

Locally Led Conservation for SWCD Supervisors

Strengthening Impacts Through Our Local Working Groups

March 2020 Recording

MASWCD and NRCS are pleased to share the recording from an online training session done in March for elected supervisors on locally led conservation with a specific focus on Local Working Groups (LWG). USDA Natural Resource Conservation Service, by federal guidance, requires convening of Local Working Groups to invite input from a broad group of citizens. The training complemented a 4-part staff training series also in March.

For ease of use, start times are noted on the agenda for each section.

Local Led Conservation II for SWCD Supervisors
