

# MO 2019 EQIP-RCPP Conservation Ranching Program

## Environmental Quality Incentives Program Policy for the 2017 RCPP Project with Missouri Department of Conservation

October 26, 2018

This Policy is based on the Final Rule for EQIP, Federal Register 7 CFR Part 1466 published May 12, 2016.

This policy covers financial assistance to eligible producers with acres located in the following counties: Barry, Barton, Bates, Benton, Camden, Cedar, Christian, Clinton, Crawford, Dade, Dallas, Dent, Douglas, Greene, Henry, Hickory, Howell, Jasper, Laclede, Lawrence, Lincoln, McDonald, Miller, Morgan, Ozark, Phelps, Polk, Pulaski, St. Clair, Stone, Taney, Texas, Vernon, Webster and Wright.

NRCS will verify Beginning Farmer, Limited Resource Farmer, and/or Veteran Farmer status prior to contract obligation. There is no verification process for participants who self certify as Socially Disadvantaged. All practices must meet the minimum criteria in the Conservation Practice Standard (see the Missouri eFOTG) and the criteria listed below.

If the applicant is a tenant, the applicant must obtain written evidence or assurance of control from the landowner prior to contract obligation. Control may be a written lease, other legal agreement, or letter signed by the landowner indicating the length of control. Zero payment share landowner signature on the contract document does not demonstrate control of land.

Payment Scenarios - Each conservation practice listed in this policy has one or more payment scenarios available. The scenario nomenclature is determined by NRCS at the regional or national level. Where the scenario name is not descriptive enough to cover all the State Conservationist and State Technical Committee approved uses of the scenario for Missouri, a footnote has been added directly below the scenario name to clarify its use in planning and contract development.

Management Practices - Management practice payments are only available on acres where the practice has not been previously applied (with or without financial assistance), or where the practice will result in a higher level of conservation benefit.

Structural Practices - Structural practices include conservation practices that are either structural or vegetative, and have a multi-year lifespan. Structural practices involve the establishment, construction, or installation of site-specific measures. Payments are established as a one-time payment. In addition to control of land, tenants must obtain and provide to NRCS prior to obligation written concurrence from the landowner to apply a structural or vegetative practice. In lieu of written concurrence, the landowner may be a signatory to the contract with 0% payment shares to indicate their concurrence.

Maximum Payments - Maximum payments, where identified in this policy, are implemented at the contract item (CIN) Level in ProTracts by using the Cost Share Cap input box. The contract may have multiple CINs for a practice, however each CIN must be capped utilizing the Cost Share Cap input box at the Maximum Payment level identified in this policy.

An additional 15% of the payment will be provided to participants by the Missouri Department of Conservation following practice implementation for all practices EXCEPT: (383) Fence, (561) Heavy Use Area Protection, (516) Livestock Pipeline, (533) Pumping Plant, (642) Water Well, and (614) Watering Facility

Cover Crop/Native Warm Season Grass Establishment: This practice will utilize 340 Cover Crop in conjunction with 512 Forage and Biomass Planting to establish native warm-season grass. Limited grazing will be allowed during the first and second year of grass establishment.

Practice Code	Conservation Practice	Maximum Payment	HU Maximum Payment	Practice Unit/ Payment Unit	Payment Rate	HU Payment Rate 1/	Lifespan (Years)
472	<b>Access Control</b> <b>Structural</b>			Acre			10
	<b>Animal exclusion from sensitive areas</b>			Acre	\$32.24	\$42.87	

1 Payment is only authorized to exclude livestock from Riparian Areas and only if livestock currently have access to the area to be excluded at the time of EQIP application. An EQIP funded Permanent Fence (382) is required in conjunction with this practice.

2 Excluded area must meet a minimum distance of 50 ft from the edge of the stream up to a maximum of 180 ft.

3 Payment is based on the number of acres protected from livestock.

4 To avoid duplicate foregone income payments, (472) Access Control payment is not authorized on the same acres as financial assistance for (327) Conservation Cover.

5 See the (472) Access Control conservation practice standard.

	<b>Linear Tree Removal for Grassland Bird Habitat</b>			Acre	\$970.09	\$1,164.10	

- 1 This practice is authorized for the treatment of woody plants on all non-cropland areas (including those that are invasive, exotic and noxious). Payment is not eligible on cropland or forestland.
- 2 Sites infested with the following species are eligible for multiple years of treatment: non-native Honeysuckles, Autumn Olive, Multiflora Rose and Callery Pear. Per 440 CPM 512.81D, a site specific technical determination must be documented that identifies the species of concern and additional treatments necessary to achieve effective control.
- 3 This practice is not to be used for conversion of woodlands or forests to grassland; such as the removal of woody vegetation to establish or re-establish grass cover (See IS-MO-314).
- 4 Payment is not for site preparation activities for a new seeding or re-seeding, or maintenance/management of a new seeding or re-seeding. Where additional site preparation activities are needed for adequate seedbed prep a waiver can be requested from the State Office.
- 5 Clipping/mowing as a stand alone treatment is not authorized for payment.
- 6 Practice is not authorized for payment on the same acres as (649) Structures for Wildlife.
- 7 When addressing pasture or hayland resource concerns, this practice is only authorized when used in conjunction with an approved RCPP grazing plan.
- 8 See the (314) Brush Management conservation practice standard and Information Sheet IS-MO-314.

*Woven Wire fence is not eligible for financial assistance under this policy.*

1 This practice is only authorized as a component of a (528) Prescribed Grazing, (472) Access Control to exclude livestock from areas that need protection, confine livestock to an area, control domestic livestock while permitting wildlife movement, and/or subdivide grazing acres to facilitate the use of a (528) Prescribed Grazing system.

2 Only one Fence payment can be earned for each length/reach of fence (i.e., multiple options can not be stacked on the same running length/reach of fence).

3 Boundary fence (property line fence) or Perimeter fence is only eligible under the following three exceptions; (1) on expired (2 years or less) or expiring Conservation Reserve Program (CRP) land to establish a grazing operation; (2) on land to protect, restore, or enhance an environmentally sensitive area, such as riparian area or wetland; (3) on land to facilitate a change in production systems per the requirements of section 515.81D(4). Refer to 440 CPM 515.81E, 515.52C and 515.81D(4) for complete policy guidance.
