (SAM) before submitting its application; (ii) provide a valid unique entity identifier (Data Universal Numbering System (DUNS) number) in its application; and (iii) continue to maintain an active SAM registration with current information at all times during which it has an active federal award, application, or plan under consideration by a Federal awarding agency. NRCS may not make a federal award to an applicant until the applicant complies with all applicable unique entity identifier and SAM requirements and, if an applicant does not fully comply with the requirements when the NRCS is ready to make a federal award, NRCS may determine that the applicant is not qualified to receive a federal award and use that determination as a basis for making a federal award to another applicant.

NFEs must obtain a DUNS and register in SAM prior to registering with Grants.gov. NFEs are strongly encouraged to apply early for their DUNS number and SAM registration.

1. **Data Universal Numbering System (DUNS) Number:** A Dun and Bradstreet DUNS number is a unique, nine-digit sequence recognized as the universal standard for identifying and keeping track of over 70 million businesses worldwide. CIG applicants must obtain a DUNS number. Information on how to obtain a DUNS number can be found at <http://fedgov.dnb.com/webform> or by calling 1-866-705-5711.
2. **System for Award Management (SAM) Registration:** SAM is the official Federal system that consolidated the capabilities of Central Contractor Registry, Federal Agency Registration, Online Representations and Certifications Application, and Excluded Parties List System. To register, go to: <https://www.sam.gov/portal/public/SAM/>. The Federal Service Desk is available for registration assistance, and can be contacted via the Help tab at the website listed above.

D. How to Submit an Application

Applications must be submitted through the Grants.gov web portal by 5:00 p.m. Central Standard Time on June 26, 2020 and by emailing a pdf copy of the full application to

Judy.Martinson@usda.gov with a cc to Carolyn.Christian@usda.gov. Note in the message line of the email: FY20 CIG [organization name] [proposal name]. You are encouraged to keep the name of your proposal short. Attachments must be named and emailed as separate documents. Do not send as one adobe document or as a compressed (i.e. zipped) files. Attachment names must reflect the name of the organization and the form name (Example: Cambridge University_SF-424A) If it takes more than one email to send the attachments, number the emails in the message line (example: three emails would be numbered 1 of 3, 2 of 3, and 3 of 3)

Submitting a CIG application through www.grants.gov requires a number of tasks. There are several preliminary registration steps before an applicant can submit the application. To register in the grants.gov system, go to www.grants.gov, click on “Applicants,” and then click on “Get Registered.”

If you have completed a prior grants.gov application, you may already have completed the registration process.

Please allow sufficient time to register in grants.gov, and for possible system delays. An overview of Workspace can be viewed through grants.gov ([WEBINAR - Getting Started with Workspace: Become a Workspace Wizard](#)).

Below are instructions for accessing the forms necessary to complete an application in grants.gov:

- Go to www.grants.gov.
- Select the “Applicants” tab.
- Select the “Apply for Grants” heading.
- Click on “Get Application Package.” Follow all steps.
- All necessary forms are included within the grants.gov “Application Package.”
- Provide the “Funding Opportunity Number” listed on page 1 of this announcement or return to the [“Search Grants”](#) section.

Applications not received by the submission due date and time will not be accepted. The emailed application must be assembled into one pdf file document in the order specified in [section IV, part A](#). All applications must contain all of the elements of a complete package and meet the requirements described in this announcement. Grants.gov provides instructions for submitting the required application items through the portal. An application’s receipt date and time will be determined by the respective system-generated documentation of receipt date and time (grants.gov provides date and time stamps for all proposals submitted through the portal).

NRCS is not responsible for any technical malfunctions or website problems related to grants.gov or emailed submissions. If you encounter issues with grants.gov, please contact the grants.gov help desk at (800) 518-4726 or support@grants.gov. The applicant assumes the risk of any delays in application submission through grants.gov and therefore is encouraged to submit your application early to ensure there is time to work out unforeseen issues.

E. Due Date

Proposals must be received by 5:00 p.m. Central Standard Time on June 26, 2020. Application receipt date and time will be determined by the respective system-generated documentation of receipt date and time (grants.gov provides date and time stamps for all proposals submitted through the portal). The applicant assumes the risk of any delays in application receipt.

F. Acknowledgement of Submission

Grants.gov provides receipt of application submissions. NRCS acknowledges receipt of proposals received by the submission deadline via email. An applicant who does not receive such an email acknowledgement within 15 business days of the submission deadline, but believes the proposal was submitted on time, must [contact the CIG program](#) within 30 business days of the submission deadline. Failure to do so may result in the proposal not being considered.

G. Withdrawal

Proposals may be withdrawn by written notice at any time before award execution. Written notice of withdrawal must be signed by the applicant or an authorized representative.

V. APPLICATION REVIEW INFORMATION

Proposals will be initially screened for completeness and compliance with the provisions of this announcement. Incomplete or noncompliant proposals will be eliminated from competition prior to initiation of the peer review process.

A. Application Evaluation Criteria

Risk Criteria Evaluation

In accordance with 2 CFR 200.205, NRCS will review risk posed by applicants. This screening process includes:

- 1) Confirming the NFE does not have an active exclusion in SAM precluding it from eligibility receipt of an award (i.e., suspended or debarred; see [2 CFR Part 180](#) and [7 CFR Part 417](#)).
- 2) Confirming the NFE does not have adverse information located in the [Federal Awardee Performance and Integrity Information System \(FAPIIS\)](#).

Merit Criteria Evaluation

The technical peer review panels use the following criteria, using a 100 point scale, to evaluate applications:

1. Purpose, Approach, and Goals (25 points)
 - a. The purpose of the project is clearly explained and the rationale is explicit for why the innovative approach or technology is needed.
 - b. The design and implementation of the project is based on sound methodology and demonstrated technology;
 - c. The project outcomes are stated, measurable, and likely to be achieved; and
 - d. Both beneficial and adverse impacts are considered and a significant level of improvement will be achieved.

2. Innovative Technology or Approach (25 points)
 - a. The project is innovative (national, regionally, and/or local) according to the criteria for innovation in the CIG funding announcement.
3. Project Management (20 points)
 - a. Timeline and milestones are clear and reasonable;
 - b. Project staff has necessary technical and administrative expertise;
 - c. The budget is adequately explained and justified, and expenses are allowable, allocable, and reasonable; and
 - d. Proposal includes robust partnership with entities that can substantially assist with delivery of project outcomes with clear project management structure and team communication laid out.
4. Benefits and Transferability (30 points)
 - a. An evaluation plan is documented that clearly lays out how project work will be assessed and the results transferred:
 - b. There is potential for producers and landowners to use or participate in the innovative technology(s) or approach(s);
 - c. There is potential for NRCS to benefit from the innovative approach or methods, including (if appropriate) the development of materials such as technical standards, technical notes, handbooks, technology tools, etc.;
 - d. There is potential to transfer the approach or technology to a broader audience or to other geographic areas or agricultural sectors; and
 - e. The potential for successful transfer, through planned project activities, to Historically Underserved producers and communities.

Partner matching contributions are considered an eligibility criterion as described in [this section of the notice](#), and will not be considered in the evaluation.

B. Review and Selection Process

Proposals that pass the initial screening are then evaluated using a two part process:

- Technical peer review panels composed of subject matter experts evaluate the proposals. Proposals are evaluated against the CIG Proposal Evaluation Criteria [listed here](#). The technical peer review panels forward their recommendations to the State Conservationist.
- The State Conservationist makes the final award selections based on the recommendations of the peer review panels.

C. Anticipated Announcement and Award Dates

NRCS anticipates announcing CIG selections through a USDA press release no later than September, 2020. Applicants should plan their projects based on a project start date of September 15, 2020.

VI. FEDERAL AWARD ADMINISTRATION INFORMATION

A. Federal Award Notices

Successful Applicants

A successful applicant can expect to receive official notification by email from NRCS State

Office Staff. Awardees may not begin their project until a fully executed grant agreement has been signed by both NRCS and the awardee. The notice of federal award form (NRCS-ADS-093) signed by the authorized agency official is the only authorizing document, and will be provided electronically to the applicant's authorized official. Any pre-award costs incurred by the awardee will not be reimbursed.

Unsuccessful Applicants

Applicants whose proposals are not selected for funding will receive feedback on their proposal. This evaluation will be emailed to the technical and administrative contacts listed in the proposal within 90 days of the announcement of CIG selections. Please do not contact NRCS requesting an evaluation prior to the end of this 90-day period.

B. Administrative and National Policy Requirements

All project funds will be used in accordance with 2 CFR 200 and NRCS' *General Terms And Conditions Grants And Cooperative Agreements*. A copy of the *General Terms And Conditions Grants And Cooperative Agreements* document may be obtained by contacting the Agency Contacts listed in [Section VII](#) below.

Patents, Inventions, and Copyrights

Allocation of rights to patents, inventions, and copyrights shall be in accordance with [2 CFR Part 200](#). This regulation provides that small businesses normally may retain the principal worldwide patent rights to any invention developed with USDA support. In accordance with 2 CFR Part 200, this provision will also apply to commercial organizations for the purposes of CIG. USDA receives a royalty-free license for federal use, reserves the right to require the patentee to license others in certain circumstances, and requires that anyone exclusively licensed to sell the invention in the United States must normally manufacture it domestically. With regard to copyright, the grant recipient may copyright any work that is subject to copyright and was developed, or for which ownership was acquired, under an award. USDA reserves a royalty-free, nonexclusive, and irrevocable right to reproduce, publish, or otherwise use the work for federal purposes and to authorize others to do so.

All tools produced must meet the accessibility of Electronic and Information Technology (EIT) requirements as specified in Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. 794d) as amended by the Workforce Investment Act of 1998 (P.L. 105-220). Specifically, subsection 508(a)(1) requires that when the federal government procures EIT, it must allow federal employees and individuals of the public with disabilities comparable access to and use of information and data that is provided to federal employees and individuals of the public without disabilities. All EIT that is subject to the 36 CFR 1194 standards will have a Section 508 acceptance test and will be validated upon acceptance. All maintenance for EIT that requires upgrades, modifications, installations, and purchases will adhere to the Section 508 standards and 36 CFR 1194. [Contact the CIG program contact](#) with specific questions with regard to the applicability of this section.

C. Reporting

Reporting details are included in the fully executed grant agreement. Reporting will generally include electronic submission of semiannual progress reports, annual financial status reports, and final reports.

If the Federal share of any agreement awarded under this opportunity notice may include more than \$500,000 over the period of performance, recipients must also comply with the post award reporting requirements reflected in Appendix XII of 2 CFR Part 200 —Award Term and Condition for Recipient Integrity and Performance Matters.

Applicants that receive awards pursuant to this opportunity and any sub awardees must comply with the reporting requirements described at 2 CFR Part 170, unless an exception applies. Applicants must ensure they have the necessary processes and systems in place to comply with those requirements. A list of exceptions can be found at 2 CFR 170.110(b).

VIII. OTHER INFORMATION

A. Freedom of Information and Privacy Act

CIG proposals are considered to be confidential information. Proposals are not shared with individuals or entities seeking public disclosure through the Freedom of Information Act (FOIA) without the consent of the applicant. More specifically, Executive Order 12600 and USDA FOIA regulation 7 CFR Part 1, Subpart A require the NRCS to provide notice to applicants that a third party has requested copies of their business information, and requires NRCS and to consult with applicants regarding the releasability of their records.

B. National Component

The USDA NRCS CIG program has two components – the “National Competition” and the “State Competition.” This announcement is for the “State Competition” component. More information about the National Competition is available [here](#).

C. Notice to Applicants

The Federal Government is not obligated to make any Federal award as a result of this announcement. Only authorized federal officials can bind the Federal Government to the expenditure of funds.

U.S. Department of Agriculture Non-Discrimination Statement

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at <https://www.ascr.usda.gov/filing-program-discrimination-complaint-usda-customer> and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call

(866) 632-9992. Submit your completed form or letter to USDA by:

(1) mail: U.S. Department of Agriculture

Office of the Assistant Secretary for Civil Rights

1400 Independence Avenue, SW

Washington, D.C. 20250-9410;

(2) fax: (202) 690-7442; or

(3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.
