Overview
The Environmental Quality Incentives Program (EQIP) provides technical and financial assistance to producers to address natural resource concerns and deliver environmental benefits such as improved water and air quality, conserved ground and surface water, reduced soil erosion, and improved or created wildlife habitat.

Benefits
Through EQIP, NRCS provides agricultural producers with one-on-one help and financial assistance to plan and implement improvements, or what NRCS calls conservation practices. Together, NRCS and producers invest in solutions that conserve natural resources for the future while improving agricultural operations.

Program at a Glance
NRCS will help you develop a conservation plan that meets your goals and vision. This plan becomes your roadmap for selecting the right conservation practices for your land. NRCS offers about 200 unique practices designed for working farms, ranches, and forests.

NRCS financial assistance can cover part of the costs of implementing conservation practices.

Who is Eligible?
Farmers, ranchers, and forest landowners who own or rent agricultural land are eligible. EQIP assistance can be used on all types of agricultural operations, including:

- Conventional and organic
- Specialty crops and commodity crops
- Forestry and wildlife
- Historically underserved farmers*
- Livestock operations

*Increased and advance payments available for historically underserved producers (beginning, limited resource, socially disadvantaged, and military veterans.)

How to Apply
Apply at your local USDA Service Center, which you can find at farmers.gov/service-locator.

Applications for EQIP financial assistance are accepted throughout the year. Specific state deadlines are set for ranking and funding. If your application is ranked and selected, you will enter into a contract with NRCS to receive financial assistance for the cost of implementing conservation practices. Payment rates for conservation practices are reviewed and set each fiscal year.

More Information
