

Dimensions in Inches or Feet

DETAIL A — SLOTTED INLET

1. *Slotted inlets must be fabricated from corrugated metal, smooth steel or PVC plastic pipe. Materials must have at least the minimum wall thickness given in the standard dimensions table (PVC pipe with a SDR of 41 or less will meet minimum wall thickness requirements).*
2. *Slots must be cut cleanly and deburred. Ends of slots may be round or square.*
3. *Orifice plate cap, and all fittings must be snug and securely fastened. Orifice plate must be cleanly cut and free of burrs, with care taken not to round the edges.*
4. *An optional break-away coupling may be placed 6–8 inches below ground.*

[illegible]

- .10" for Metal or Fiberglass
- .25" for Plastic or PVC

DETAIL B — ORIFICE PLATE

Not to Scale
