

Natural Resources Conservation Service

U.S. DEPARTMENT OF AGRICULTURE

Natural Resource Specialist

NATURAL RESOURCES CONSERVATION SERVICE

Natural Resource Specialist

Duties

A Natural Resource Specialist implements a broad-based natural resources program for the agency. As a Natural Resource Specialist, you will perform a variety of duties related to carrying out a coordinated natural resources conservation program to assist landowners in meeting their conservation objectives and the resource concern solution needs of NRCS and the USDA, which results in the enhancement of conservation program delivery with an impact that goes from farm to national communities.

You'll use available reference materials to understand the existing conditions such as soil survey information, soil maps, review of aerial imagery to prepare for the on-site evaluation visit with the customer. You will assist the District Conservationist with the on-sites evaluations and discussion with the customer. You will then assist in planning and evaluating the various natural resources to ensure proper consideration is given to resource conservation and protection measures. The solutions to the resource concerns of the conservation practices are linked to available program delivery for financial assistance.

Qualifications

Degree: biological sciences, agriculture, natural resource management, environmental science, chemistry, or related disciplines appropriate to the position.

Or combination of education and experience: Courses equivalent to a major as shown above, plus appropriate experience or additional education.
