

Headwaters Loramie Creek Watershed

2021 Mississippi River Basin Priority Watershed Project

Mississippi River Basin Initiative: Ohio

MRBI supports each state's nutrient loss reduction strategy with overall goals of improving water quality, restoring wetlands, and enhancing wildlife habitat while ensuring the economic viability of agricultural lands along the nation's largest river.

Together, Ohio NRCS and Shelby Soil and Water Conservation District will utilize \$127,663 to implement core water quality practices in the Headwaters Loramie Creek Watershed including: drainage water management, cover crops and 4R nutrient management.
